

Free Breakfast Table

British Duties on Tea, Coffee and Cocoa To Be Dropped.

Dr. Neill-Cream's Fate Sealed In Five Minutes.

Cyclone on the Coconada and Madras Coast.

Fardina Suffers From Dismal Storms and Floods.

The Cholera.

DINA-TEST, Oct. 21.—Eighteen new cases and eight deaths from cholera were reported in this city to-day.

The Cyclone's Work.

CHICAGO, Oct. 21.—A cyclone passed over the Coconada and Madras coasts last night. Crops were badly damaged.

Disastrous Storms and Floods.

LONDON, Oct. 21.—A terrific storm is prevailing over Sardinia. The rivers have overflowed their banks, the railroad is washed out and crops ruined. Houses have been undermined and have fallen upon the heads of their occupants. Many lives have been lost. One third of the town of Asinara has been destroyed.

Tennyson's Birthplace for the Public.

LONDON, Oct. 21.—It is proposed to acquire by public subscription the Somers estate, Lincolnshire, Lord Tennyson's birthplace, that was put up for auction shortly before the poet's death, but which was not purchased because it was found at the time, principally for the reason that it was easy of access.

Terrible Tragedy in Vienna.

VIENNA, Oct. 22.—While the 20-year-old son of Senator Bouché was playing on a violin at a party which had been given to celebrate his success at some examinations he suddenly threw down the instrument, drew a revolver and shot himself dead. When the father was informed of his son's suicide he appeared greatly shocked and fell dead.

Minister Foster in England.

LONDON, Oct. 21.—An interview with Mr. Foster, the Canadian Minister of Finance, now in England, appears in the Chronicle. Mr. Foster admitted that he had come to England with Premier Abbott to negotiate with the Imperial Government for a permanent strengthening of the representation of Canadian interests at Washington and other capitals. Mr. Foster said that the annexationists in Canada were few in number and of little importance.

A Free Breakfast Table.

LONDON, Oct. 21.—Liberals ridicule the idea that there is any serious discussion over the matter of releasing dynamites. According to reports from Radical centers one item of the Newcastle programme is certain of execution, Sir William Vernon Harcourt having declared that the next budget shall include proposals providing for a free "breakfast table" by the abolition of the duties on tea, coffee and cocoa, the resulting reduction in revenue to be met by increased taxation of land. Such a scheme would give immense satisfaction to the working classes.

Dodd's Reinforcements.

PARIS, Oct. 22.—The reinforcements to Col. Dodd from Senegal will consist mainly of Senegalese troops.

His Time is Short.

LONDON, Oct. 22.—Thomas Neill, who was yesterday convicted of the murder of Matilda Clever, will probably be executed Nov. 8.

A Welcome Christening.

BRISTOL, Oct. 22.—To mark the christening day of the infant princess, 400 women who were imprisoned for various offenses have been released, and there is consequently much rejoicing among the erstwhile prisoners and their families.

Death From an Elevator's Fall.

LONDON, Oct. 22.—The gear of an elevator in a Daresbury woolen mill broke as the factory lands were leaving. The car fell to the bottom and was shattered. Three women and a man were killed and two men are in a critical condition.

New Paper in London.

LONDON, Oct. 22.—The members of the old staff of the Pall Mall Gazette will start a new paper immediately on the lines of the Pall Mall Gazette. They receive financial backing from Mr. George Newnes, M.P., the proprietor of several other publications.

Snowstorm in England.

LONDON, Oct. 22.—The weather in Northern England is cold and stormy. Along the Tyne a hail and snowstorm is prevailing and a number of vessels are returning, seeking shelter. They report heavy weather outside. In Norfolk county the ground is white with snow.

Recovery of 53 Bodies.

HONG-KONG, Oct. 22.—The steamer Anson, which was dispatched to Sand Island, on which the steamer Bokhara was wrecked, has returned to Hong-Kong. She reports that the wreck of the Bokhara is now visible and that a strong monsoon is blowing. Fifty three of the bodies of those lost have been recovered.

Remarkable Horseman's Feat.

