Boston Correspondence.

Dorchester, June 3rd, 1886.
Mr. Munro.—I have been clipping some items from various papers, and make a piece of journalistic patchwork, so to speak, for the Monitor, and here you have the result, though I fear you will call it a kind of crazy quilt.

First, with regard to the strike, which as far as Boston is concerned, has ended, as your readers are aware, in the utter defeat of the workmen. Though that has ever been the history of the average strike, the one just closed had some peculiar features, which showed that the workmen are stronger and more thoroughly organized now than ever before, and showed too that they are capable of conducting themselves even during a strike in such a manner, as to gain the respect of all parties. The influence of Terence V. Powderly, leader of the Knights of Labor, in urging moderation, and condemning violence, is no doubt having a beneficial effect on all laborers' unions. He is proving himself the "grand man" of the workingmen's party.

Read the following sentences from one of his addresses to the Knights of Labor:—
I hate the word boycott. I was boycotted years ago and could not get work at my trade for months. It is a bad practice. It is the hands of the capitalists. I have no use for it only when everything else fails. We have had enough of the hands of the capitalists. I have no use for it only when everything else fails. We have had enough of the hands of the capitalists.

People in this county who have friends or relatives living abroad, and are not over fond of letter writing, should send them a copy of the Monitor, which will keep them posted in the doings of the county and save a good many pages of writing. Mr. Munro.—We are told that we cannot hope to get the interest on the \$28,000,000 of public debt we must assume and raise the revenue that will be required for necessary expenses without resorting to direct taxation.
