

Miscellaneous.

Dr. Welch, at a meeting of the Association of American Physicians, stated that he had met with six cases of Addison's disease in which there was the characteristic tuberculous lesion of the adrenals. In one there was tuberculous disease of the vertebræ. In a negro pigmentation was discovered in the mouth

THE CREATOR KNOWS.—"Doctor," said the patient, "I believe there's something wrong with my stomach." "Not a bit of it," replied the doctor promptly. "God made your stomach and He knows how to make them. There's something wrong with the stuff you put in it, may be, and something wrong in the way you stuff it in and stamp it down, but your stomach is all right." And immediately the patient discharged him.—*Amer. Anal.*

AN EPIGRAM CONFIRMED.—Dr. W. E. Anthony, of Providence, R. I., writes as follows: "When I

was a medical student in 1865, I remember hearing Dr. Oliver Wendell Holmes, then Professor of Anatomy at Harvard College, say to his class: 'When you begin practice you will have twenty remedies for one disease, but after twenty years you will have twenty diseases for one remedy.' That prediction seems to be fulfilled in the use of antikaunnia, which seems to meet so many indications."

THE STATE AND THE "GOLD CURES."—It is not creditable to the intelligence of the people of Colorado nor to the discernment of certain of its law-makers, that there should be, as there now are, on the legislative calendar, two bills for the establishment of so-called "gold cures" for inebriety at the expense of the Commonwealth. One favours the original and shameless Keeley method, the others favours the imitation institution bearing the name of a religious mountebank who wears the livery of God in order to better serve Mammon. The two "cures" are, for the moment, fighting each other, because each desires sole possession of

The Elixir of Peptonate of Iron "Pizzala" is a chemical compound and not a mechanical mixture. It is the ONLY IRON MEDICINE WHICH IS READILY ABSORBED AND ASSIMILATED. Hundreds of testimonials of eminent physicians testify as to its great therapeutical value. Prof. Erb, of Heidelberg University, says: "You must be satisfied when I tell you that I make use of Pizzala's Elixir of Peptonate of Iron with my patients exceedingly often, and that I recommend it occasionally in my clinical lectures."

As many worthless imitations of this widely spread and highly recommended medicine have been attempted, Doctor, please prescribe it in the original bottles, containing half a pint, and bearing the firm name of the sole agents,
