

THE ACADIAN.

WOLFVILLE, N. S., OCT. 10, 1913.

Equal Before the King.

Speaking at Halifax, Mr. Borden said that Canada will not be an 'adjunct' even of the British Empire. But we have no desire to force the pace unduly—we know that we must creep before we walk. Those whom these questions concern must always reckon with an inborn feeling in the Canadian breast that a British subject living in this Dominion must ultimately have as potent a voice in the government and guidance of this world-wide Empire as a British subject living in the United Kingdom. Whether our home is in the British Islands or in Canada we must be equal before the King. The full privileges as well as the full duties and responsibilities of citizenship are the right of the Canadian people.

Importance of Good Roads.

The Prime Minister says, truly, that we have hardly begun to realize the importance of good roads in Canada or to grasp thoroughly the truth that they are a necessary and vital link in any scheme of transportation. In some cases the cost to the farmer or other producer of transporting his products to the railway station is considerably greater than the freight thence by rail to the nearest available market. The amount of loss and waste through bad and inferior roads in this country is almost incalculable. The late Government never lifted a finger to remedy this condition. Not one dollar of their boasted surpluses was ever devoted to this all important purpose. One would not suppose, however, that they would undertake to burn or destroy a measure so obviously in the interests of the whole people as the Highways bill submitted by Hon. Mr. Cochrane evidently was.

Chance for Farmers.

In the high price of meats and the scarcity of cattle, sheep and hogs the Canadian farmer has a strong incentive to go in for live stock where he has not done so before, and go in on a larger scale where he already has made a beginning. The population is growing far faster than the meat supply both in Canada and the United States, and the new American tariff will, it now appears, admit Canadian cattle to the States free of duty. It would look as though the Canadian farmer has a profitable source of pretty high profits right at hand. That extensive sections of the West appreciate the situation is indicated by the statement that one man has brought 8,000 young steers from Mexico. It is said that Alberta alone will have 500,000 hogs ready to market this year and that the Lethbridge district will yield 1,000,000 pounds of wool. There is plenty of room for progress along this line. Six or seven years ago Canada and the United States were both considerable suppliers of cattle and meat to European countries, particularly Britain. In 1905 Canada exported to Britain 1,487,718 live animals, and the United States 414,000. In 1912 Canada exported to Britain 6,800 cattle, and the United States 39,987. The North American countries have dropped out of the cattle and meat exporting business on account of their increasing home population and an ever diminishing quantity of stock.

It is announced that in the four months of April, May, June and July 250,000 immigrants entered Canada with the declared intention of making their homes in this country. This is probably the world's high-water mark in colonization. On August 1st one out of every thirty-one people in Canada had entered the country since the first of April. Applying the same basis of calculation to the United States it would call for over three million immigrants in four months. It is probable that during the present fiscal year, which ends on March 31st, 1914, Canada will receive almost if not quite half a million of immigrant population.

The generous rain-falls of the past week have been very beneficial and the condition of the water supply had been greatly improved thereby. The reservoir was getting low and causing the town authorities and citizens generally some uneasiness. There is now plenty of water. We understand that the storing capacity of the reservoir is to be increased so as to prevent a repetition of the danger in coming years.

Girl's Nerves Fully Restored

Was Never Able to Obtain Lasting Benefit Until Dr. Chase's Nerve Food Was Used. Too many girls grow up with weak nervous systems and exhausted nervous systems. Indoor life and too much application in school are sometimes the cause. The blood made enriching and the nerves made strengthening by such treatment as Dr. Chase's Nerve Food. This food is in doing wonders for many thousands of girls whose nerves had almost disappeared of their over-studying into strong, healthy women.

Mrs. J. Russell, 315 Woodville avenue, Toronto, writes: "My daughter suffered from nervousness since childhood and any medicine she tried did not do her lasting good. We read in the paper about Dr. Chase's Nerve Food, and my daughter used it with wonderful results. This treatment has built up her system and she is now a healthy girl."

Dr. Chase's Nerve Food, 50 cents a box. Sold by all druggists, or direct from Dr. Chase, 1111 Broadway, New York, N. Y.

Mrs. A. H. Coleman, 307 St. George Street, Halifax, N. S., writes: "My daughter, aged 12 years, was suffering from nervousness since childhood and any medicine she tried did not do her lasting good. We read in the paper about Dr. Chase's Nerve Food, and my daughter used it with wonderful results. This treatment has built up her system and she is now a healthy girl."

The Packing of Fruit.

Canadian fruits, than which there are none better, are now regarded in the markets of the world at their true worth. Through the operations of the Inspection and Sale Act the packing of Canadian fruit has been greatly improved and the development of the trade accelerated. From time to time since its enactment, as experience has indicated, the Act has been improved in order to more completely encourage and perfect the industry. The latest amendment to the Act, which was passed during the past session of Parliament, extends inspection to imported fruit, thereby placing it on an equal footing with that grown in Canada. The amendment provides that the Governor-in-Council by regulation may prescribe the imported fruit the packages containing which must be branded or marked; the brands or marks to be used thereon, as well as the methods and places where such shall be done. Other minor changes were effected in the Act.

