At present there are 41 patients in the house for treatment. Miss McIntosh, who has been here for the past 18 months, is able to move

around on crutches.

Mr. E. C. Bulford is slowly improv

Mr. Oscar Gardiner of Lyn was recently operated upon by Dr. Cornell, surgically, and after a stay of ten weeks in the hospital has recovered sufficiently to be able to go home to-

day.
Mrs. Brownhill of Alexandria Bay, another of Dr. Cornell's surgical pa tients, has recovered, and returned home on Thursday last.

Mr. Hugh McKay, a switchman in the G.T.R. yard at Brockville, who had the misfortune to lose one of his legs by being run over by a train, is doing as well as circumstances will permit.

Mrs. Brown, who came from Toledo, Ohio, a distance of over 500 miles, to receive surgical treatment from Dr. Cornell, is able to be up and dressed.

The county council, which was in session last week, visited the house in a body, and after inspecting all the different parts they were so well pleased that they raised the annual grant \$50, making it \$350 this year. They were somewhat surprised to learn that of the 18 patients in the free ward only 3 belong to Brockville, the remaining 15 coming from the townships to be cured and provided for at the expense

Mr. Geo. Latimore of Lyndhurst is here, receiving treatment for a damaged

The balance sheet of the annual re port of the hospital this year shows a shortage of \$500 in the ordinary running expenses. Now, you ladies and gentlemen who have the means in your power, come and make this house visit and see the good work that is being done; then dip deep in your pockets and give liberally cause. By so doing you will be casting your bread on the water.

E. C. BULFORD.

NEW ONTARIO'S RESOURCES.

With the return of Messrs. G. R Gray and G. E. Sylvester, the last of the exploration parties sent out by the Ontario government into New Ontario has returned to civilization. The policy of the government in despatching these parties has been amply justified by the results. Northern Ontario is shown to be much richer in arable, timber and mineral lands than was at first supposed. There is now known to be millions of acres in the vast region to the north of absolutely virgin soil, with spruce suffcient to supply the world for many years to come. Of the exploration parties that were at work during the past season the most satisfactory report is made by that under Mr. Niven. This party started from near the 200th mile of Niven's boundary, between Algoma and Nippising, and proceeded due west for one hundred miles to the Missinabie river. The total area investigated was 7,800 square miles. Deducting about 1,800 square miles for water, it would leave about 6,000 square miles of land, of which 75 per cent. is clay land, splendidly timbered. In other words, tak ing only one section of country, the north of the height of land, explored by a single party, out of the ten, it reveals the existence millions of acres of land suitable for agriculture, and well timbered with spruce. Upon the value of the latter as a raw material for pulpwood, it is unnecessary to dilate. The expectation was that a great part of this land them. would be merely muskeg that would require to be drained before it could be cultivated. Experience shows that the soil is of good clay and needs only to be cleared of timber in order to become available for furning. At a point so far north there may perhaps be a doubt whether the summer is sufficiently long to permit grain to mature. But th experience at several Hudson Bay posts would seem to indicate the here was no room for doubt on this score. It is claimed that at several of the posts of the great fur company, even farther north than this, not only cereals but celery and goosberries, currants and other small fruits can be successfully When the substance of the reports of all the exploration parties has been collected and embodied in one volume, it will make an interesting count of the natural resources of Ontario's great north land.

A Temperance Gain.

Hereafter, no spirituous liquors, such as gin, whiskey, etc., must be offered for sale in any regimental canteen. General O'Grady-Haly has issued an order to this effect, carrying out the Queen's regulations. Heretofore no restraint has been placed on regimental canteens as to what is sold therein, but the new order of things will prove a great discomfort to certain Tommies who like their "drop and bitters." The queen's regulation and Gen. Roberts' idea of the "eternal fitness of things," are strikingly in accord, inasmch as they disapprove of serving of strong liquors among the soldiers. The reform brought about by Gen. O'Grady Haly will be Canadian temperanc appreciated by

PHILLIPSVILLE.