VIENNA, Oct. 22.—Miss Tammann, a young Englishwoman, has just ridden from Innsbruck in the Tyrol to Landeck in Prussia and back to her starting point. The distance, 229 miles, was ridden in 67 hours, the same horse being ridden throughout the journey.

A London Sensation.

LONDON, Oct. 22.—Something of a sensation has been caused by the publication that one of the leading theaters in London only suggests actresses on the condition that the theater may cancel their engagements at a week's notice if they marry without the consent of the manager. It is also arranged that engagements shall be canceled if the actresses become involved in any scandal. The legality of the marriage

rule is contested in some quarters, and it is asserted that an actress could claim damages should she be dismissed because she married. A newspaper woman leads in an article against this clause of the contract. She declares that any wholesome restraint in matrimony among marriageable women is obviously immoral.

A Laudable Project.

LONDON, Oct. 22.—The Princess of Wales and her daughters yesterday received Miss Kate Marsden, who is interested in a project to establish a leper hospital at Vallois, in Eastern Siberia. The Queen has summoned her to visit Balmoral Castle prior to her starting on her American tour to raise funds to carry on her work in aid of the lepers.

An "Honorary Canon."

LONDON, Oct. 22.—Rev. Canon Robert Baynes, 58 years old, of Chatham Road, Twickenham, who was arrested in August on the charge of assaulting Miriam Louise Cogswell, aged 19, was to-day found guilty and sentenced to eighteen months imprisonment. The Rev. Mr. Baynes is an honorary canon of the Church of England.

Another Valuable Library for Sale.

LONDON, Oct. 22.—Following hard upon the Althorpe library sale comes news of the approaching auction of the great Apponyi library belonging to the Hungarian count of that name. This collection comprises some of the rarest books known to be extant. Among other treasures is a copy of the earliest edition of the famous Biblia Polyglotta.

Russian Hebrews Shot Down.

VIENNA, Oct. 22.—Gendarmes have ordered back 400 Russian Hebrews who tried to enter Austria near Bojowicz. The emigrants would not turn back, and after exhausting all other means of deterring them, the gendarmes opened fire. Three emigrants were killed and 22 were severely wounded. The rest fled back across the frontier.

Aylesbury Was In It.

ENGLAND, Oct. 22.—In the court here John Tyler brought suit against George Maxwell to recover £5,000, being the amount of a check paid to Lord Aylesbury by Maxwell in settlement of losses at basketball played at Brighton. Maxwell in his defense alleges that he was induced to play while Aylesbury and that Aylesbury took advantage of his intoxicated condition.

A Russian Version.

ST. PETERSBURG, Oct. 22.—The Official Messenger publishes the first authentic version of the Russian capture of sealing vessels in the Pacific Ocean. The paper declares that six vessels were seized at points distant eighteen to twenty miles from the Russian coast, not from 30 to 40 miles, as has been asserted. The captures were nearly all made outside the territorial water boundary. This is explained by the fact that the sealers, seeing the Russian cruisers approaching, fled, and the cruiser chased them sometimes for an hour and a half. Only the vessels, logs, charts, etc., which proved that they had been sealing in Russian waters, were seized. Three of the vessels captured were released with a warning. The conduct of the Russian officers was blameless. The British flag was not insulted. It was only hauled down and replaced by the Russian colors after the vessels had been seized. The crews of the captured vessels were well treated, but when they became quarrelsome and insulted the Russian officers, order had to be restored by force of arms. The Official Messenger claims the poor catch of seals on Copper Island is due to the fact that the rookeries have been destroyed by sealers, especially by the English.

Break in the Welland Canal.

PORT DALHOUSIE, Ont., Oct. 22.—Lock No. 4 on the new Welland canal was carried away this morning by the action of the water. The accident will cause a delay to traffic of three or four days.

Vera Ava Charged with Theft.

ST. LOUIS, Mo., Oct. 22.—A telegram from Quincy, Ill., says Vera Ava, the notorious Doss Debar, was arrested there at noon yesterday on the charge of stealing \$1,000 from Mrs. John Mitchell at Elgin, Ill.

Serious Affrays in New York.

