S. S. PRINCE GEORGE, BOSTON AND YARMOUTH.

by far the finest and fastest steamers flying out of Boston, leave Yarmouth, N. S., daily except Sunday immediately on arrival of express and Bluenose trains from Halifax, arriving in Boston next morning. Returning, Prince George and Boston leave Long Wharf, Boston, daily except Saturday at 2.00 p. m. The steamer Yarmouth on Tuesday and Friday leaves at 12.00 noon.

ST. JOHN AND DIGBY

ROYAL MAIL S. S. PRINCE RUPERT Daily Service (Sunday excepted.) Leaves St. John ... 7.45 a. m. Arrives in Digby ... 10.45 a. m. Leaves Digby same day after arrival express train from Halifax.

DIRECT SERVICE

NEW YORK-YARMOUTH.

Every five days S. S. PRINCE ARTHUR.

PARRSBORO-WOLFVILLE.

S. S. Prince makes daily trips, Sunday excepted, between Parrsboro and Wolfville calling at Kingsport in both directions.

Trains and steamers are run on "Standard Time"

P. GIFFENS, General Manager, Kentville.

Last Friday was the forty-seventh birthday of James A. Hennessey, Junior United States Senator from Indiana. As a boy he was a bootblack and newsboy. Recently a friend said to him: "Jim, how'd you get up there anyway? I remember when you used to shine my shoes, and I didn't see any senatorial possibilities sticking out on you then." He replied: "You saw me working and hustling, didn't you? That's the only way I can answer your question."

**AGRICULTURAL**

**Nova Scotia Crops**

Government of Nova Scotia  
Office of Agriculture  
Truro, N. S., July 26, 1907  
To the Hon. George H. Murray  
Provincial Secretary  
Halifax, N. S.

Sir:—I have the honor to submit the returns received at this office, during the month of July, of the present stage and prospects of the Field and Orchard crops and of the condition of the live stock throughout the Province of Nova Scotia.

I have the honor, Sir, Your obedient servant,  
M. CUMMING,  
Secretary for Agriculture,  
SUMMER, 1907.

The spring of 1907 was one of the coldest and most protracted that has ever been experienced in Nova Scotia. As a result the crops are from one to two weeks later than those of last year, which, it will be remembered, were about ten days later than the average. This season, unlike that of last year, was free from excessive rain fall and afforded the farmers every opportunity to plant and sow all their crops. As a result, the area of land in cultivated crops is generally estimated at from 10 per cent to 25 per cent greater than last year. There were few injurious frosts during the spring, but the lack of rain fall and the cold weather greatly retarded vegetation. Even in the most forward sections little work was done on the land until the first week of May and throughout a great part of Nova Scotia much of the crop was not put in until June. The rain fall during June was light, but since the first of July there have been regular showers, the weather has been warm, and the conditions ideal for growth.

The statements made below represent the average of reports from 120 correspondents, representing every County of the Province, an average crop indicated by 100. The figures quoted give the relative yield for this year as compared with last year.

**HAY.**  
Estimated yield: Upland hay eighty five per cent. Marsh hay ninety per cent. Intervals may vary five per cent. As far as the writer's observations go, these figures seem a little high, still, they represent the estimate of, as stated above, a large number of correspondents. In the early part of the year it looked as if this crop would be a total failure. However, the ideal weather of the past few weeks has effected a marked improvement. There was considerable winter killing, especially in the older fields. In some sections the clover will be a total failure. Returns vary from a fifty per cent crop, stated by correspondents in parts of Cumberland, Colchester and Pictou, to a one hundred and twenty-five per cent crop estimated in Victoria and other Cape Breton Counties.

Generally fields that have been seeded down a number of years are more than usually infested with oxeye daisies and other weeds, and will produce a short crop. Well cultivated fields will for the most part be fully up to the average.

Throughout the greater part of the Province there is not a ton of alfalfa, a short crop. Well cultivated fields will show the yield came up to the highest expectation, there will be none too much for next winter's feed.

**POTATOES AND ROOT CROPS.**  
Estimated yield 105 per cent. Correspondents almost unanimously agree that this crop will be, at least on average, and the general estimate is above that. The average of these crops is, at least, 10 per cent more than last year. If present conditions are maintained, it is likely that the potato and root crop will be a record one. A number state that the potato bug is less prevalent than formerly.

**OATS AND OTHER GRAIN CROPS.**  
Estimated yield 105 per cent. While the crop is from two to three weeks later than average, yet the fields never had a more healthy color and were never more promising. The lowest estimate is 75 per cent and the highest 125 per cent. By far the majority look for, at least, 100 per cent or higher. There is also a 10 per cent increase in yield last year.

**CONDITION OF LIVE STOCK.**

Cattle and sheep were generally turned out sooner than they should have been and in rather thin condition. A shortage of winter feed made this imperative. Up to the middle of June they were in anything but good condition, but the excellent pastures since that time have wrought a great improvement. An increase in the number of Dairy cattle is reported in Colchester, Cumberland, Hants, Yarmouth and parts of Kings and Annapolis. An increase in beef cattle is quoted in parts of Cumberland, Hants and Kings. From 10 per cent to 25 per cent increase in sheep is quoted in Antigonish, Inverness, Victoria, Richmond and Queens Counties.

**FRUIT.**  
The fruit estimate is considerable above that of last year. None of the correspondents estimate less than a medium crop and quite a few look for a record yield. All agree in stating that the trees never looked more healthy or luxuriant. It is generally expected that the fruit will be larger and of better quality than usual. Although the period of blossoming was two weeks later than average, yet, owing to the favorable season, the fall fruit is almost as far forward as last year. Estimates from the different sections vary so much that they are presented in some detail below.