MONDAY, Nov. 26 .- Many of the farmers were very busy last week, trying to finish up their fall plowing, the heavy rains put them back very Most of the low land is to

W. Chast tile yard has been well patronized this fall by the farming comnunity. The farmers have come to the conclusion that they must drain their lands of the surplus water in or

der to secure good crops.

Threshing is nearly all done through this section and, with but very few ex ceptions, all kinds of grain have given a very large yield, oats in praticular, the yield of which was from 40 to 50 bushels per acre. Potatoes and core were good crops. We have heard bu very few of the farmers say that they have found any rotten potatoes.

There has been considerable improv ment in buildings here. J V. Phil lips has his stable about comp'eted, H. Putnam has erected a new stable, J W. Halladay has put up a large drive house, and Thomas Kennedy has put up a new kitchen and wood house Isaac Alguire has made considerable repairs on his farm buildings. Robert Godkin has his new residence nearly completed, and has moved into it, not a day too soon for the family have been greatly inconvenienced.

W. H. Earl is putting up some finnew fencing around his residence, and right here I might say that there are many miles of fence to be rebuilt in the spring, after the past week. John Downy said the roof on his cow barn would rise up with nearly every gust of wind and he expected it would take 'to the woods, but a few boards and shin gles repaired the damage.

Mrs. Niblock has been confined to her hed for some time, and is not ex pected to recover. It is thought sign annot last many days.

Mrs. Cameron is very poorly at he laughter's, Mrs. C. B. Davison.

Mrs. E. Brown is mending slowly from her accident. She has to be moved from place to place, not be ing able to move one of her legs.

Miss Agnes Kennedy is spending few days at home with her parents and

Miss Emmons of Harlem was the guest of her sister, Mrs. W. Greenwood, last week.

I see in most cases that the government or the municipalities have in spectors appointed to inspect government and other work. Now I think it high time to appoint an inspector over our highways, for there are many pieces of road repaired by some of the road overseers that are a disgrace to the community. For instance, we have found turnpikes raised from 3 to 5 feet above the bottom of the ditch and only wide enough on top for one team to pass over it at a time. And then, when it is wet, it is almost inpossible to keep a loaded wagon on top of the road. Just think of it-and

The elections are over, and among all the men spoken of as likely to be leader of the opposition, our own Geo. Taylor, member-elect for South Leeds, has not been mentioned. Why is it? While parliament is in session, this riding is flooded with the speechs of our own George. Yes, even when he is called down and has to take it back. And still there are many voters in this county who believe that our George

runs almost the whole government. The snow storm of Saturday night and Sunday has left the roads in bad shape,

ODD EFFECT OF MONEY.

Pay Day Makes Many Men Act Like

The cashier was in a communicative mood. It was pay day, and as he stood inside his little inclosure he congratulated himself upon the fact that his cash had balanced to a cent and that the pay envelopes were ready for delivery. He was talking to the old time reporter and re-

"It's strange how many staid men there are who become comedians on pay day. Just stand here 15 minutes and you will hear more genuine drivel to the square yard than you ever dreamed of before The old time reporter determined to in-estigate. The first man to approach was vestigate. The first man to approach was the moody chap who seemed to have trou-ble on his mind every day in the week.

But it was different on pay day.

"Hello, Cashley, old man," said he to
the cashier. "I heard that the institution was short of funds, so I thought I might as well hurry up and avoid the rush. Funny how these rumors circulate."

The next to approach was the dapper

little person who congratulates himself that the concern could not get along with-

What's this? Do my eyes deceive me?" he exclaimed as he perceived the hardest worker in the building drawing his envelope. "Are you still on the pay roll? Why, I thought the management had sized you up long ago."

Instead of standing around 15 minutes

and here are some of the specimens of wit, wisdom and humor that he heard drop from the lips of supposedly beings:
"Don't know what to do with this money, now that I have it," from the man who had been out of work for seven

months.
"What's this? Why, I was assured by the boss that I would find \$50 more in my envelope this week. He must have overlooked it." This from the individual who had been expecting dismissal for a

"Still paying off in gold, I see, in spite of the fact that you know I am not strong enough to carry it around with me chuckled the heavyweight of the estab "Just as soon as we organize our unio

we will have this money brought to our houses instead of being obliged to come after it," chimed the fellow who had been broke for five days.
"Well, I suppose I might as well take those salary checks and have them framed

as souvenirs," chuckled the young man who had drawn most of his salary in ad "Just stop to think," mused the cashier during a lull, "that I am obliged to stand here and listen to all this one day in each week, and still my friends wonde why I don't take in the vaudeville shows. To make matters worse, the management refuses to allow me to protect

A CURIOUS EXPERIMENT.

with gun or pistol.