For the information of those interested in the fruit trade there has been issued by the Dairy and Cold Storage Commissioner a pamphlet, designated bulletin No. 40 of the Dairy and Cold Storage Branch, containing the Inspection and Sale Act, Part 9, (the Fruit Marks Act and Fruit Packages) as amended. Copies of this bulletin are available to those who apply for them to the Publications Branch of the department of Agriculture at Ottawa.

Hungarian Violinist.

An announcement that will prove exceptionally interesting is that made by the Gilmore Bureau, of Toronto, to the effect that they have secured the services of Robert Pollak, the famous Hungarian violinist, for a tour throughout Canada and that he will appear in Wolfville on Thursday evening, October 16th. Pollak is an artist of whom America has not yet had the opportunity to form a judgment, but taking the opinions of the London and European critics as a criterion the music lovers of Canada are fortunate in hearing him on his first appearance in this concert. Still in the vigor of youth, his interpretations benefit by the extraordinary freshness of his artistic conceptions, he having lost none of his early enthusiasm. He presents to the public the rare spectacle of an artist so profoundly convinced and penetrated by the work he plays as to appear himself to create it. In contradistinction to other violinists of note, he does not pretend to captivate them by the sheer charm of his tone and delicacy of his renderings. Pollak has for several years been famous in the European capitals, being the founder of the famous Pollak Quartette in Geneva, an organization that won immense popularity by its exquisite programmes. This work the leader was compelled to relinquish on account of the many demands on his time for engagements. He was given the virtuoso's diploma at the Geneva Conservatory after being graduated from the sister institution at Leipzig and his career has been marked throughout by his determination to attain the highest pitch of excellence in every angle of his art. As the London 'Morning Post' said: "His playing has all the elements that win approval from the British public, individual distinguished, well balanced. His ability is of the responsive order that enables him to invest all schools of thought with a wholly appropriate character and shows a delicate taste in his artistic character that but accentuates his general attitude." With such an appreciation in the capital of the world, Pollak's Canadian tour can hardly fall short of an artistic triumph.

Acadia Notes.

The annual Y. M. C. A. reception to the new students was held in College Hall last Friday evening. A large number were present from the college and the academy and a most enjoyable time was spent. During the evening short speeches were given by the presidents of the college societies, Dr. Catten, and other members of the faculty. The new professors especially were listened to with great interest.

Prof. Clarkson gave an interesting lecture on "Opportunities in Engineering" before the Science Society on Tuesday evening. A Glee Club has been started among the boys of the college. Prof. McKee, of the Seminary staff, is the director and the first rehearsal was held on Tuesday evening. It has been some years since Acadia had such an organization and it is hoped that it may be made a success.

Representatives of the Universities of New Brunswick, Mt. Allison and Acadia met at St. John, N. B., on Wednesday to arrange the football schedule for this season. The games will be played as follows: Oct. 10th—U. N. B. v. Mt. Allison; at Fredericton. Nov. 6th—Acadia v. U. N. B., at Wolfville. Nov. 13th—Mt. Allison v. Acadia, at Sackville.

Not Too Soon

During October is not too soon to have Xmas photos made. Autumn days pass swiftly and there is so much to be done. It is certainly the best time to have the children photographed.

Call and see the styles.

EDSON GRAHAM.

WOLFVILLE.

Death's Harvest.

Mrs. Elizabeth Dupont Prat, widow of the late Samuel Prat, Wolfville, passed peacefully away at the home of her daughter, Mrs. George Wilcox, at midnight on Monday, Oct. 6th. She had been gradually failing for the last two years. Mrs. Prat was a true lady of the Old School, and was beloved and respected by all who knew her.

Her husband, Mr. Samuel Prat, predeceased her twenty-one years ago and since then she has spent most of the time at her daughter's home in Windsor.

Mrs. Prat was a daughter of the late Samuel Morse, of Paradise Farm, Paradise, Annapolis Co., and was seventy-eight years of age.

The surviving members of the family are three daughters—Mrs. George Wilcox, Windsor; Mrs. Richard Starr, Starr's Point; and Miss Annie L. Prat; and one son, Rupert Prat, residing in Toronto—Hants Journal.

Mrs. Prat was a resident of Wolfville for a number of years. She was a most estimable lady and many old friends heard with sincere regret of her demise. The remains were brought to Wolfville yesterday and interred in the cemetery of St. John's church beside her late husband.

The Fredericton exhibition will have a surplus of over \$0.00.

Canada's Fish.

Upwards of \$20,000,000 are invested in Canada's fishing industry, which gives employment to 100,000 men and produces annually \$35,000,000 worth of fish. The industry has developed almost entirely in the past half century. Fifty years ago the annual output of fish was valued at \$12,000,000. Salmon is our valuable fish, the value of the catch being over \$10,000,000 per year, while British Columbia ranks first as a fish producing province, with Nova Scotia second. Canada's mineral production last year amounted to over \$13,000,000, an increase of 29 per cent. over the figures for the previous year. The per capita production of minerals was over \$18; 46 per cent. of the mineral output is credited to metals and 54 per cent. to non-metallic.

Get our prices on Cement, Shingles and Brick. We can save you money.
