Synopsis of Canadian Northwest Land Regulations.

Any person who is the sole head of a family, or any male over 18 years of age, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-agency for the district. Entry by proxy may be made at any agency, under certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

8 Duties: Six months' residence upon said cultivation of the land in each of three years. A homesteader may live within nine miles of his mes. on a farm of at least 80 acres, which is owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price \$3 per acre. Duties: Must reside upon the homestead or pre-emption six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead in certain districts. Price \$3 per acre. Duties: Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.

W. W. CORY,
Deputy of the Minister of the Interior.

Miss Luella Gillis of Metapedia Quebec, is visiting at present with her aunt, Mrs. J. Gillis. The lady came this week in Mr. E. Gillis' auto. She is a trained nurse and later expects to go to San Francisco where she will work in the St. Francis hospital—"Arcata Times", Arcata, California, U. S. A.

MARD ON FATHER.

Croquet Season Is Opened Again and Papa Knows.

As the croquet season is with us, notices it first when papa comes home from lodge. He slips in the side gate and walks across the lawn so as not to disturb the dog. He wears his way carefully toward the door where a light is dimly visible.

There is a slight knock on his door about four inches above his ear. He doesn't notice it.

"The next instant he is on his feet, his nose twitching, the vestibule of a flower bed, with his other hand he upsets a stand full of flower pots.

"What in the lovely, charming, pleasant and agreeable circumstances is this?" asks papa.

The dog bays a mournful answer to the moon. A window is opened and a sharp voice says:

"Come in the house, you fool, before you fall over another croquet wicket."

Then father knows the croquet season is on and he announces at breakfast next day that if Willie forgets to bring in the wickets at night he'll burn the damned outfit.

For the next few weeks the boys and girls come over and plant their wickets in the flower beds and play rover among the geraniums. In the evening, sometimes, pap will play a game with mamma just to square himself for the nights he goes to lodge.

THE KING'S THRONE.

Hard to Say Which is the Real Throne.

The King may be said to have a suite of thrones—or shall we say a set of "occasional thrones"—on each of which he probably sits at least once. Certainly he only sits on a single occasion upon one of them—that is the Coronation Chair in Westminster Abbey—the worm-eaten, battered, iron-footed old oak settee which contains the Stone of Destiny, and upon which all the King's predecessors since Edward II. have been crowned. That chair might, perhaps, claim to be the throne of the Empire, as it is infinitely the most ancient, and inasmuch as the King must sit upon it to be crowned.

It is not at all likely that the King would sit upon it often, even if it were in his "ain ingle-nook," because it is an extremely uncomfortable chair. It stands, year in and year out, in the chapel of Edward the Confessor, where it was first placed by Edward I. and it is only removed for the Coronation, when, covered with gold brocade, it is set under the lantern, between the choir and the altar.

Probably the throne most familiar to the public is the great creation which stands upon a dais in the House of Lords. It is often mentioned in the newspapers quite apart from the opening of Parliament—the only occasion upon which it is actually used as a seat. Often a phrase like "his occurrence," Mr. John Burns, who is greatly interested in this matter, and to the chair from the steps of the "throne." A beautiful rail separates this "Royal seat of Kings" from the faithful peers.

BRITISH STANDARD BEARER.

Lieutenant Harrison, the tallest officer in the British Army, will carry the standard of the Royal Horse Guards' Blue in the Coronation procession. The standard was presented to the Blues by King William on August 13th, 1831, Queen Adelaide's birthday. The last time it was carried was the first Jubilee of Queen Victoria, when the Queen went from Slough to Windsor.

AFRICANS LIKE UNIFORMS.

Much money is made out of cast-off police uniforms. Quantities are bought by African traders and exported to various parts of the "Dark Continent," where they are exchanged for palm-oil, ivory, skins, and other merchandise. It is by no means an uncommon sight to see a swartly savage dressed in the uniform of a policeman, and wearing the regulation helmet of the force.

Stories of the Prince of Wales.

Many quaint and amusing anecdotes are related of the Prince of Wales as a small child, one being that he and his sister and brothers were invited out to tea at some Court lady's house, and when the hour for departure came he could nowhere be found to say good-bye to his hostess. On investigation it was discovered that he had hurried downstairs alone to secure what he considered his proper place in the carriage.