It Can Be Performed at a Cost of a A curious experiment which any on

herewith explained: Buy an ounce of liquid sodium amal gam, a sheet of aluminium costing a few cents and about six inches of stout cop-per wire. With a file sharpen one end of the copper wire so as to give it the shape of a pencil. Rub off the surface of the aluminium plate with a knife just before beginning the experiment.

Dip the pointed end of the wire into

the amalgam and after removing it, covon the aluminium plate. Dip your wire into the amalgam from time to time just as if you were writing with pen and ink. Never mind the fact that your ink is a metal and that your pen seems to write nothing but scratches. Finish your work and then watch and see what happens. The lines just traced by your pen will suddenly assume a dull whitish tint, contrasting with the brightness of the metal.

Then they will rise above the metallic surface at the rate of about one inch an drawing will be in strong relief. may wipe out the white substance which has thus sprung from the metal, but it will develop again with the same vigor as would some kind of mushroom gifted

with the rather abnormal property of thriving on metallic ground. These white formations consist principally of alumina. The cause of their growth is the formation of an amalgam of aluminium in which that metal is in molecular state altogether different from that in which it exists in its coherent form. Although mercury has less affinity for oxygen than aluminium as soon as an alloy of the two metals is made aluminium loses its previous chemical inertia

and undergoes a slow combustion the product of which is alumina. Sodium plays no direct part in the reaction, yet without it I found it difficult to get the mercury to adhere to the alumini-um. Sodium facilitates also the adhesion of mercury to the copper wire. The be results are obtained in damp weather. It the air is dry at the moment of the experiment, results just as good will be obtained by breathing gently from time to time on the drawing, so as to slightly moisten the amalgam of aluminium.-Scientific American.

"Do you think that it's a man's duty to acknowledge always he is in the wron when he has a difference of opinion wit

"Well," answered Mr. Meekton reflect ively, "better late than never. But it really seems to me he ought to have had sufficient perception to know that he was in the wrong before there was any discus sion of the matter whatever."

He Wasn't Certain. "Did you," the landlady archly asked, "ever taste Belgian hare, Mr. Smyth-

gish taxidermists. "De man wif er bashful tongue," marked Uncle Ephe, "ain't always got er slow brain."—Colorado Springs Gazette. THE MURDERS AT RASTATT.

One of the Inexplicable Mysteries of

European History.

During February, 1829, Alexandre Gribojedoff, Russian minister to Teheran, was assassinated in a peculiarly horrible manner. The war between Russia and Persia, in which Russia had won the victory, had just ended, and Gribojedoff, who was a celebrated dramatic author, was sent as minister to the defeated country. No sooner did he reach Teherar than the clergy of the city urged the por gation and murdered him, as well as 36 other persons who formed part of his

Quickly the news spread to St. Peters burg, and the czar determined that Persia should pay heavily for the crime. A rigid investigation was at once started and when it was over 40 residents of Teheran were condemned to death and were duly executed and 30,000,000 rubles ty. That this was a wholesome lesson for Persia is proved by the fact that ever since then foreign ministers have been treated with marked respect in that coun-

A more remarkable occurrence was the murder of two French envoys, which took place at Rastatt in April, 1799. A congress had been in session in this little town for the purpose of settling the dif-ferences between France and Germany and Austria. So far as Germany was concerned, an amicable agreement arrived at, but France and Austria re mained at loggerheads, and consequently the French envoys, finding that they could accomplish nothing, resolved to return at once to Paris. They had arrang ed to leave Rastatt at noon, but for so unaccountable reason the gates of town were closed at that hour and were not reopened until late in the evening

Fearing nothing, the envoys and their retinue got into their eight coaches and drove off. Hardly had they gone a mile, however, when they were stopped by a troop of hussars, presumably Austrians, who ordered them to leave their car-riages. A conflict then ensued, in which two envoys, Bonnier and Roberjolt, were killed, while the third, Dubey, was so badly wounded that his life was despairbadly wounded that his life was despaired of for some time. After murdering the two envoys the hussars paid no further attention to the less important mem-bers of their retinue, but rode off, and from that day to this no one has been able to find out who was responsible for

the murders.

