

**OF SPECIAL VALUE TO FARMERS**

Aside from its low cost, Pwdpaint endears itself to the farmer because the work of mixing and applying can be done BY SELF AND HIRED MAN in odd times without paying out a cent for extra help. And there are so many places where Pwdpaint will be of the greatest possible worth that it will pay every farmer handsomely to look about and study its uses carefully.

In no other way can a few dollars be invested so profitably as in applying this remarkable, weather-proof, fire-proof and sanitary paint. The cost is only a trifle, but you will improve the appearance of your property many fold and actually add hundreds of dollars to its intrinsic value. Full information and catalogue mailed on request to The Pwdpaint Co., Toronto.

**VENTILATION**

For Dwellings, Rural Schools and Stables  
By Prof. F. H. KING

This is a new book (issued December 1908), which treats in a concise, practical way, the question of Ventilation in all its details. It shows the necessity of ventilation, and tells how to ventilate. The book is profusely illustrated by new drawings never before used. Special chapters are given to the ventilation of houses, both new and those already built; the heating and ventilation of rural school houses and churches, and of stables, poultry houses, etc. Send for a copy.

Price, post paid - 75c.

**Amatite ROOFING**

IF you will write to-day for a free sample of Amatite, the end of your roofing troubles is in sight. It is the one roofing that needs no painting after it is once laid on the roof.

If you would sit down and figure out exactly how much it cost to paint a smooth surfaced roofing during its life, you would find that the cost of this paint is more than the roofing itself.

Amatite, on the other hand, has

a real mineral surface, and we sell the goods on the broad statement that it needs no painting of any kind.

The man who puts Amatite on his buildings is insured against leaks and trouble for many years to come.

Send name and address for a sample and booklet, which will prove conclusively how much better Amatite is than the old-fashioned "rubber roofings" which require constant painting and care to keep them tight.

**You Don't Get Full Value Out of the Manure When You Spread It by Hand**

SPREADING with a machine pulverizes and makes the manure fine, and the first shower washes it all into the soil. There is no loss—none of it washed away. It is in condition for the roots of grains and grasses to lay hold of it and get the benefit from it. *You ought to spread manure with an*

**I. H. C. Manure Spreader**

You will be able to cover twice the surface and get practically double the value from the manure that you are getting by hand-spreading.

It is the only way to keep up the fertility of your soil without buying commercial fertilizers. You are not only able to keep your farm in a high state of fertility with the manure produced upon it, but the work of spreading the manure is cut in two.

The I. H. C. Manure Spreaders are right-working, light-draft machines, either one of which will spread

the manure of your farm for many years with the least annoyance and the least possible outlay for repairs. The Cloverleaf is an endless apron spreader. The Corn King is the return apron style. You can spread slow or fast, thick or thin as wanted. Each spreader is made in several different sizes.

Any International Agent in your town will supply you with a Spreader Catalogue. Call on him or write nearest branch house for any further information you may desire.
