

# Attention

IS the first military command, and why not call the Farmer's attention to the **Best Mowing Machine** in use, which is the **BRANTFORD**, with its Roller Bearings and all its latest improvements. Do not be misled by anyone saying that some other machine is just as good; because such is not the case. If you want information, ask a man that has used the Brantford, especially those sold in '97. The man that used the machine is the man to ask.

## Every Machine Warranted.

These machines are made by the Massey-Harris Co., the largest manufacturing firm of Farm Implements under the British flag.

Old Mowers taken in exchange for new ones.

A full line of **Hay Fork Machinery** on hand. Also a large stock of **Repairs.**