NEW YORK, Oct. 22.—As a result of a duel with clasp-knives in a saloon last night James Murphy will die and John Ceterano is seriously injured. Antonio Ferraro, an Italian watchman, was beaten to death yesterday with a hammer by Tony K.

Accident at Woodstock.

WOODSTOCK, Oct. 22.—Capt. Mullins, a well-known farmer of East Oxford, met with a serious and probably fatal accident Thursday. He was drawing wood when the wagon struck a log and pitched him head first into the horses' back. One of the animals kicked him on the head, fracturing his skull. He was unconscious for several hours, and at last reports was in a dying condition.

Borden Trial May Be Postponed.

FALL RIVER, Mass., Oct. 22.—A local paper says it is reported on good authority that Lizzie Borden will not be tried for the murder of her father before the February term of the court, provided of course the grand jury brings a bill against her. It is said that it will be impossible to secure three justices who can preside before February, as the engagements of the bench will occupy them till the second month of the year.

A Fescemaker Shot.

SPRINGFIELD, Ind., Oct. 22.—While George Cooper, the present Congressman from this district, was speaking here last evening a disorderly crowd made a noise outside of the hall. Finally when shots were fired against the building Alvin Williams, the captain of the Avon Club, was immediately shot by Henry Allison. Williams died immediately. Allison has not yet been arrested.

Caught in a Hurricane.

NEW YORK, Oct. 22.—The British steamer Gladstone from Bremen Sept. 11, arrived last night. Capt. Stevens reports that on Sept. 16, in latitude 57 deg. 40 min., longitude 10 deg. 40 min., his ship experienced a hurricane from north to northwest, and was obliged to leave to the sea running mountains high. When lying to for about an hour a terrific sea swept over the ship, carrying away the funnel, bridge, chart and wheel-house ventilators, bows and life raft, and seriously injuring Second Officer Geddes, who had his arm and legs broken. James Mann, a seaman, received internal injuries.

A Perth County Man Killed in a Gravel Pit.

House of Commons Election in Echo-la.

Hon. John Costigan is being boomed for the Lieutenant-Governorship of New Brunswick.

The annual general meeting of convocation of Trinity (Toronto) will be held on Wednesday and Thursday.

Rev. A. Farquharson, of Sydney, C. B., a highly respected minister of the Presbyterian Church, died on Friday.

Rev. Dr. and Mrs. McCulloch, of Truro, have just celebrated their golden wedding. Dr. McCulloch was for half a century pastor of the First Presbyterian Church at Truro.

Dr. Severin Lachapelle has been declared elected by acclamation as member for Hochelaga in the House of Commons in succession to Mr. Desjardins, appointed to the Senate.

Mr. Chapleau, speaking on the separate school question Friday, declared he did not know what action the Government would take, but it would pursue a policy of reconciliation.

John, the 18-year-old son of Mr. John Keen, of St. Marys, lost his left arm through an accident in Clark & Carman's flax mill Friday evening, being caught by an unprotected portion of shafting and whirled around by a belt.

Daniel McNamara, a well-to-do farmer in the Gore of Down, was loading gravel in a pit on Thursday when the bank caved in without warning, burying him all but his head. It took near half an hour to extricate him, and then life was extinct. He was doing stonework labor.

The potato rot has been very extensive in fields north of Barrie. The new Masonic Hall at Barrie will be dedicated by Hon. J. M. Gibson, grand master, Nov. 1.

The Montreal Canadian announces that Mr. Achille Larue, advocate, formerly M. P. for Bellechasse, will enter the Trappist monastery at Oka.

An Ottawa dispatch says James Wood, one of the "Island" men, was killed on a boat where there had been an unbroken lake surface before. These islands, on one of which large trees were growing, proved to be great masses of earth broken from the mainland by the storm, and driven down the lake by the high wind. The largest island about an acre and a half, and had been broken from the farm of Mrs. James Stone. It had been carried four miles down the lake and lodged in Burts Bay, near the lake front owned by Charles Gifford. As that gentleman was pleased with the result, he bought the island for \$5,000, and the property from her, paying \$5,000 on the promise of the latter to make extensive improvements upon it. At the same time Charles Neidhart, another real estate man, went to Mrs. Stone and purchased the property from her, paying \$5,000. Both Wicks and Neidhart received quitclaim deeds. Now both purchasers claim the property, and the courts will be called upon to decide between them.