It is also reported of him that, on his first attending afternoon church one Sunday, he remembered how often he had been told to thank his entertainers for their hospitality; so at this occasion he looked anxiously about for someone to be grateful to. The only person who came handy was the verger, who, rather to his discomfiture, had his hand grasped by the little prince, and was informed in a childish voice:

"Thank you so much for a very pleasant afternoon!"

Ben's Logic.

"Ben," said his friend, waking up from a reverie in which he had been gazing abstractedly at the shiny expanse of Ben's skating-rink-for-uses. "Is there nothing you could do for your baldness?"

"No," said he, "I'm only forty."

"No," said he, "I'm only forty."

"Fifteen years ago I was coming strong, and I tried lots of things. But about that time I Prince of Wales—Edward, you know, Prince of Wales—opened a new hospital, and I said to myself as soon as ever I saw him I'll hit his hat to 'em. Then, my lad, he can give it to me as a bad job, and save thy brass. If there was only 'at 'ud cure a bald head they'd be cured his."

John Jacob Astor was fine, so a shun in London for auto speeding. He's an Anglo-American now.

OPERATIONS AVOIDED

By Lydia E. Pinkham's Vegetable Compound

Bellevue, Que.—"Without Lydia E. Pinkham's Vegetable Compound I would not be alive. For five months I had painful and irregular periods and inflammation of the uterus. I suffered like a martyr and thought often of death. I consulted two doctors who could do nothing for me. I went to a hospital, and the best doctors said I must submit to an operation, because I had a tumor. I went back home weak and discouraged. One of my cousins advised me to take your Compound, as it had cured her. I did so and soon commenced to feel better, and my appetite came back with the first bottle. Now I feel no pain and am cured. Your remedy is deserving of praise."—Mrs. EMMA CHATEL, Valleyfield, Bellevue, Quebec.

Another Operation Avoided.

Poughkeepsie, N. Y.—"I run a sewing machine in a large factory and got all thumbs. I had to give up work for I could not stand the pains in my back. The doctor said I needed an operation for womb trouble but Lydia E. Pinkham's Vegetable Compound did more for me than the doctors did. I have gained five pounds. I hope that every one who is suffering from female trouble, nervousness and backache will take the Compound. I owe my thanks to Mrs. Pinkham. She is the working girl's friend for health, and all women who suffer should write to her and take her advice."—MISS TULLIS FLEWIG, 33 Jay St., Poughkeepsie, N. Y.

Thirty years of unparalleled success confirms the power of Lydia E. Pinkham's Vegetable Compound to cure female diseases.

On Saturday last while Dr. Pinault was coming down Gerard Street in his auto little Jenny Smith (9 years) ran on to the street from behind a bus running right into the automobile. The doctor swerved but the rear wheel caught the girl inflicting a nasty wound. She was immediately taken up into the machine and rushed to the doctors house where every care and attention was paid her, and she is now reported to be doing well. No blame can be attached as the occupant of the auto could not see the child hidden as she was behind the team.—Campbellton Graphic.

\$100 REWARD, \$100

The readers of this week's paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative power that they offer One Hundred Dollars for any case that fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO.,
Sold by all Druggists, etc.
Take Hall's Family Pills for constipation.

KINGS COUNTY GIRL DIES AT CAMPBELLTON

The many friends of Catherine Louise, daughter of Charles and Rebecca Reynolds, of Barnesville Kings county, will regret to hear the news of her death which took place at Campbellton Oct. 5th, morning, after a brief illness. She left here five weeks ago, enjoying the best of health and entered a hospital in Campbellton for the purpose of studying nursing. She was in the twentieth year of her age. In addition to her parents she is survived by three brothers and one sister. The news of her death came as a great shock to her friends.

We regret to announce the death of Miss Catherine Reynolds of Barnesville, King Co. who after two weeks illness of typhoid fever passed away on Monday last at the hospital here. Her friends have the sympathy of the entire community.

THE POWER OF SYMPATHY.

Mothers Too Often Form a Habit of Constant Reproof.

