"THIS MAGNIFICENT WORK must excite the ADMIRATION of EVERY PRACTICAL AGRICULTURIST. It forms at once a complete history of the progress made up to this day in the adaptation of mechanism to farming operations, and a brilliant analysis of the value of each additional step on the road of improvement to the farmer. . . . It is a work which, like its great predecessor, the *Book of the Farm*, supplies an obvious want, and does so to such perfection as to render any other work on the subject, for some time to come, a superfluity."—Sussex Agricultural Express.
