JULY 10 1012

## **Toronto Hydro-Electric Power is Reliable**

You who use electricity for any purpose know what that means.

To the manufacturer it means power all t Full power-steady power. time.

To the householder it means light all the tim -bright, steady light.

Hydro-Electric is weatherproof power.

The transmission wires that bring Hydro-Electric power to Tor onto have been tested to 300,000 volts. They are fully protected. and none but the most extraordinary bolt of lightning could do them damage.

The machinery and equipment used to distribute Hydro-Electric power in the city is reliable. It is as near perfect as modern engineering skill can make it.

Hydro-Electric current is in itself an evidence that its production and distribution is of the most modern kind. Hydro-Electr comes to you in the most modern form -

## 25 "Cycle" Current

You who plan to buy a little electric motor to run the sewing machine fan to cool the office or home-or high power motors to drive machinery you should learn the significance of 25 CYCLE Power.

When you buy, get the best and newest motor procurable. Make sure t it is plainly marked "25 CYCLE," so it may be run with Hydro power.

DO NOT be misled by technical talk you do not understand into buy any other kind of electric motor or equipment.

Get our experts' advice if you are interested in knowing how Hydro power and motors marked