Although conscious of the power of sympathy, many loving but over-tired mothers not only forget to show affection but form a habit of constant reproof. Naturally enough, the children, unless exceptionally callous to their surroundings, become sulky and resentful. How can they realize that the nagging is an expression of anxious affection?

When Johnny comes rushing into the house full of excitement over some new play or new idea, and eager to tell his plans, such a mother exclaims, "How many times have I told you to wipe your feet before you open the door!" The energetic child, who is enthusiastic and hurt and wounded, he draws back into himself, and will not again expose himself to such a snub. He confides in her less and less as he grows older, and she wonders why.

There is sound psychology in the statement that if you believe a man is honest he will be honest; that if you trust a young man he will prove trustworthy; that if you praise a child he will deserve praise. Benjamin West's mother kissed her boy when he showed his drawings to her; and the boy, when grown to manhood, said that her kiss made a painter of him.

A RAVENOUS INDUSTRY.

How the Paper Makers Are Destroying the Forests of the United States.

The forests of the United States now cover 550,000,000 acres, or about one-fourth of the area of the country. Forests publicly owned contain one-fifth of all timber standing. The timber privately owned is not only four times that publicly owned but it is generally more valuable.

Forestry is not practiced on 70 per cent of the forests publicly owned and on less than 1 per cent of the forests privately owned, or on only 18 per cent of the total area of the forests.

The original forests of the United States contained timber in quantity and variety far beyond that upon any other area of similar size in the world. They covered 850,000,000 acres with a stand of not less than 5,200,000,000 board feet of merchantable timber, according to present standards of use. There were five great forest regions—the northern, the southern, the central, the Rocky Mountain and the Pacific.

The present rate of cutting is three times the annual growth of the forests of the United States. The great plains of the Lake States are nearing exhaustion and great inroads have been made upon the supply of valuable timber throughout all parts of the country.

The heavy demands for timber have been rapidly pushing the great centers of lumber industry towards the South and West. In consequence, the State of Washington has led for several years in lumber production, followed in order by Louisiana, Texas, Mississippi, Wisconsin and Arkansas. In 1908 the production of yellow pine lumber amounted to over 1,000,000,000 board feet; the Douglas fir of the Northwest held second place, with three and two-thirds billion feet; while white pine came third, with three and one-third billion feet.

The annual cut from the forests, including waste in logging and in manufacture, is 2,000,000,000 cubic feet of wood.

There is used in a normal year 90,000,000 cords of fire wood, 40,000,000 board feet of lumber, 118,000,000 bawn ties, 1,500,000,000 staves, over 122,000,000 sets of heading, nearly 100,000,000 barrel hoops, 3,000,000 cords of native pulp wood, 125,000,000 cubic feet of round mine timbers and 1,253,000 cords of wood for distillation.

In 1909 4,002,000 cords of wood were used in the manufacture of paper, of which 794,000 cords were imported from Canada. The demand for pulp wood is making a severe drain on the spruce forests, which furnish the principle supply. The Forest Service of the United States Department of Agriculture is conducting investigations to determine what other woods, such as scrub pine, white fir, tupelo and the like, can be successfully used.

A larger drain upon present resources is made by the demand for railroad ties, of which 122,754,000, equivalent to three and three-quarters billion board feet, were used in 1908. White oak, hitherto the chief source of supply, is not plentiful enough to meet this demand indefinitely, and in many parts of the country the supply of chestnut, cedar and cypress is dwindling; however, seasoning and treating methods are being found, largely through the work of the Forest Service, by which cheaper and more plentiful woods, such as lodgepole pine in the Northwest and loblolly pine in the South, are made fit for use as ties. Timber to the amount of two and one-half billion feet was used in 1907 for mine timbers. A great saving has been effected in the naval stores industry also largely through the work of the Forest Service, by the introduction of the so-called "cur system of turpentine" in place of the old destructive system of "boiling". The new systems insure a larger product of better quality and prolong the life of the loblolly pine forests upon which the industry depends.

BATHURST MAN REMEMBERS COLLEGE

J. H. Dunn Gives \$25,000 to Delahouise His Alma Mater.

Halifax, N. S. Oct. 3.—George S. Campbell of the shipping firm of G. S. Campbell & Co., who returned from England a day or two ago brought with him a cheque for \$25,000, a gift to Dalhousie university from J. H. Dunn, a loyal graduate of the college.

