BALLONING —The mania for air navigation access to have become universal. The two ascensions of Measrs. Bizio and Barral, for seven ific purposes, and M. Poitevan's a sal excursion, with a pony, have been described in the papers at great length. Dr. Gale went up at Paria, with three other persons, and bad a successful wowage for five or six leagues. At London, Mr. Green d. siring to emulate the aspiring jockey of Paria, ascended with a poney weighing two hundred pounds; but before a magnificate we complaint of some benevotent person belonging to a society for the prevention of cruelty to animals. A physician testified that the vogage would not be likely to endanger either the life or the health of the poney, and in view of this testimony, Mr. Green was allowed to proceed.

Woman, was Rayous En.—The mind of woman is peculiarly constituted, and exquisitely adapted for influencing the finer parts of man's nature; and when the heart of man is dead to that influence, it is dead to almost every higher and puter feeling, which alone distinguishes him from the heasts of the forest. As good women are the beasts of the forest. As good women are respected by the men of the age, so may, from time to time, to time, be traced, by an unersing measure, the degree of civilization to which that age has attained. We do not mean by respect, the senseless adulation—the outward adulation displayed towards women during the middle ages, but a deeper, a more lasting, a more valuable kind of respect.

The good fruits of human life are the produce of mingled emiles and teats, as the fruits of the field require sunshine and rain. Lake without clouds there can be no rain; and without rain no fertility, so without sorrow there can be no tears, and without tears the heart would soon be berren.

An American paper says, "When you see a gentleman at midnight, sitting on the step, in front of his house, combing his hair with the door scraper, you may conclude he has been out at an evening party."

Canal AT THE SAULT ST. MARIE.— The American Senate has passed a bill making an ap-propriation of 500,000 acres of land towards the Canal AT THE SAULT ST. MARIE.— The American Senate has passed a bill making an appropriation of 500,000 acres of land towards the expense of cutting a canal at the Sault St. Marie, by which the whole of Lake Superior, with its wast mining regions, would be opened up to the shipping from the lower Lakes. The distance to be out is about a mile, and the lail to be overcome is only about 22 f-v!, the ground presenting no formidable difficulties in making the excavation. The completion of this work will necessarily facilitate the commerce and settlement of the Fax West, and the prospect of it adds another to the many reasons which already exist for the construction of a retiway from Toronto to Lake Huros.

A RAILBOAD ACCIDENT.—About 7 o'clock Sunday evening, as a locomotive belonging to the Harlem Railroad Company was backing down the track near 34th street, for the purpose of being attached to a train, a man named Richard Troy was intexted and staggered against the engine, and fell under the wheels, which partially passed over his leg and crashed it in a shocking manner. Several of his bones were fractured, and he was conveyed to the City Hospital.

is equally wrong in stating, that " Dr. Fulford comes accompanied by a Clerical Staff,"—not a single Clergyman, not even a Chaplain, having accompanied him from England. As to the "bridle upon his Clergy," we are not aware that they want to be "reined up," for to confinue the stable metaphor of our contemporary, we don't know that any of them are inclined to "jib" or "kick over the traces." As to "Convocations of the Clergy," the man is a donkey of the longest ears to imagine any such thing; we have 'lived some years in this country, and happen to belong to the Church of England, but we never yet heard of any such thing as a "Convocation of the Clergy" in this Diocese, or of any while demands a more than the provinces.—N. It is announced that the Ogdensburgh and Rouse's Point Road will be finished and ready for the passenger train from Rouse's Point to Ogdensburgh, before the first day of next month. Only thirteen miles of the whole road remain unfainabed, and the rail is being laid with despatch. For strength, workmanship, durability, and may grade for directness of road, superiority of construction, and aconomical oatlay, says the Ogdensburgh Beacon, perhaps there is no road in the United States surpasses it.
