BRITISH LABOR PARTY MAKES MANY DEMANDS

Wants Allies to Retire From Russia, Land Nationalization, State Controlled Rentals and Government Ownership of Public Utilities.

London, Nov. 30.—An election manifesto issued by the Labor party condemns any form of economic war and demands, as an essential part of the peace treaty, that the international labor charter be incorporated in the very structure of a league of free nations. It demands immediate withdrawal of the allied forces from Russia, immediate restoration of the workers' international, claims freedom for Ireland and India as a democratic right, also self-determination for British subject peoples and advocates the removal of all war-time restrictions and the complete abolition of conscription.

Land Reorganization.
The manifesto says the party means to introduce large schemes of land reorganization. It regards land nationalization as a vital necessity. It demands the immediate building of a million good houses by the state, which could be obtained by the tenants at fair rents and declares opposition to tariffs. It suggests international labor legislation whereby imports produced by sweating shall not enter into unfair competition with home manufactures. A special tax on capital is urged in payment of the war debt, and insistence is laid on the heavily graduated direct taxation with the raising of the exemption limit.

This is stated to be labor's definition of the conscription of wealth.
Public Ownership.
Immediate nationalization of mines, railways, shipping, armaments and electric power is also demanded in the manifesto as well as better pay and conditions. The Labor party claims to be the real women's party. It supports complete adult suffrage, equal pay for both sexes, deprecates the formation of a sex party. The manifesto is signed on behalf of the national executive of the Labor party by Messrs. J. McGurk, chairman; W. H. Hutchinson, vice-chairman; J. Ramsay MacDonald, treasurer; A. G. Cameron, J. R. Clines, C. T. Cramp, P. W. Jowett, W. F. Purdy, T. Richards, W. C. Robinson, Ben Turner, Sidney Webb, James Wiggall, Robert Williams and W. Harris.

President Poincare, in replying, said that France had seized joyfully the occasion to testify to the King her sentiments of true friendship towards the United Kingdom.
"France," continued the president, "will be devoted as much in peace as in war to the cordial alliance which enabled the overthrow of German imperialism, the defence of human rights and the salvation of liberty."

LABOR DELEGATES MEET IN PARIS

International Conference Expects to Unofficially Aid Peace Movement.

Washington, Nov. 30.—Delegates of the American Federation of Labor to the international labor conference, to be held at Paris while the great peace conference were sitting, were announced today by the executive council. They are: Samuel Gompers, president of the federation; Wm. Green, secretary-treasurer of the United Mine Workers; John R. Alpine, president of the plumbers; James Duncan, president of the International Association of Granite Cutters; Frank Duffy, secretary-treasurer United Brotherhood of Carpenters and Joiners.
Frank Morrison, secretary of the federation, said the purpose of the international conference "is to help in peace discussions and to establish a new international trade union federation." The executive council of the federation, he said, would issue invitations to the trade organizations of all nations to participate, and he added that representatives of all the principal nations were expected to attend.
Altho Mr. Morrison declined to discuss the matter it is understood that the conference proposes to make its information and views available to the peace delegates, who may, if they see fit, consult unofficially with the conference or with individual delegates composing it, on matters in which labor is vitally concerned.
Out of the Paris conference labor leaders expect will come the establishment of an international federation of labor, with subsidiaries in every mercantile and manufacturing country in the world, which will unite workers of the entire globe in the same manner as that of American and Canadian workmen.

Ottawa, Dec. 1.—Removal of all restrictions on the retail sale of gasoline is announced by the fuel controller. Dealers may therefore continue to do business as in the past. The recent regulations were adopted following upon an investigation and report by Dr. McFall of the cost of living branch of the department of labor.
Since then a further investigation and report has been made and submitted by him, and as the conditions which necessitated regulation of the gasoline trade have now been relieved by the practical cessation of the war, an order-in-council has been passed on the fuel controller's recommendation, entirely annulling the present regulations. Dealers may now sell gasoline without license from the fuel controller, and the fees already paid will be returned to the applicants. The repeal of the regulations in question also removes the restrictions regarding the sale of gasoline on Sunday.

NEW FUEL IS CHEAPER THAN GAS

The Washington War Office Officials' Invention a Success.

Washington, Nov. 30.—"Liberty fuel," vastly cheaper than gasoline and possessing many advantages over that product, has been invented by officers of the war department and is now being produced in large quantities, it became known today.
The new fuel is the result of more than 500 experiments conducted by Major O. Zimmerman and Captain E. C. Weinberger of the research and development divisions of the general engineering depot here.
The base of the new oil is kerosene, Major Zimmerman said. The other ingredients are of low cost, and can readily be obtained. The process of manufacture is exceedingly simple. The tests, which proved conclusively the value of "liberty fuel," have been most exact and rigid. They were conducted under the supervision of the bureau of standards here.
"That no leaf was left unturned to test its practical suitability is shown by the fact that the fuel was used extensively in automobiles, motorcycles, trucks, tractors, stationary engines and hydro-airplanes, in cold and warm weather, under violent variations of load, with poor and good operators," said Major Zimmerman.
Arrangements had been made for quantity production before the armistice, much of which would have gone to the forces abroad.
The new fuel is odorless, tasteless and non-corrosive. Tests for corrosion were made in a motorcylinder that covered 23,000 miles of variable operation. It leaves less residue of carbon than gasoline, requires less air or oxygen for combustion and develops greater horse power.