The legal fraternity has already begun to discuss the case, and some puzzling questions arise. Thus, is the property real or personal? If personal, being movable, was it the property of the original owner after it had lodged in the highway? If real, it is the property of the person who found it against which it lodged, or, having found anchorage in the public highway, does it revert to the State? It is argued that, being movable, Mr. Wicks' title will not hold, as he has no right to drive piles in the highway to hold it while any other person might carry it further down and against another man's property, or a passing steamer might hit and pull it away, thus making it the property of any person along the lake front.

The best reason to prevail that the Chautauque Valley was once a large body of water, over a portion of which a crust of land has been formed, and that the farming lands around it are but a short distance above surface. On Marvin Park an undulating motion of the ground is discernible when a horse passes over it, and when the annual fair is held upon it timid persons refuse to remain because of the distinctness of the strange vibration. Also, inexhaustible artesian wells are resorted to from 100 feet below the surface. The city of Jamestown is supplied with water from these wells, which were drilled about four miles to the east, and some of which flows 500,000 gallons a day.

The phenomenon is a remarkable one, and is likely to engage the attention of the scientists who assemble annually at Chautauque. Naturally, the owners of farms along the lake will feel some uneasiness when the next big storm comes. To have the lake dotted all over with little islands would be a very unsymmetrical, yet undoubtedly added to its picturesqueness.

CULLED AND CURTAILED

News of the Day Without Note or Comment.

The London Economist reports that a panic prevails in the Baku, Russia, petroleum markets.

Joseph Bentley fell from a trapeze to the stage at a theater in New York Wednesday night and was killed.

Owing to a strike of printers all the newspapers of Vancouver have suspended publication temporarily.

Capt. J. W. Lawler, who sailed from Boston in a 12-foot boat on a transatlantic voyage, has been given up by his friends as lost.

The house of Josh Matthews in Sumter county, S. C., was burned, with his four children, who were tied in the dwelling while the father and mother attended a religious service.

Baby Weather Prophets.

WINNIPEG, Oct. 21.—Indians on the reserve near Calgary declare that two newborn babes have spoken, and predicted that soon a terrible storm will sweep over the Northwest, destroying trees, houses and everything in its path. So alarmed are the Indians over this report, and so implicitly do they believe it, that they have dug large pits, in which they and their families may take shelter when the storm commences.

FRIGHTFUL ACCIDENT!

Sad Outcome of the Columbus Celebration at Los Angeles, Cal.

Seven Persons Killed and Five Fatally Injured by an Explosion.

LOS ANGELES, Cal., Oct. 22.—A frightful explosion attended the Columbus celebration last night. A large number of people including many children had crowded around the spot where preparations were being made to explode a piece of six-inch pipe loaded with powder. The contrivance exploded prematurely. Seven persons whose names are not known were killed outright or received injuries from which they died soon after.

Besides these it is believed that at least five others were killed or fatally injured and a number of others were seriously injured. Theodore Rapp was standing near the spot where the explosion took place. Both were instantly killed, the side of one of them being entirely blown away. Antonio Bagitto had his left leg torn off and died an hour later. Ed. Griffith, 19 years old, and the flesh torn from the left leg. Mike Cullen Welsh had his right arm fractured; B. Bunker, 25 years old received injuries that may prove fatal; H. J. Loyd, aged 13, had his left leg shattered but may live; Victor Cassano had his right leg torn from the body and afterwards died. At present known are: Frank Ford, aged 14; Louis Oden, aged 12; Antonio Bargh, Victor Cassano, and two daughters of Theodore Rapp.

"HEAD-END" COLLISION.

Several Lives Reported Lost at Rardin, Illinois.

CHARLESTON, Ill., Oct. 22.—A head-end collision occurred on the Clover Leaf Railroad at Rardin last night. Several lives have been lost. A special train carrying physicians left here for the scene of the wreck.