**Apples.**—Promising, cherries abundant. Granville Ferry, Granville and Upper Granville.—Three correspondents agree in estimating a light crop of apples, small fruits good. Roundhill and Tapperville.—Some orchards light yield; others a full crop. There will be at least an average crop in the district. The quality is exceptional.

**Cherries.**—Apples average, of large size and good quality; plums abundant, cherries scarce. St. Mary's.—Early prospect good, present prospect only medium, but excellent quality. Paradise.—Trees generally set only fairly well. Good set Ribston, Kings, Ironsides, Golden Russet, fair set of Nonpareil.

**Nectarines.**—Medium set, excellent quality; strawberries light, other small fruits average. St. Mary's.—Best crop of clean apples ever grown, other fruit satisfactory. Kingston.—Apples excellent, good quality. Appleford.—Apples, except early varieties, such as Gravensteins and August apples, set well and are maturing well.

**Berwick.**—One correspondent states: Apples never better, strawberries a failure, other small fruits medium. Another states the indications are for a medium crop (below first expectations) of excellent quality; cherries and plums abundant.

**Scott's Bay.**—Apples very promising. Port Williams.—Apples looking well, Baldwin's generally off. Gravensteins almost ditto, although good in some orchards; test caterpillars and canker worms very abundant. Wolfville.—Appearance of record crop of apples, plums scarce; other small fruit average. Gasperaux.—Fair crop; excellent quality.

**Windsor.**—Apples promising. Insect pests abundant. Newport Landing.—Apples average; Baldwin's off, plums light. Kemps.—Apples about 75 per cent crop; Baldwin's extra good. South Brookfield.—Prospects promising, except where spray has been neglected. Lunenburg County.—All but one correspondent regard the prospect for apples good, considerably above last year.

**Yarmouth County.**—Not more than half a crop. Other Counties.—Correspondents from other counties who report on the fruit yield, almost unanimously state that it will be considerably below average. Altogether it would appear that the apple crop for the Province will be considerably in excess of last year and the quality will be exceptionally good. There has been about a 10 per cent increase in the average of land set out to fruit trees.

**Famous Scott Act Case Closed**

The End of the Townshend Appeal Cases to the Privy Council Has Been Reached.

Mr. W. E. Roscoe, K. C., who has had the conduct of the proceedings on behalf of the prosecution in reference to litigation to quash proceedings under which a quantity of liquor of W. H. Townshend of this town was destroyed at Canning over a year ago, received a cablegram on Wednesday from London stating that the appeals of Townshend to the Privy Council had been dismissed with costs.

The result of this decision is to end litigation which has been in progress for more than a year and to declare valid the steps taken to confiscate the liquor which was destroyed under an order made by Justice Beakwith and Eaton.

A further result is that the suit brought by Mr. Townshend against the Magistrates Beakwith and Eaton is practically ended and a number of threatened actions against the people who took part in what is now called "the raid" at Kentville will not be brought and many plans for actions at law by the liquor party with which the temperance people of the county would have been harassed have gone quite astray.

Any other termination of these suits than what has taken place would have been an absolute calamity to the moral interests of the county at large as well as to the members of the Temperance Alliance, who had so energetically determined to put an end to the illegal traffic in intoxicating liquor in the county, who no doubt would have been worried by numerous suits for steps taken by them.—Kentville Advertiser.

**DIGEST YOUR FOOD**

**MOTHER SEICELS SYRUP.**

**HEADED FOR THE TOP.**

Businessness is the star accomplishment. It is the master-key that fits all locks of business requirements. I recently heard a good story about an office boy—my wife's tribute! He took the message to Garcia and got it there on time.

The boy was given a letter to be delivered to a man at his home that evening, and was told that it was very important that the man should have the letter before 8 o'clock. When he got there "Garcia" had gone out, and his family did not know where. The boy asked where he might possibly be and they couldn't even guess. Then he asked for the names of two or three of the man's most intimate friends. When these were given he made haste to the nearest telephone and explained the situation to one or two of the friends and got them to guess where he was. Then he telephoned to one of the guesses and found that Garcia had just been there but had gone out with the man of the house, and his family did not know where. But they made a good guess, which proved true. The boy got Garcia on the telephone at a clubhouse two miles away and explained that it was now three minutes to 8, and asked permission to tear open the letter and read it to him. The man agreed to, and received the information just in time to enable him to be present at an important meeting.

**REMEDY FOR DIARRHOEA, NEVER KNOWN TO FAIL.**

"I want to say a few words for Chamberlain's Colic, Cholera and Diarrhoea Remedy. I have used this preparation in my family for the past five years and have recommended it to a number of people in York county and have never known it to fail to effect a cure in any instance. I feel that I can not say too much for the best remedy of the kind in the world."—S. Jenison, Spring Grove, York county, Pa. This remedy is for sale by W. A. WARREN, Pharm. B.

To thank these gentlemen for their ready response to the questions submitted.

On behalf of the Department of Agriculture,  
M. CUMMING.

**DOUBLE YOUR PROFITS THE DAIRY**

If you have four or more milk cows and have no separator write at once for UP TO DATE DAIRYING

BOX 394,  
St. John, N. B.

**Take Notice.**

The old colored building over, W. A. Chute, is again in the field prepared to move and raise all classes of buildings floating stranded vessels, hoisting boilers or engines out of steamers. I will guarantee satisfaction and will meet all competition.
