League to Learn that Portoc Is Not Acceptable to the Empire

Officials Determined to Fight to a Finish.—Quiet Reigns in Cape Breton Strike Area.—Dr. Simons Made Interim President of Germany.

PROTOCOL TURNED DOWN.

GENEVA, Mar. 8. The Geneva protocol fashioning the nations to outlaw war is not acceptable to the British Empire, the announcement which August Chamberlain, British Foreign Secretary, will make to the Council of the League of Nations to-morrow.

DISCUSSING SECURITY PACT.

PARIS, Mar. 7. In connection with the talks in progress between Premier Herriot and Foreign Secretary Austen Chamberlain of Great Britain on the security pact, it is understood on the authority that M. Herriot has assigned Mr. Chamberlain that France is ready under certain conditions to negotiate the Rhineland in the near future. These conditions would be the granting of a security agreement and the control of armaments along the Rhine by the League of Nations. After a two hour talk with Premier Herriot this afternoon, Austen Chamberlain expressed himself as well satisfied with the exchange of views. He thought there was no inherent impossibility of reaching a security agreement that would satisfy Poland and Czechoslovakia as well as other Allies.

BESCO TO FIGHT.

SYDNEY, N.S., Mar. 7. This business has got to be fought out once and for all to determine who is running the collieries, the Company or the United Mine Workers of America. So declared J. E. McLurg, Vice President of the British Empire Steel Corporation this morning. Regarding the situation precipitated by the complete cessation of work among the miners throughout the coal fields of Nova Scotia, McLurg emphasized the contention that officials of the company unused to the hardships of long hours and working twelve hour shifts, could not continue to man the pumps and fans for upwards of a week. After that it would be up to the Province of Nova Scotia to assist in the protection of its own property. He added that the Company had no intention of abandoning any of the mines the permanent pumps at number 10 having been removed to prevent them from being submerged. Water was entering No. 10 at the rate of 1,400 gallons per minute. There have been no disturbances of any kind to-date throughout the collieries.

WIT REIGNS IN STRIKE AREA.

SYDNEY, Mar. 8. With their ladders replenished at the hands of their more fortunate neighbours, the miners of Cape Breton quit work Friday night following the refusal of the British Empire Steel Corporation to restore credit at the company stores and operate collieries for four and six on a working basis for four days per week, spent perhaps the quietest Sunday in their memory. The long lines of muddy streets lined the dreary cottages characterizing the mining communities of Nova Scotia were unpeopled save for swarms of apparently care free children. Smoke was belching from the smoke stacks of various bankheads where members of the company's clerical staff laboriously fired the boilers furnishing steam for pumps and fans which must be operated, tie-up or no tie-up. In order to keep the mines in operating conditions, but the din of industry was absent. In the towns of miners gathered about the street corners but there was no disturbance and no intermingling. John McLeod, District President of the United Mine Workers of America, discussing the situation to-day said, "We have had a number of conferences in Cape Breton and each time we have reached something. There was no interference during the trouble of last week, there will be none this year. However, there will be no violence. We can avoid it." J. E. McLurg, Vice-President of Bescor, was asked this afternoon what effect a ten per cent decrease in the wages scale paid the miners would have on the selling price of a ton of coal. He replied that he was not prepared to answer that question. Instead he showed that in 1923 with a wage scale seven per cent less than the 1923 scale,

the company paid out in wages two million dollars in excess of the amount paid in wages during 1924. This means, said McLurg, that the miners had more work and received more money despite the fact that they were working on a slightly lower scale. He was satisfied that under the ten per cent reduction scale, there would be a very marked increase in the demand for the companies' coal and consequently more work and money for the miners. Mr. McLurg was asked what would happen if the Provincial Government intervened, he replied, "The Government cannot make us operate the mines, how can they?"

STRIKE PROCEEDING QUIETLY.

NEW GLASGOW, March 7. The strike of the Acadia Coal Company miners in Pictou County was proceeding quietly this morning with nothing but stillness about the pit to indicate that anything unusual was taking place. Company officials stated to-day that no difficulty was being experienced in protecting the property and they would be able to keep the maintenance machinery in operation.

ASK FEDERAL GOVERNMENT TO INTERVENE.

MONTREAL, March 8. At a mass meeting in Labor interests, held at Maisonneuve Market Hall here to-day, at which J. H. Woodsworth, Labor member for Centre Winnipeg, spoke on the aims of Canadian labor, the following resolution was passed unanimously and sent to the Prime Minister:—Whereas the miners of Nova Scotia have exhausted all constitutional means in an effort to secure for themselves and children their rights as citizens to earn a livelihood, and whereas the Provincial Government absolutely refused to effect any settlement, we demand the Federal Government exercise its duty and take immediate steps to grant immediate relief to all parties in need of such relief.

POLICEMAN "CHEERFULLY" ENDS HIS LIFE.

He packed his belongings in the room he had occupied at No. 70 Bank Street seven years. Saturday morning he said good-by at Traffic Division headquarters in West 20th Street Station.

"I'm going to Miami and then New Zealand," he said. "Am I coming back? I can't say."

night at the Winston Hotel, Washington, as "John Flannigan." Monday he hired the room at the Whitehill after depositing \$5,300 in a bank.
