
Ropemakers

For the impregnation of hemp in order to impart greater durability to the rope.

Corporations and Municipalities

For block paving, kerbing, wooden sidewalks, etc.

NOTE—

This preservative is especially recommended for slat walks as the additional cost for dipping does not exceed the cost of one coat of paint which it takes the place of.

TO CORPORATIONS

The attention of Corporations is particularly drawn to the use of this preservative for wood kerbing, as the average life of the kerbing now impregnated is 7 years while impregnated with our Carbolite will increase the life of same to from 20 to 25 years.

FACILITIES

We have at our factory tanks where we can treat any kind of Lumber or Timber as long as 25 feet, or will supply our preservative by the gallon.
