LOAN OF C. P. RAILWAY OVER SUBSCRIBED

The Canadian Pacific twelve million dollar five per cent loan offered to the Canadian public was over-subscribed before the end of the day, and the lists were closed at 4 P. M. The National City Company, Ltd., Syndicate managers announced that interest in the loan was nationwide and that subscriptions had been received from every section of the country.

The result of the loan was a reassuring indication of the soundness of basic conditions throughout the country as well as an evidence of the confidence the investing public has in the future of the Canadian Pacific Railway. It has already been shown in the fact that during the past fifteen years Canadian investors have been steadily acquiring the company's common stock. The indications are that any of the bonds of this issue left in the hands of dealers will be quickly absorbed. It is felt here that the issue should enjoy as ready a market as government bonds.

July 22 and 23 have been definitely decided upon as the Banff Indian days. From now until that time, when they will set up their teepees in the town, the Stoney Indians will be busy brushing up on their equestrian feats, making bead souvenirs, and inventing stories of the good old days for the edification and education of the visitors to the Rocky Mountain resort on the days of all days. Indian day at Banff has become an institution of world-wide fame.

SMALL FRUITS FOR THE HOME GARDEN

A naturally well-drained loam is preferable for all small fruit plants. Heavier soils, however, if there is sufficient subsoil drainage to prevent an excess of stagnant ground water, will give good results. On the first type of soil planting may be done without ridging, but on the latter type it is better to ridge the soil slightly with the lowest part midway between the rows. The soil should be fertilized with a liberal application of stable manure, and plowed deeply. This should be done as soon as the ground is dry enough to work in the spring so that early planting, which is an important factor, may not be delayed.

Strawberries are set in rows four feet apart and twelve inches apart in the rows. Currants and gooseberries are set in rows five feet apart each way. Raspberries are set in rows six feet apart and one and one-half feet apart in the rows. Two year old plants of currants and gooseberries are the most satisfactory for planting. Care should be taken to keep

Painful Sciatica And Neuralgia

Caused by Starved Nerves Due to Weak, Watery Blood

People think of neuralgia as a pain in the head or face, but neuralgia may affect any nerve of the body. Different names are given to it when it affects certain nerves. Thus neuralgia of the sciatic nerve is called sciatica, but the character of the pain and the nature of the disease is the same, and the remedy to be effective, must be the same. The pain, whether it takes the form of sciatica or whether it affects the face and head, is caused by starved nerves. The blood which normally carries nourishment to the nerves, for some reason no longer does so and the excruciating pain you feel is the cry of the starved nerves for food. The reason why the blood fails to properly nourish the nerves is usually because the blood itself is weak and thin.

When you build up the impoverished blood with Dr. Williams' Pink Pills, you are attacking sciatica, neuralgia and kindred diseases at the root. As proof of the value of Dr. Williams' Pink Pills in cases of this kind we give the statement of Mrs. Marion Bell, Port Elgin Ont., who says:—"Some years ago I was attacked with sciatica in my leg and hip. The pain was excruciating and finally I was forced to go to bed. Apparently all the doctor could do was to give me drugs to dull the pain, as otherwise I found no relief. I had been in bed with the trouble for eight weeks when a lady who came to see me said that she had had a similar attack, and had only found relief through the use of Dr. Williams' Pink Pills. I decided at once to try this medicine, and before I had taken more than three boxes I found relief. I continued the use of the pills and under the treatment the pain left me. I was able to walk again, and have not since had the least return of the trouble. I feel that Dr. Williams' Pink Pills have been of such great benefit to me that I strongly urge similar sufferers to give them a fair trial."

If your dealer does not keep these pills you can get them by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brookville, Ont.

roots of the plants moist until planted, by giving protection to prevent them from drying out.

The strawberry may best be set by using a spade, thrusting it into the soil and pressing it sideways, and setting the plant with the roots spread fan-shape in the opening so made, then withdrawing the spade and pressing the earth firmly around the roots with the foot. The plant should be set so that the crown is level with the surface of the ground. Frequent hoeing and cultivating are necessary to keep down all weed growth until runners and new plants are formed, when they should remain undisturbed except to space the runners evenly about six inches apart. After this, careful hoeing around the plants will be necessary to prevent weed growth. It is wise to set out a new plantation every year as otherwise the plants become thick and poor crops result.

The only attention necessary to give the bush and cane fruits the first few years is to hoe and cultivate sufficiently to prevent grass and weeds from starting. If these are allowed to become established it is very difficult later to rid the plantation of them and they will seriously interfere with growth and the production of good fruit. The raspberries are confined to a row not more than one foot wide and about six inches between the canes. An application of 150 pounds of nitrate of soda and three pounds of acid phosphate per acre, applied in the early spring, should be given after these fruits come into bearing.

The Senator Dunlap strawberry is one of the best. The Victoria Black, and Fays Prolific Red are two of the best currants. The Herbert raspberry is one of the best, and Downing one of the best gooseberries.
