ELL & SON

GOSSIP.

You can harm others by mean acts or even by unkind thoughts toward them, but it is well to bear in mind that you cannot hurt another without injuring yourself.

Swellman—Yes, I'm still looking for a coachman. Applicant—Well, I know all about horses and Swellman—But have you had any experience with an automobile? Applicant—Not exactly, sor, but I wuz tossed be a bull wanst.

Cases of longevity in horses are not at all uncommon. Quite recently we are informed a Yorkshire veterinary surgeon was called in to supervise the slaughtering of a horse which had reached the great age of 44 years.

Recognize your own limitations and get all the light and help you can from whatever source, but do not accept or adopt the opinions of others so far as your individual conduct is concerned, unless they seem in accord with your best judgment.

Two strikers were picketing the entrance of an alley during the strike at the factory of the Kellogg Switchboard & Supply Company, in Chicago. A non-union man came out of the factory and started across the street. One of the strikers picked up a brick. As he looked at it an expression of disgust came over his face and he threw it down. "Why didn't you throw it at the scab?" asked the other striker. "Because it's a non-union brick."

A Johns Hopkins University instructor said the other day of Dr. William Osler, the noted Canadian-bred physician:

"When Dr. Osler was a student at McGill University, in Montreal, he passed on the street one day beside a cow that had become stubborn and would not move along. He regarded the cow for some time. Then he took a box of pills from his pocket and gave one to the animal. She swallowed the pill willingly, and then, at a breakneck speed, she made off down the road. "The drover watched her disappear. Then he turned to young Osler and laughed strangely. "I say, give me one of those pills, will you?" he said. "What for?" said Osler. "Why," returned the drover, "I've got to follow that beast."

The progress of the English Shire Horse Society has been marvellous. Ten years ago its membership was 1999; this year it is 3619. Ten years ago the prizes offered at the spring show amounted to £942; this year they amount to £2,200. The entries at the London show of 1894 numbered 475; this year they are 862. But perhaps the greatest evidence of progress is to be found in the support given to country shows. Ten years ago twenty of these were helped; this year the number is 914. The annual turnover of the Society ten years ago was £10,800; this year it is £24,000. Finally, the reserve fund in 1894 stood at £6,000; in 1904 it stands at £12,000. During 1903, 356 new members were elected, and 141 were deleted, leaving a net increase of 215. The membership at 1st January, 1904, stood at 3,619, of whom 2,720 were annual members at 21s. each.—[Scottish Farmer.

THE LATEST IN HORSESHOES.

A couple of ingenious inventors in Switzerland have just introduced to the notice of the public a new form of horse-shoe from which great things are expected. This new invention is a shoe which is not nailed to the hoof as is usually the way, but attached thereto by means of metallic bands. The new system has already been subjected to tests of various kinds, and it is said to have given good results. One of the advantages claimed for it is that it does not fatigue the animals so much as the system generally adopted. It is announced from Berne that the Swiss Government has appointed a commission to conduct experiments with a view to ascertaining the suitability of the invention for adoption by the Swiss cavalry.

CAN MAKE MEN SOUND AND STRONG

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured.

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write for it this very day.

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the

DR. S. GOLDBERG, The Possessor of 14 Diplomas and Certificates, Who Wants No Money That He Does Not Earn.

ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interests of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the fourteen diplomas and certificates, entirely free. Address him simply, Dr. S. Goldberg, 208 Woodward Ave. Room 567, Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

TAM WORTHS

30 head from 2 to 5 mos. old, registered. Write for particulars and prices. D. J. GIBSON, Newcastle, Ontario.

GOSSIP.

To the late Herbert Spencer, the minds of lunatics had an odd fascination. Mr. Spencer was a frequent visitor to a number of asylums, and sometimes he would tell of the criticism a lunatic woman made on a sermon that was preached in her asylum. This criticism was brief, but it was telling. "To think," said the woman, pointing toward the clergyman, "to think of him out and me in!"

One of the most popular of the colonial officers during the war followed during peace the trade which is called by the rather lugubrious term of "undertaking." A knot of British officers gathered about this individual one day, and were chatting over the immense variety of pursuits open to colonials, when one of them asked the colonial officer who gained his livelihood as I have mentioned: "By the way, what profession do you follow?" Quick as a flash came the answer, "I follow the medical profession." The one man in the group who saw the joke had to store it up for future use among the comrades of the popular colonial officer.

The feature of the sale of Aberdeen-Angus bulls at Perth Show and Sale, on Feb. 17th was the demand for specimens of the Erica tribe. Sir George Macpherson Grant's bulls averaged £172 10s., the best prices for his lot being 355 gs., 165 gs., 150 gs., 110 gs., and 105 gs. The average for the 326 bulls sold was £23 14s. 9d., against £32 15s. 7d. last year. The highest price was paid for Evolsurus, which won second in the senior class. The highest price for a female was 135 gs., for Mr. Allan's second-prize two-year-old heifer, Ebright of Ballintomb, a big, sappy, double Erica, by Edward R.

The late John Procter was a great walker in his college days. He liked nothing better than to set out early on a frosty morning, and to walk twenty-five or thirty miles through the country. He would start alone, as a rule, but if he fell in with a teamster, a laborer, a tramp—anyone—he was well pleased. He would bring home many an odd bit of talk that he had gathered in this way. He once met an Irishman on the road. They plodded along together a matter of six or seven miles. They stopped and read each milestone, as walkers always do, and Procter said: "I think that milestones cheer a road up wonderfully, don't you?" "Faith an' I do that," said the Irishman. "I find them a great comfort. It would be an improvement, though, if they were nearer one another, wouldn't it?"

Mr. John Milne, Dyce, N. B., has been in the habit of weighing his cattle every twenty-eight days for the last twenty years, and this practice has given him some exceptionally valuable information. Calves fed chiefly from the pail increased in live weight more rapidly in the first three months than ever afterwards, gaining in some cases 1 lb. for every 8 lbs. of new milk consumed. Mr. Milne also found that the quantities of certain foods which produced 100 lbs. increase in beasts nine to fifteen months old, produced only 67 lbs. when the animals were twenty-one to twenty-seven months of age, and no more than 37 lbs. when they were thirty-three to thirty-nine months old. Stores nearly mature have not paid Mr. Milne for their keep, while young and lean stores have paid well. The latter proved remunerative up to twenty-two months, but not afterwards, if fat then. Even the best of Irish stores have never paid for literal feeding after they were twenty-four months old.

ENGLISH BERKSHIRES.

A few young boars at special prices. Choice young sows, bred to farrow early in April. Short-horn calves of both sexes.
