

EXECUTIVE SUMMARY PREFACE

Working papers are the result of research work in progress, often intended for later publication by the Institute or another organization, and are regarded by the Institute for Peace and Security to be of immediate value for distribution in limited numbers--mostly to specialists in the field. Unlike all other Institute publications, Working Papers are published in the original language only.

The opinions expressed in this paper are those of the author and do not necessarily represent the views of the Institute or its Board of Directors.

Walter Dorn is the UN Representative of Science for Peace, a Canadian non-governmental organization. He is completing his Ph.D. with the Chemical Sensors Group at the University of Toronto. He holds an Institute for Peace and Security Barton Awards scholarship for studies in the field of international peace and security.
