

AFTER THE SHREDDER THE SHELLER

When you have had corn husked and the ears have become dry, it must be shelled to enable you to feed it, grind it, sow it, and use it in any other way you see fit. The Western Corn Sheller has two reputations to maintain, its own and the CASE. This is the Sheller the CASE Company puts on the market. It is strong, durable, and with capacity. If you need one write for our catalog covering the CASE Husker Shredder and the Western Corn Sheller. It will be sent free.