The Austrian cabinet has been blamed and so have French emigrants, the direct ory, England and Queen Caroline of Naples, but the requisite proof of guilt has not yet been found, and the general opinnot yet been found, and the general opin-ion is that the murders at Rastatt will remain one of the inexplicable mysteries of

THE COMMODORE'S CUE.

tion Wanted. In the early days of steamboating or

the Ohio river they had only stern wheel boats, and old Commodore McCullough of Cincinnati conceived a scheme to build and launch a palace "side wheeler" which would by grace of her beauty and size "run the stern wheelers out of the trade He carried his ideas to a successful and beautiful finish and sent her on her initial trip, and she came back \$800 loser.

The natives along the river would not ship on her nor would they ride on her 'couldn't see the wheel go round. So the Flora Belle made trip after trip, burning from \$800 to \$1,000 worth of coal and taking in perhaps \$200. The newspapers took it up, and it was street talk about what a "frost" the Flora Belle

was. Everybody from banker to boot black knew the tale. At this time the old National theater on Sycamore street was the bon ton theater of Cincinnati and its gallant men and lovely women thronged the performances. One night the commodore attended, and as he entered there was a series of nudgings and

The play was one of those "Bertha, the Sewing Machine Girl," dramas, with a "hyperbole" heroine, and there was one scene in which the lover proposed mar-

"No." said the heroine. "I can never be your wife, Harold. You are wealthy, you are a millionaire, while I am only a poor sewing girl. If I marry you, all my friends will say it was for your money, and I love you, darling, for yourself. Get rid of your money, my darling, and I will be your wife." And she made her exit in

The lover walked up and down the stage, wringing his hands.

"How," he cried, "how can I win her?

How can I get rid of my money?" That was the old commodore's cue. He rose up in the center of the parquet and modore's cue. He

"Buy the Flora Belle!"

A Webster Drink.

A writer in the Boston Jou :al says he ace had the pleasure of talking about the dedication of the Runker Hill monunent with the Rev. George E. Ellis, who

"What," asked the narrator, "was the most impressive feature of the day?"
"Well," said the gentle shepherd of the flock "I'm not sure that it wasn't what Webster did before we went up the hill. He remarked that he was thirsty, and invited him to the house of a friend of mine near by. 'What'll you have, Mr. Webster?' my friend inquired. 'l'll have me brandy, if it's no trouble,' said

Webster.
"And what do you think? He drank tumblerful right down! I never saw man do that before or since.'

The Polite Burglar, The rattling of silver spoons awakened the lady in the dead of night. "Who's there?" she cried, as she leaned over the balustrade and peered down into the darkness. "Who's there, and what are you doing?"

are you doing?"

The stranger in the dining room replied with startling candor, "Jimmy Dores, ma'am, at your service," and gathering as much of the latter as be could, fled hastily.

Paying For It. Client-Your fee is exorbitant. It didn't take you a day to do the work.

Lawyer-It is my regular fee. I am not charging you for time, but for the cost of my legal education. Client—Well, give me a receipt for the

cost of your education, so the next fellow won't have to pay for it too.-London

THE COOKBOOK.

Raisin bread, which is made like ordinary white bread, with the addition of one-half cupful of raisins to a small loaf, is appetizing for Sunday night supper, Fast boiling hardens the most tende meat, and the reason is this: Excessiv heat causes the albumen in the meat to become solid, so solid, indeed, that the heat cannot penetrate the interior.

It is not generally known that a layer of sliced onions placed on top of a roast of beef and allowed to cook there wil give a delicious flavor to the meat, while their distinctive flavor will not be notice