A FARM AFLOAT.

Remarkable Result of a Storm at Chautauque Lake.

A curious legal complication is existing the interest of some residents about Chautauque Lake, says the Ogdensburg (N. Y.) Journal. On the night of Aug. 24 a severe storm visited the country around the lake, and the next morning the islands were seen where there had been an unbroken lake surface before. These islands, on one of which large trees were growing, proved to be great masses of earth broken from the mainland by the storm, and driven down the lake by the high wind. The largest island about an acre and a half, and had been broken from the farm of Mrs. James Stone. It had been carried four miles down the lake and lodged in Burts Bay, near the lake front owned by Charles Gifford. As that gentleman was pleased with the result, he bought the island for \$5,000, and the property from her, paying \$5,000 on the promise of the latter to make extensive improvements upon it. At the same time Charles Neidhart, another real estate man, went to Mrs. Stone and purchased the property from her, paying \$5,000. Both Wicks and Neidhart received quitclaim deeds. Now both purchasers claim the property, and the courts will be called upon to decide between them.

The legal fraternity has already begun to discuss the case, and some puzzling questions arise. Thus, is the property real or personal? If personal, being movable, was it the property of the original owner after it had lodged in the highway? If real, it is the property of the person who found it against which it lodged, or, having found anchorage in the public highway, does it revert to the State? It is argued that, being movable, Mr. Wicks' title will not hold, as he has no right to drive piles in the highway to hold it while any other person might carry it further down and against another man's property, or a passing steamer might hit and pull it away, thus making it the property of any person along the lake front.

The best reason to prevail that the Chautauque Valley was once a large body of water, over a portion of which a crust of land has been formed, and that the farming lands around it are but a short distance above surface. On Marvin Park an undulating motion of the ground is discernible when a horse passes over it, and when the annual fair is held upon it timid persons refuse to remain because of the distinctness of the strange vibration. Also, inexhaustible artesian wells are resorted to from 100 feet below the surface. The city of Jamestown is supplied with water from these wells, which were drilled about four miles to the east, and some of which flows 500,000 gallons a day.

The phenomenon is a remarkable one, and is likely to engage the attention of the scientists who assemble annually at Chautauque. Naturally, the owners of farms along the lake will feel some uneasiness when the next big storm comes. To have the lake dotted all over with little islands would be a very unsymmetrical, yet undoubtedly added to its picturesqueness.

The Corpse Sat Up.

WAYCROSS, Ga., Oct. 21.—John Randall Kennison, living near Folkesburg, Ga., was taken suddenly sick Tuesday night and apparently died. The body was prepared for burial and a coffin sent for. Near the hour of midnight those watching with the body were startled to notice a faint quiver of the lips, and in a few minutes the man opened his eyes and sat up. The family were overjoyed when it developed that Kennison had only been in a trance. The coffin arrived in the meantime and Kennison's friends were about to return it when Kennison fell asleep again, this time to wake no more.

New University Professors.

TORONTO, Oct. 22.—In accordance with a recommendation made some months ago by Hon. Edward Blake, the Ontario Government has promoted several lecturers in University College to the rank of associate professors, in the same subjects in which they have hitherto been lecturers, the appointments to date from Oct. 1. The names of the gentlemen promoted and the positions they formerly filled are as follows: W. H. Vandermissen, M.A., lecturer in German; William Dale, M.A., lecturer in Latin; John Squair, B.A., lecturer in French; W. H. Fraser, M.A., B.A., lecturer in Italian and Spanish; A. B. McCulloch, B.A., M.D., lecturer in physiology. The salary of Mr. Vandermissen will be \$2,000 and that of the other gentlemen \$1,500 each. All the new professors are graduates of the university.

UNEARTHING THE GANG.

Two Important Arrests by a Toronto Detective

In Connection With the Phair Tragedy in This City.

Samuel Spencer and Charles Henderson the Prisoners—The Latter Thought to Be the Mysterious Boy Who Was With Burke and Wilson—Burke's End Record.

