Mr. M. Lean.—(Speaking to the question.) It was exceedingly impolitie and unwise to endow those 57 Rectories—and the best friends of the Government thought so at the time.

Mr. M. Kay hoped the Committee would proceed with the resolutions—they were called here to promote the prosperity of their country.

Mr. Cameion was really astonished to find that gentlemen who could swallow 25 pages of the report on Dr. Dunombe's papers, without seeing one tittle of the evidence on which its authors professed to found it, had now got into difficulty in trying to comprehend a resolution difficulty in trying to comprehend a re

"It is the great regulator of consumption, always taking care that in time of plenty nothing should be lost, and that in time of searcity a pittance should be on hand to the last day of need. The condition of the wretched crew and passengers on board the ship Dismond, which arrived from England the other day, is an illustration of the value of high prices. As their veyage was extended beyond the expected time, the provisions of the less provident or less able became exhausted, and they began to buy of those who had stores remaining. The veyage was extended to a hundred days, thries the time which was at first anticipated. All this time prices were rising, until a potatoe was valued at a covereign. The supplies on board of ship lasted to the end, and at the end, not enough remained to sustain them another day. Of one hundred and eighty passengers, only seventeen died. If the price of the provisions on board had not been advanced above what it was when the ship sailed, they would probably have all been consumed, and every soul on board have perished.
