The Colours of the Nfld. Kegiment.

The following extract from the "Daily Telegraph," April 15th, was received yesterday by M. J. Hawker from his cousin, Miss Evelyn Hawker, of Bournemouth, England, and may prove interesting. She has taken a great interest in our Newfoundland boys, and her family rejoices in the fact that they have twenty-seven ousins fighting for King and Coun-

NEWFOUNDLAND REGIMENT'S COLOUR.

"At the rooms of the Decorative Needlework Society, 17, Sloane-street, iust now on view the exceedingly striking colour that has been pre-pared by the members for the Newfoundland Regiment patriotically raised in the oldest of the Colonies to assist in the defence of the Empire. The gift was offered to and accepted by the regiment on the part of the Newfoundland Chapter of the Daughters of the Empire, of which Lady Davidson, wife of the Governor, Sir Walter Davidson, is president, and Mrs. Edgar Bowring, vice-president. It is anticipated that Lady MacGregor, wife of the late Governor of the Colony, will make the formal presentation in Edinburgh on the arrival of the last contingent of the egiment, though the date is not yet

To the Rev. E. E. Dorling, whose repute as an heraldic artist stands high, is due the striking and effective design of the Colour. The field is white, and upon it is the Cross of St. George in rich red. In the centre, on a white medallion, is the device of Britannia, to whom Mercury is presenting a kneeling lad with his net and fish, while the Colony's motto, "Haec Tibi Dona Fero," is be low. Surmounting all is the Imperial Crown in brilliant colouring, and a half wreath of the rose, shamrock and thistle meets this. The English Col-ours and the Tricolour are indicated in the bow that ties the emblems. All the embroidery is of the finest character, and the whole work has been

most artistically carried out.

There is also on view the banner that Sir Robert Finlay, G.C.M.G., will shortly place in St. Paul's Cathedral. for the special service of the Order on St. George's Day. The society has been notably successful in its execu-tion of these banners, and this one fully maintains the high level it has established in this difficult branch of needlework."

St. Francis Xavier's.

The Commencement Exercises of the University of St. Francis Xavier's College, Antigonish, N. S., took place on Tuesday and Wednesday, May 11th and 12th. The address to the graduates was delivered by Rt. Rev. Bishop MacDonald, Victoria, British Columbia. Rt. Rev. Bishop Morrison preached the Baccalaureate sermon. Bishop MacDonald is an old student and alumnus of the University where or nineteen years. The following is a list of the

graduates:-B. A. Thomas O'Reilly Boyle, Whitney Pier, C B. Augustine MacGillivray, Glace Bay,

Michael Leo O'Connell, Sydney, David Fraser Sears, Antigonish, Leo Bernard Sears, Antigonish,

Vincent McNeil, Big Pond, C. B. Xavier Patrick Crispo, Harbour Charles Joseph McNeil, Glace Bay, Donald Francis McLellan, Glen-Angus Bernard MacDonald, Glass-Mary Jane Chisholm, Antigonish, Anna Beatrice Murphy, Norton, N.

B. Sc. William Francis Chisholm, Washngton, D. C.
In the "Pass" lists of the University n the First Year of the Engineering course appears the name of Mr. R. R. Costigan, son of Mr. R. J. Costigan Costigan, son of Mr. R. J. Costigan, of Bell Island, Newfoundland. Mr. Costigan's name heads the list in Higher Algebra, Trigonometry, Analytic Geometry, Mechanics, Plane and Solid Geometry and Differential Calculus. He also obtained a first rank in Graphic Statics and a third rank in

water? It should be known that water is the second great necessity for human existence, the first being air. It is estimated that man can live without air from two to ten minutes; without water for three to five days; without food ten to twenty days. Just how much water each should consume is hard to determine, but a healthy individual requires from three to six pints of water daily.

Teach the children to drink water instead of visiting the soda fountain each time they feel thirsty. Any pure water is healthy. The idea that the only place to obtain benefit from drinking water is to visit some fam-

ous "spa" is preposterous. Good results may be secured from sipping water: in fact. I have found many cases where drinking rapidly caused a sick feeling. It may also be found that where one has not been accustomed to drinking water early in the morning that hot water will agree better than cold.