Mr. Dunn is a native of Bathurst, N. B., and spent three years at Dalhousie law school, then being admitted to the bar of Nova Scotia. After practicing here for some time he removed to Edmonton and later to England where he is now head of the banking firm of Dunn, Fisher & Company. Mr. Dunn recently gave \$100 for equipment of a biological laboratory at Dalhousie.

A WONDERFUL DISCOVERY

An eminent scientist, the other day, gave his opinion that the most wonderful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a thin layer of Zam-Buk is applied to a wound or sore, such injury is insured against blood poisoning. Not one species of microbe has been found that Zam-Buk does not kill!

Then again, as soon as Zam-Buk is applied to a sore, or a cut, or to skin disease, it stops the smarting. That is why children are such friends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this.

Again, as soon as Zam-Buk is applied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new healthy tissue is quickly formed. This forming of fresh healthy tissue from below is Zam-Buk's secret of healing the tissue thus formed is worked up to the surface and literally casts off the diseased tissue above it. This is why Zam-Buk cures are permanent.

Only the other day Mr. Marsh, of 101 Delorimier Ave., Montreal, called upon the Zam-Buk Company and told them that for over twenty-five years he had been a martyr to eczema.

His hands were at one time so covered with sores that he had to sleep in gloves. Four years ago Zam-Buk was introduced to him, and in a few months it cured him. Today—over three years after his cure of his disease he had for twenty-five years—he is still cured, and has had no trace of any return of the eczema!

All druggists sell Zam-Buk at 50c. box, or we will send free trial box if you send this advertisement and a 1c. stamp (to pay return postage). Address Zam-Buk Co., Toronto.

The only Baking Powder made from Royal Grape Cream of Tartar

WHAT ARE YOU DOING?

It has been felt from past events that the cause of temperance in this town must again be taken up and in the formation of the Bruce Memorial League the promoters have taken a step forward but so far have left all others behind.

In this great question you must be on one side or the other. To stand between two opinions is to ruin any cause no matter how good and it is the bounden duty of every man who has the good of the community at heart, to step boldly forward and say on which side he stands.

What are you doing? Are you willing to forward your name as a member of this league which carries with it the promise on your personal honor not to use intoxicating liquor and to discourage the use of it at all times, or by your silence do you prefer to be enrolled alongside those who say that Daniel J. Bruce was a martyr to the cause of temperance and he WOULD NOT BE THE LAST! What are you thinking about? Is it too difficult a question to answer off-hand? or are you in full sympathy with this dire evil, which would sweep all who stand in the way, crushing with relentless hate all who would dare stand up for their own opinion and brave all the force that this thing has behind it. Surely not! Out of all the men in Campbellton it is possible that there are

ONLY 3 who desire to say that they are on the side of temperance!

It was thought by the promoters of this league that there was a goodly number of temperance people in this town, but they have been woefully disappointed. Are your temperance principles only a cloak to cover other things? Are you ashamed of the course of temperance, or of the sneers of the other man, or will it interfere with other things you are tied up by?

Look at the matter squarely. There are over 1200 men of age in Campbellton and more than two-thirds of them voted for Local Option. Was this voting done for fun? If so there is more honor attached to the loyal one-third who voted for liquor and were honest about it, but for the poor puny vacillating majority "who would like and who would not like," who stand shivering afraid to make the plunge, the temperance question has no use. If there be any temperance men among you it is your duty to enroll your name on it is league thereby taking your stand on one side or the other, but without think and ponder. Has this great question to be shelved as is the case with everything in Campbellton? Is the public spirit so dead that even blood cannot awaken it?

THINK AND PONDER
(Campbellton Graphic)

SELLARVILLE

Sellarville, Oct. 2nd.—The death occurred Saturday evening of Ewart Howard infant son of Mr. and Mrs. Robt. Nichol age three months. The funeral was held today from their residence to Flat Lands cemetery. The pallbearers were Ewart Quins, George McLeod, Chesley Montgomery and Gordon McLeod, while Earl McLeod drove the remains. Our sympathy goes out to the bereaved parents in the loss of their bright little boy.
