HOW HOT IT IS IN AFRICA.

In Nubia the Soil is like Fire and the

Wind Like A Flame.

Africa is the hottest continent of all. One needs to turn only a few pages of African travels to feel cool by comparison in thinking how very hot he might

Mungo Park, that pioneer of the dark continent, remarks upon the awful heat blowing from the desert. The ground becomes unbearable to the naked foot and even thoroughly seasoned negroes will not run from one tent to another without sandals. Often the wind from the Sahara was so hot that he could not hold his hand in the currents of air coming through the chinks of his hut without feeling sensible

About the hottest place in the world is Massowah, on the shores of the Red Sea. Its average temperature for the month of May is 99° Fahrenheit, and even in midwinter the thermometer is said to rise frequently to over 100° in the shade. An English naval officer says the hottest town in India is nothing to Aden, while Aden's heat is mild to that of Massowah, whose climate can only be compared to that hot hereafter which we are all anxious to avoid. It was at Massowah that James Bruce, the famous 18th century traveler, was astonished to find the heat had made his sealing-wax more fluid than tar.

Captain Lyon, who made the acquaintance of the Sahara early in this century, was much struck by the absence of vege-Pul gletik at äkidom moti okik, e äflapom tation.