A Toronto dispatch of to-day's date says: What the police consider a very important arrest was made yesterday afternoon by Detective Stearns. As a matter of fact, two arrests were made. Early in the day Stearns picked up Samuel Spencer and locked him up at headquarters on a charge of vagrancy. Spencer will play an important part in the London murder case when Burke and Wilson are charged with the murder of Detective Phair. Later on in the evening Detectives Stearns and Burrows arrested another prisoner, Charles Henderson, who gave his name as 60 Jarvis. Henderson is also supposed to be a material witness in the case, and although the detectives observe the greatest reticence, it is thought that he is the lad who summoned Wilson from the hotel after Detective Phair had arrested Burke. The two prisoners are supposed to be boys who used to log and share the proceeds with Burke and Wilson. From information received, the detectives are of the opinion that Burke is an old-time criminal known as "Risco Jack." Last summer he shot a man at Cornwall, while attempting robbery. He escaped. On another occasion, in Oxford county, the boys were arrested for soliciting alms. Burke at the trial swore the prisoners were his sons, and he was admonished by the magistrate, who gave the boys 30 days each. Burke then fled, but the doors of the lock-up with an axe and set them free. The charge of jail-breaking is one placed against the names of the prisoners at headquarters. Burke served six months in the Central for theft committed in Woodstock in September, 1890. Last winter he was in the St. Vincent de Paul Penitentiary. He claims to be a veteran of the American war, and carries a bullet-wound in his leg, which he received, he says, in an engagement, but more likely in a burglary. He has been a child of fortune, and one time a mob at South Bend, Ind., had him dangling from a tree with a rope about his neck, but a posse of police arrived on the scene in time to save him from death. He bears the scar yet on his neck. Wilson hails from Montreal, where he is known as "Dublin" Wilson.

A beautiful floral pillow was received yesterday morning by the police from the detective department of the Toronto police force.

A HUNDRED MILES AN HOUR.

Or Master Mechanic Richards Will Give His New Locomotive a Try.

[Philadelphia Times.]

A working model of the record-breaking locomotive, invented and patented by Master Mechanic Jackson Richards, of the Reading Railroad, was placed on exhibition yesterday in the hall of the Builders' Exchange. A large number of engineers, locomotive experts, and others interested in the progress of railroads, visited the hall during the day.

Speaking of his invention, Mr. Richards said: "If the new engine I am about to construct for exhibition at the World's Fair at Chicago cannot make over 100 miles an hour I will give it away to the first person I meet. I do not claim that this will be the highest rate of speed it will be capable of making, for I believe the speed will be practically unlimited. By that I mean the engine will be capable of going much faster than anyone would care to travel. If the machine is successful, as I firmly believe it will be, it will revolutionize the entire construction of all the high-speed locomotives of the future. I have been working on this invention for over ten years, though the drawings were only completed about the 1st of September. At this time the patent was applied for, and as soon as it was granted I had the working model, now in the Builders' Exchange, made for the purpose of exhibiting it to the public."

The inventor will enable a gigantic stride to be taken in the matter of high-speed locomotives, and it is more than likely that the time between Philadelphia and New York will be decreased to less than an hour. I intend to make the first trip between the city and Chicago with the engine I will have built for the World's Fair.

"In outward appearance the new locomotive will not differ materially from the speedy ones now used by our company because this is the only one of its kind. The driving wheels will be a trifle larger, being six feet high in place of five feet eight inches, as at present, and the engine will weigh 50 tons, a small increase over the present weight. The peculiarity of construction lies in the fact that instead of the two cylinders, as now used, there will be four. One cylinder will be located on each side of the locomotive frame, as at present, and the other two will be cast on what is known as the cylinder saddle. The inside cylinders will be cast in one piece, and will be horizontal to the outside ones. The four cylinders will entirely overcome what is known to engineers as the dead center, and the engine will be perfectly balanced without any counterbalance in the driving wheels. This latter improvement will be the means of saving from 50 to 50 per cent. of the present wear and tear on the roadbed, as it will do away with the vicious pounding which has proved so destructive to modern roadbeds."

