# A Woman's Way

Who says a woman's part is only "watch and wait"?

True, a woman cannot shoulder a rifle and go to the front, but there is a way in which she can help and which is just as important. That way is in supporting the prosperity of Canada.

Women do the buying. A million of them in Canada are buying, every day, most of the necessities and luxuries for eight million people, expending and influencing the expenditure of perhaps a billion dollars

At present much of that expenditure goes for imported products.

Suppose it were all switched to Canadian-made goods. Think how many Canadian workmen would be kept busy supplying this enormous demand! Think what it would mean to Canadian industries! Think what an era of prosperity it would create!

This is a woman's way to help. To create pros-perity for Canada, to lay forever the spectre of un-employment, to create resources to carry on the war.

It's very easy too, just
