

DO YOU WANT THIS PONY SHIPPED TO YOU?

How to Win

Candidates in a Contest Should Use Their Friends

All boys and girls have friends and thousands of people who have votes do not know any candidates personally. They will be friends of your friends, however, and if not friends of your friend's friends. See how easy it will be to win if you get subscriptions from them all. Tell them your story in your own way, how they can help you by giving you their subscriptions to The Telegram, and, as this is the season for renewing subscriptions, they will not refuse. Try hard for yearly subscriptions, they count the most.

Two Thousand Votes in Every Home

Any boy or girl in Western Canada can be a candidate with two thousand votes to their credit with but little effort, for a subscription from your father will nominate you as a candidate and with your nomination goes two thousand votes. Once you get started and tell your friends you have two thousand votes they will all give you their subscriptions, and it will only be a short time before you are up among the topnotchers. Do not be satisfied with your father's subscription, for there are two thousand votes in every home and you can get them just as easy as you did your father's. Your neighbors will be pleased to see you the owner of a nice Shetland pony and will give you their subscriptions if you tell them what you are after.

"CORPORAL" CRATED FOR SHIPMENT.

Pony and Pony Buggy

"Corporal." The Telegram Pony, is a registered three-year-old standard-bred Shetland, by the celebrated "Don," out of "Poppy." Both his sire and dam were imported from the Shetland Islands and have won many prizes in the show ring. Corporal weighs 250 pounds, stands thirty-nine inches high. He is coal-black, with a heavy mane and tail. In harness Corporal performs like a Hackney and can step fast for a pony of his inches. Although kind and gentle he has plenty of life. In short, Corporal is as nearly perfect as a pony could be.

With the pony goes wagon, harness, saddle, bridle, all brand new and ordered specially for Corporal. A better or more complete outfit could not be found in the West, for money has not been spared in the purchase of this splendid pony and outfit.

Contest does not close until December 15

Nine Additional Grand Prizes

The next nine highest contestants will receive other grand prizes, consisting of a \$60.00 boy's or girl's coon coat, a \$48.00 Brantford bicycle, boy's or girl's; a \$40.00 Singer sewing machine, a \$35.00 boy's or girl's diamond ring, a \$32.00 Columbia gramophone with 16 records, an Eastman kodak and developing outfit valued at \$30.00, an Edison phonograph with 24 records, worth \$25.00, a boy's or girl's gold watch and chain, fully guaranteed and valued at \$20.00, and a \$15.00, boy's or girl's writing desk.

How To Get Started

Before we can register your name as a contestant, we require you to send in:

A two-years' subscription to the Weekly Telegram, at a special price of 75 cents a year, or \$1.50.

Or four months' subscription to the Daily Telegram, to be sent to a Manitoba address. Price \$1.00.

Or Six months' subscription to the Daily Telegram to be sent to an address outside of Manitoba. Price \$1.00.

Send in any of the subscriptions mentioned and you will be entered regularly as a contestant for the Pony Outfit and other prizes, and will be credited with 2,000 votes.

Mail Subscription Rates

	One year.	Two years.
Farmer's Weekly Telegram	\$1.00	\$2.00
Daily Telegram in Manitoba	4.00	8.00
Outside Manitoba	2.00	4.00

How Votes Count

For	No. votes
\$1.00 paid on single subscription	500
2.00 " " " " " "	1,500
3.00 " " " " " "	2,000
4.00 " " " " " "	2,500
5.00 " " " " " "	3,500
6.00 " " " " " "	4,500

Merit Thrice Vindicated

LOUDEN'S BARN AND STABLE EQUIPMENTS WON HIGHEST AWARDS and GOLD and SILVER MEDALS at St. John, N. B., Halifax, N. S., and Royal Cornwall show, England, at exhibitions just closed. The medal won at Cornwall was DONATED BY THE KING and was the only one given for agricultural implements.

DON'T YOU THINK that it would pay you better to install PRIZE-WINNERS rather than unknown and untried goods? Let us show you why IT PAYS to have your barns and stables equipped with LOUDEN'S PERFECT EQUIPMENTS. OUR CATALOGUE AND CIRCULARS ARE FREE.

GOSSIP

HYPOCHLORITE TREATMENT OF WATER

The attention of the public, as well as health and municipal authorities has been directed during the past few months to the purification of water by means of the addition of small, very small quantities of hypochlorite of calcium, otherwise known as chloride of lime. We have been led to believe the process is a very simple one; indeed so simple that a child might almost direct the treatment. It is true that in case of emergency, municipal and health authorities may, under the direction of a sanitary engineer, improvise the means for the application of the hypochlorite and thus prevent outbreaks of typhoid fever when the water

is sewage polluted; but for the proper and scientific installation, as well as for the oversight and management, expert services give the best results, and where a municipality will pay for the services of an expert, the expenditure is more than compensated for by the results obtained. These facts are clearly shown by the work and operation of what is known as the Bubbly Creek Water Purification Plant of the Union Stock Yard and Transit Co. at Chicago, which has been in operation for nearly two years.

The following information, descriptive of it is taken from the report of C. A. Jennings, chief chemist and superintendent of filtration.

First, as the class of water, Bubbly Creek receives the sewage of some 350,000 people. The normal size of the creek is not given, but the bacterial results for a period of twelve months show the maximum to have been 2,350,000

bacteria per cubic centimeter (about 18 drops), while the minimum was 30,000, the average being 354,000 per cubic centimeter.

Without entering into the details, it may be said that the plant consists of pumps, a canal, now part of the sedimentation system, three pairs of settling basins and mechanical filters. From these latter the TREATED water flows into the clear-water well and from thence it is supplied to the stock yards.

Consequent upon the close and intelligent oversight maintained, various changes have been made both in the operation of the plant and in the chemicals used in the treatment of the water.

At present, the coagulant used is sulphate of alumina, a solution of a strength of 3.3 per cent. being used. Subsequently hypochlorite solution of the strength of 1.2 per cent. is added, after which the water passes through the filters and is then ready for use.

As regards the cost of operating this particular plant, the contract guarantee called for nothing in excess of twenty dollars per million gallons, this to include cost of chemicals, labor and power for pumping, but not depreciation charges and interest on investment. The cost of operation has averaged only \$10.54 per million gallons, and a still further reduction in cost of operation will be shown, as, since the use of hypochlorite, a total reduction of some 65 per cent. has been made in respect to chemicals alone.

Too much credit cannot be given to C. A. Jennings for this practical demonstration of how water strongly polluted with sewage may be converted into a potable water of a high quality. The reporter states it was drunk by himself and his assistants in preference to the city water, and he significantly adds: "There has never been a single case of sickness or intestinal disorder caused by doing so."

Undoubtedly, municipalities having water supplies liable to contamination by sewage hereafter for serving out to the public a sewage-polluted water.

GEN. ARNOCK KING, ONE OF J. D. ALGREGOR'S YOUNG ABERDEEN ANGUS WINNERS
