

# SMITH MIXERS

have been and are being used on the large Contracts in Canada, Contracts which require a machine of undoubted thoroughness in mixing, large capacity, and lastly, but perhaps not least, reliability for continuous hard work.

The reasons lie in the design, material and workmanship. The Smith Mixer design has been imitated as closely as patent laws will allow. We have spared no efforts to secure the best material and workmanship and the result—3000 in use without a single failure—justifies these precautions.

That is why Contractors, Engineers and Architects feel secure when a Smith Mixer is being used on their work.

Made in all Sizes and Styles of Mounting.
