

Two Essentials to the Dairy Farmer A Cream Separator—A Silo

The Premier Cream Separator is made throughout in the largest and best equipped Separator works in the British Empire.

Simple in construction, easy to understand and operate. Square machine-cut gearing. All revolving parts enclosed. Skims cleanest—Lasts longest.

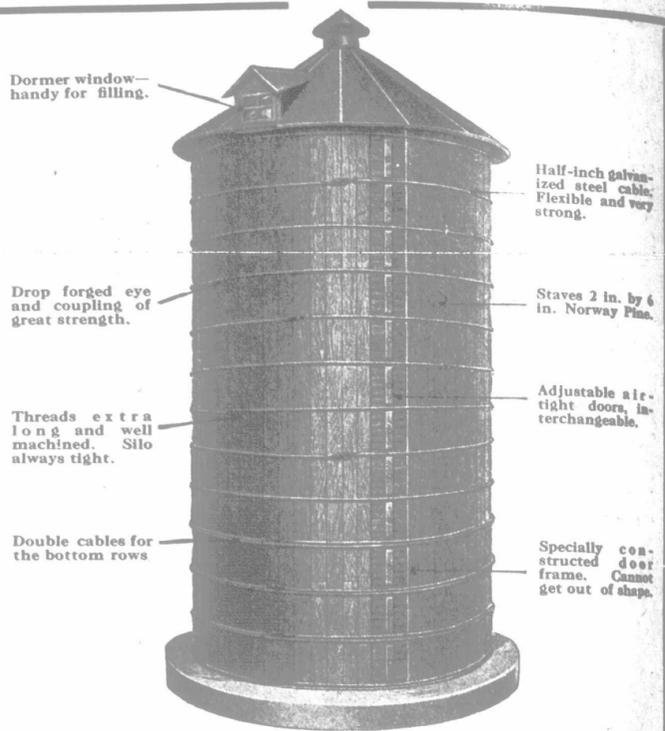

The Premier "Perfect" Silo represents the essence of 16 years experience in building Silos.

Selected Norway Pine is the only lumber used.

Easiest Silo to erect. The most satisfactory and convenient. Has the longest life.

THEIR SUCCESS IS BASED ON QUALITY

POWER ON THE FARM

The LISTER Gasoline Engine provides the most reliable, efficient and economical power for farm use.

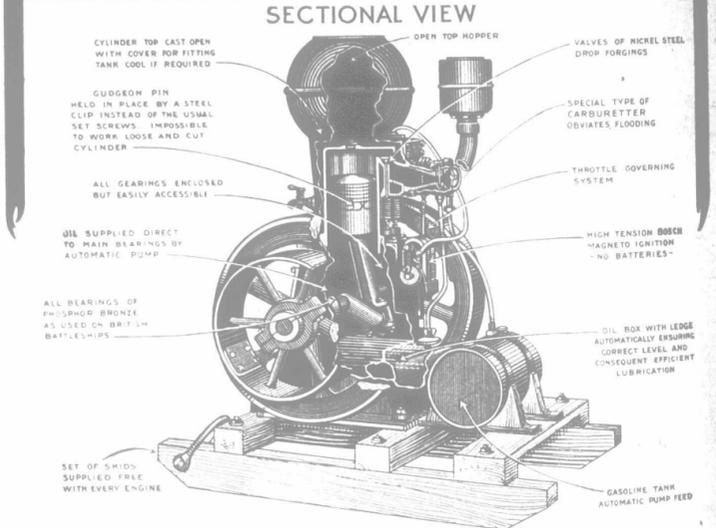

It will drive the grinder, separator, churn, washing machine, grindstone, saw, thresher, ensilage cutter; will fill the silo, pump water or generate electricity for lighting up the farm and outbuildings.

No technical skill is required to start, run or handle the Lister Engine. There is no battery to run down or get out of order, no outside oil holes to fill, no danger, no extra insurance. Ten thousand "LISTER" users will confirm this.

LISTER GASOLINE ENGINE

MILKING BY MACHINE

The LISTER WAY is the SANITARY WAY

Read this testimonial from an owner of 175 registered Jersey Cattle;—

R. A. Lister & Co., Ltd., Toronto Ont. Hillhurst, Quebec, Oct. 9th, 1914.
Dear Sir,—Some time ago we decided that in order to be in the front ranks as dairymen and to bring as far as possible the ingenuity of the great minds of our country to aid us in producing a clean, wholesome product, that we must have a mechanical milker. We investigated the different machines on the market and finally we were nearly two years deciding and then our attention was called to your milker by Mr. A. L. Dupuis, of Coaticook. After thoroughly investigating its merits, we decided it was the one we were looking for and that it was far in advance of the others. As the modern mowing machine excels the hand reaper, the harvester, the grain cradle, the model thresher, the hand flail, the modern cream separator, the old methods of raising cream by gravitation, so is your milker over the hand system.
We installed the Lister milker in our stables and are satisfied that we have the best. As proof, we won all first prizes at Canada's Great Eastern Exhibition with a higher score than we ever reached before, with butter made from milk drawn by your peerless milker.
Yours truly,
EDWARDS & ALEXANDER.
