BERLIN, Feb. 10.—Emperor William is so incensed at the Spiritualistic movement in Germany that he has issued a notification through the North German Gasette, that all persons in any way connected with Spiritualists, Faith Healers, Christian Scientists, or kindred cults, will hereafter be rigidly excluded from the imperial court.

The evening papers today print further details regarding Emperor William's talk about Christian Science. Herr von Windheim says he found his majesty thoroughly informed about the matter. The emperor expressed strong disapprobation with prayer healing, but agreed that Herr von Windheim must make no martyrs.

The emperor expressed strong disapprobation with prayer healing, but agreed that Herr von Windheim must make no marityrs.

The North German Gazette says Emperor William gave it to be plainly understood that he believes Christian Science, etc., should be rigidly excluded from the court.

The German followers of the American Christian Science community in Berlin number about 200 persons.

"Eddyism," as Christian Science is called here, is the sensation of the moment. The comic papers caricature it, the weighty religious periodicals marshal polemies against it, and the daily press prints much descriptive in the court in the United States." Emperor William give in the has in the united States." Emperor William intends to take energetic measures against it, and the daily press prints much descriptive in Berlin. A recent census showed that 476 persons here were living by quackery.

SMALLPOX AT LYNNFIELD.

There are no new developments in the smallpox situation at Lynnfield, Charlotte county, N. B., and the residents are confident that there will be no spread of the disease. St. Stephen and Calais citizens are feeling more hopeful as the prospects of possible infection from that direction are growing less daily. The precautions against the introduction of the disease are still being kept up, however, but the work of the bridge guards is not particularly arduous.

BRIDE'S AWFUL MISHAP.

Says the Springhill Advertiser; "A wedding was to have taken place in a neighboring town Monday, but had to be postponed on account of a mishap. The bride's dress of light fawn and a bottle of blue-black ink got badly mixed and the absence of another outfit caused the postponement of the ceremony."

In China the year begins in February.

A HEROIC REMEDY.

startling Statement Made at a Meet-ing of the Chicago Federation of Labor.

OHICAGO III Feb 6-"A hould be dragged out and shot v should be dragged out and shot when he has reached the age of 45. He has outlived his usefulness. He is dead timber in the pathway of progress under modera industrial conditions. I suggest that a law be drafted and submitted to the legislature for passage which shall provide that all persons be shot at the age of 45 years unless they can show that they have enough property saved up to keep them during the rest of their natural lives."

This is the way: the serious question of an age limit for mechanics and laborers was put by one of the speakers at the meeting of the Chicago Federation of Labor Monday afternoon. It was said that some of the rairoad companies and large maunfacturing establishments now refuse to hire a man more than 35 years old, and that mechanics are discharged when 45 years old because they are too old.

Machinists, carpenters and men in all trades, testified that a similar age limit was being enforced by various classes of employers.

Robust men in the prime of life told of the subterfuges they were compelled to resort to in securing employment if a few gray hairs had made their aphe has reached the age of 45. He has

dyed their hair time and again to give the youthful look necessary to get work. Those who had a tinge of gray in their beards said they had to keep clean shaven faces to avoid detection of their age. Those who wore eye glasses said they were compelled to leave their glasses at home to hold their jobs. Delegates jumped to their feet to tell of instances where the best mechanics had been discharged in the prime of the feet of instances where the machinists trade, William F. Melican suggested shooting at the age of forty-five as a measure that would probably meet with the approval of the large employers. The question was considered of so much importance that it was made a special order of business for the next meeting of the Chicago Federation of Labor.

BOSTON, Feb. 6.—The Warren line officials in this city stated that the Boston office had no means of knowing how the cases developed on board, but that it was certain that only the crew was affected because the vessel carried no passengers. The steamer sailed on Jan. 21.

On her last trip to this port the Kansas was held up on Jan. 16, at quarantine with smallpox on beard. Capt. Waters reported that a few days out from Liverpool, a colored cattleman named Carter was found to be afflicted with the disease and was immediately isolated. He died when the vessel was about 300 miles from Boston and was immediately buried. Jos. W. Tarr, another cattleman, was stricken with the disease and was removed to the hospital on Galloupes is land. The steamer was thoroughly fumigated and all on board were vaccinated.

Smallpox broke out on board the Kansas shortly after she left Boston. The cases are about equally divided among the cattlemen and the crew. The steamer has been quarantined.

U. S. NAVY.

WASHINGTON, Feb. 10.—The new navyhas cost the United States \$99,805,925 for
construction and \$9,943,235 for repairs on
completed vessels. These figures were supplied in a statement forwarded to the senate
today by the secretary of the navy in response to a resolution adopted by the senate
in Feb., 1901, in addition to the expenditure made on vessels dow aftest there are
several ships in course of construction.
These include the Restucks and the Kear44,000,000 has been authorized, and the Illnois, Wisconsin and Alabama, on each of
which an expenditure of \$375,000 is authorized. There are also several smaller ivessels
in course of construction, which will bring
the total up to a considerable extent, when
the vessels are completed. The statement
covers the period from 1883 and begins with
the building of the Chicago, Atlanta and
Bouton.

Of the completed vessels the Oregon cost.
