Others complain that their business is suffering for want of stock ordered in ample time, but unduly detained in transmission. It is said by way of explanation that in order to ex-pedite delivery, the railway brought the delayed freight to Nakusp without breaking bulk, and sent the cars on to Sandon, and the delay is caused by the inability of the Kaslo & Slocan railway to forward to its destination because of railway to forward to its destination because of

So that notwithstanding his many good qualities of head and heart, it is scarcely to be expected that the people of this city would care favored points. Wherever the truth may lie, the fact remains that local interests are suffering. It is said that the Kaslo & Slocan railway management will take off the Sunday passenger train under the new arrangement of time tables to jeopardize their affairs and interests by elect-ing a chief magistrate who is confessedly incomwhen brought into force. Should this claim be con-sidered as it ought to be, these old timers be-lieve that there are liberals in the district who would fill the position with credit to themselves and benefit to the country at large, and of these none would be more worthy than Mr. J. Walker, of Rossland, purchased from Wilhelm Hansen. Since their return to Kaslo, Burnet and Hansen have located two fractional claims, the Silver Bell fraction and the Bear's Paw fraction, which, it is claimed, were developed by the survey of the Silver Bear. They have also conveyed, each to other, a one-half interest in the claim which was located in What Kaslo Has to Contend With.

They had recovered the body of Anderson and were conveying it along the trail when an other slide bore it away from them and carried it zoo or 300 feet down the mountain side, from whence it was not recovered until the following day. Edwards displayed the greatest pluck and fortitude in dragging himself toward the trail. He pulled himself up, inch by inch, over the snow without gloves or head covering, dragging his leg, which was dislocated at the hip, and was well nigh benumbed with cold when found. He is asid, however, never once to have lost his head during all histerrible experience. The dislocated leg has been set, but the ankle is also seriously sprimed if not broken.
