

Saves Eggs

Dr. Price's Cream Baking Powder makes it possible to produce appetizing and wholesome cakes, muffins, corn bread, etc., with fewer eggs than are usually required.

In many recipes the number of eggs may be reduced and excellent results obtained by using an additional quantity of Dr. Price's Baking Powder, about a teaspoon, in place of each egg omitted. The following tested recipe is a practical illustration:

SPONGE CAKE

1 cup sugar
 1/2 cup water
 3 eggs
 2 teaspoons Dr. Price's Baking Powder
 1 cup flour
 1 teaspoon salt
 1/2 cup cold water
 1 teaspoon flavoring

DIRECTIONS: Boil sugar and water until syrup spins a thread and add to the stiffly beaten whites of eggs, beating until the mixture is cold. Sift together three times, the flour, salt and baking powder; beat yolks of eggs until thick; add a little at a time flour mixture and egg yolks alternately to white of egg mixture, stirring after each addition. Add 1/2 cup cold water and flavoring. Mix lightly and bake in moderate oven one hour.

The old method called for six eggs and no baking powder