The engine will glide smoothly and easily along, and there will not be any of the sudden starts and jerks so noticeable in those of the present time. These are specially noticeable in the starting, when it is necessary to reverse the engine before a start can be made. In my invention, owing to the perfect balance, this will not be necessary, the engine starting forward as soon as the valve is opened.

"You can see how smoothly and easily the engine works by the model. This, though it has been running 100 miles an hour for over a day, and though it is placed on a movable support without any fasten-

Coughs and Colds.

For Coughs, Colds, Bronchitis, Asthma, Whooping Cough, etc., try Cough, Tar and Tannin. One bottle will usually cure the most distressing cough. Sold in 25c bottles by all druggists.

ings whatever, has not shifted during that time one-sixteenth of an inch from its first position.

"An easy way to describe my locomotive would be to say it is two engines consolidated into one, so adjusted that when the balance of one's driving wheel is on top that of the other is beneath, and vice versa."

DEDICATING THE FAIR.

Immense Demonstration and Procession.

Vice-President Morton Makes the Inaugural Speech—A Chorus of 5,000 Voices—25,000 Troops in Line.

CHICAGO, Oct. 21.—In the presence of 100,000, and amid the echoes of the largest chorus assembled in the city of modern times, the World's Columbian Exposition was formally dedicated to-day by the dignitaries of the nation.

The scene presented by the vast gathering in the dedication building was one never to be forgotten. In many respects it was without precedent. The dedication hall—the manufacturers' and liberal arts building—is the largest structure ever erected, and in it was gathered the largest crowd ever assembled beneath a single roof. In the audience were probably more distinguished Americans than have ever been seen together on any commemorative occasion in the history of the Republic.

Michigan avenue, from the Auditorium to Myrtle street, was fringed on the curbs as early as 7 o'clock. At 9 o'clock the guests entered their carriages and the artillerymen and the mounted escorts taking up their march of attendance.

Behind the Vice-President party rode the members of President Harrison's Cabinet.

After these trailed an immense string of carriages, containing the diplomatic representatives of different nations, the judges of the Supreme Bench of the United States, members of Congress, representatives of the army and navy, governors and their staffs of the States and Territories, orators and chaplains, commissioners at the World's Columbian Exposition, consuls from foreign powers, Columbian officials, women representatives of the original States of the Federal Union and aldermen of Chicago.

The show of troops was not imposing and massed in review they numbered 15,000 men.

A feature of the occasion was the grand dedicatory chorus of 5,500 voices who sang the dedication ode, the effect of which, however, in the vast manufacturers building of 40 acres, floor space, was not so overwhelming as might have been supposed.

Vice-President Morton delivered an eloquent inaugural address.

To-night the dedicatory exercises closed with the most gorgeous display of fireworks ever given in the world. This display was given in Washington Park on the south side, Garfield Park on the west side, and Lincoln Park on the north. It is estimated that no less than 200,000 people saw each of these displays. The programmes were the same in each place. One of the crowning features of the magnificent display was the flight of 15,000 rockets, 8,000 at the same moment from each of the three parks. This is the largest flight of rockets ever known.

CHICAGO, Ill., Oct. 22.—There will be no military parade to-day. The reasons given were the refusal of Gen. Scofield to allow the United States soldiers to stay in Chicago and the inability of many of the State troops to stay over another day.

WORK AND WAGES.

LOWELL, Mass., Oct. 22.—After a long meeting last night the cotton spinners postponed the matter of a strike, pending further conference with the officials of the Lawrence Manufacturing Company.

Going Home. The temporary swelling in the city's population has been greatly reduced to-day by the departure of some of nearly all the 800 C. E. delegates. A special car was attached to the C. P. R. train 8 a.m. for the accommodation of those going east. The 2:10 p.m. G. T. R. for the east carried two extra carsloads of the young people and the Huron and Bruce took many northward. A number of the visitors will remain over Sunday.

Hard to Take

In, are most newspaper advertisements, and as we don't want you to class C. E. C. on the market we tell you less than the truth, so that what we do say may be believed.

Our friends, though, find fault with us, and say

COTTAM'S WASHING COMPOUND is "head and shoulders" above all others. You see, dear public, how embarrassed we are.

COTTAM'S WASHING COMPOUND
