World Office, Friday Evening, Feb. 22.

An almost awe thispiring movement in the Deminion Coal and Dominion Steel shares was the bigsthing in Canadian markets today. Whether speculators who usually give their interest toother New York market, formed a sudden impulse to become nosessed of some of the Nova Scotla industrial shares owing to the closing of Wallstreet, or whether the Ansiders of these particular issues thought the occasion a good one to advertise on and put their specialties up rumor did not disclose to day. Maffice it to say that Coal common moved up about 4 points and Dominion Steel preferred almost a like amount. The way the altrance was engineered would indicate that the stocks are scarce, and doubtless they are in the ordinary market. World Office, abrance was engineered would indicate that the stocks are scarce, and doubtless they are in the ordinary investors' hands, who have grown weary of aursing such expensive luxuries. Another theory suggested for the rise was that it was sympacthetic with Nova Scotia Steel. A few we'ks hence may reveal the actual incentive. The Tero to exchange to day had the now recognized dull tings to the business. Except for the instances noted above there was very little change in prices or quotations. Whinipeg Railway shares advanced 1½ points on the smallest kind of trading, and the price of this security seems to be able, to be marked to any kind of figure at the will of the owners. Some of the investment issues sold lower, owing to present light degrand for these as for other securities.

It is expected that the shipments of the cominion Coal Company for February will 75,000 tons ahead of January.—Mining Frank P. Wood of the firm of Baillia. Wood & Croft, has returned from a trip to Europe.

The Prairie Cattle Company announce that the surplus realized from the sale of land on the Canadian division was £3018, A dividend of 5 per cent, on the ordinary shares was recommended.

A low, which has resulted in a fight for control, has developed in the Havana Electric Railway Company, a concern which has many Canadian shareholders, and whose steeks are listed on the Toronto and Montreal exchanges. It is argued by a substantial element of the stockholders that the steek is entitled to much larger dividents that here has been a loose administration, Dividonds at the rate of 4 per cent, are paid on the preferred stock and nothing on the common.

Tokio, Feb. 22.—The fall in rice in the stock market which has persisted for a week past, was accentuated to day when quarters to the session held by the committee of the House of Peers yesterday to hear explanations regarding the budget from members of the government. The relapse is also regarded as recognition of the fact that it is time to call a halt of the mania for speculation and the promotion of new companies which has prevailed for months past.

Civil Authorities of Devonport Refuse to Attend Function. Devonport, Tng., Feb. 22.-The great new Keyham docks, which complete the most important naval dock yards scheme of the British empire, were opened yesterday by the Prince of Wales

with considerable ceremony. The large gathering of warships sent here in honor of the occasion were dressed with bunting and the harbor was gay with flags.
Disagreements between the naval and civilian authorities regarding the latter's participation in the ceremonies resulted in a notable absence of general decorations ashore, and caused the mayor and corporation to re-

fuse to attend the function. ENGINEER SERIOUSLY HURT.

Sarnia, Feb. 22.—Engineer Joseph Daniels met with a serious accident last night. He was bringing a westbound freight train into the tunnel yards and had his head out of the cab window when it came in contact with a small shanty, the force of which pulled him thru the window and he fell within a foot's distance of the wheels of the train. The fireman brought the train to a standstill. Daniels was found unconscious. By ncon to-day he was in a partially conscious condition, and there is some hope of recovery.
