Caribou Licenses.

We observe that the Game and Inland Fishery Board proposes a radical change in the law relating to killing caribou. The Board proposes to make it illegal to hunt, kill or pursue Caribou in Newfoundland and the Labrador without a license. A person desirous of hunting caribou, if the change is effected, must take out one of the license prescribed. These licenses are of three kinds.

(1) A license to non-residents on a payment of \$50;
(2) A Householder's license to residents, issued free, but not to more than one member of a family or household in any season;
(3) A Resident Sportsman's License, issued on payment of \$5, but for the purposes of sport only and not for purposes of selling spoils of sport.

The Board justifies its recommendation on the grounds—
"The killing of Deer by the so called 'poor settlers' is virtually unregulated and unchecked, and hitherto there has been no protective or preventive supervision over the lumbering camps which are now so numerous in the interior of the Island. Whilst the Board have reason to believe that large quantities of Caribou meat are consumed in these camps, and that no limitation is enforced as to the number of Caribou killed for such consumption, they have no data upon which they could even base an estimate of the number of Caribou thus killed. It is of course the object of the contractor who has to feed the men in his camps to obtain the necessary food at the least possible expense."

Blowing Up Schooner.

For several months past the hull of the old schooner Newcombe has been sunk in the stream off Bowring's premises and the past two days diver J. Taylor has been down trying to blow her in pieces with dynamite. Heavy charges have been put in and to-day he increased them to 27 lbs. of the explosive and hopes thereby to rip her to pieces. The hull has been a nuisance to shipping and masters of craft will be pleased when it is disposed of.

BANKER HAS \$50 QTL.—The banker Gertrude, Capt. Walter Kennedy, arrived at Fortune a couple of days ago with 350 qtl. fish from the Banks. The vessel will now wait for a caplin baiting. She lost on the Banks two brothers named Slaney, and as men are hard to get she will fish for the rest of the season with one dory less than her full complement.

FINE MOTOR BOAT.—Mr. Jno. Ryan during the past winter built at his south side premises a fine motor boat to be used during the summer in towing his trap skiffs to and from the fishing ground. The boat is built on very graceful lines, goes at good speed and was launched last week. Mr. Ryan is an expert at this class of work and in years gone by built some of the fastest racers for the regatta on Quidi Vidi Lake.

The Dust Nuisance.

To-day the wind being high, clouds of dust were blown over the city to the great inconvenience of pedestrians as well as residents. That section of Water Street east from Shea & Co.'s premises is utterly neglected and rarely if ever is a sprinkler put on it. The dust is inches thick in that thoroughfare and the wind blows it in the faces of pedestrians there and spoils their clothing. Offices and stores must keep their windows closed or else have their books and papers covered with dust. The Council should occasionally have this place visited by the cars.

Police Court.

To-day two drunks were discharged. A case involving the use of threatening language to a man of a nearby outport, and an assault on a woman out of it, was postponed until Thursday next. There is also involved in these matters the right to the title of a piece of land.

A Horrible Death.

James Lethbridge, of Brooklyn, Goose Bay, B.B., was fatally injured at Grand Falls 6 o'clock last Tuesday morning. He was working in the "slasher" room where theunks are sawn up in short lengths for pulp making. A junk got caught in the saw and when he went to shove it underneath he lost his balance and fell across the saw. Both his legs were cut almost right off at the thighs. The employees working near him ran to his assistance. The boiling was thrown off in an instant and he was extricated. The company's doctor was called and found that life was still in him, but the flow of the vital fluid was so great that he could not possibly live long. He was tenderly removed on a stretcher to the hospital and everything possible was done for him. He recovered consciousness after stimulants had been administered and his wounds bound up. The hemorrhage was so great, however, that all hope of saving the poor fellow's life was given up early in the day. He passed away at 2.30, retaining consciousness up to the time of his death. The body was confined last night and sent home in charge of his brother by the express last night, and was put off at Port Blanford this morning to be sent to Blanford by the s.s. Dundee to-day. Deceased was 45 years old and leaves a wife and two children at Brooklyn. Magistrate Fitzgerald held an autopsy at Grand Falls last night and found the facts to be as above stated. The unfortunate man was in the employ of the A. D. Co. ever since the paper works were started and was highly esteemed by the company and fellow employees. He was a steady, sober and reliable workman.

First Rails Laid.

The first rails on the Trepassay branch were laid yesterday afternoon. The actual driving of the first spike was done by Mr. Godden. Just as the first ten rails were secured, His Grace Archbishop Howley came along in his carriage. He drove down to the spot and alighting from his vehicle went forward and took deep interest in the proceedings. Mr. Taylor, of the freight office, escorted His Grace over the locality and answered the questions which the Archbishop was so interested.

There is one source of supply of rubber that crude rubber men are likely to overlook, yet one that will wonderfully help in case of a short crop or too high a range of prices on the Amazon.

The world, not the tropical world, but the temperate zone, possesses several million pounds of Para rubber that will be shortly offered to the trade at from 50 to 70 cents a pound. There will be a steady offering of it for years to come and the supply will increase.

Its source is the wornout motor tire that goes to the reclaimers and is thoroughly 'recovered.' For five years past the tire manufacturers have been turning out tons of tires and paying a high price for raw material. This great accumulation of rubber is just beginning to come back and is of a grade that can be used in almost any line of work. Those who value 'ize' must reckon with this great invisible supply as well as with the visible. — From the 'India Rubber World.'

Season's Most Popular Books

GERTRUDE PAGE'S GREAT NOVEL.

WINDING PATHS.—In it the author has made special studies of three women characters, with the same vivid and entertaining skill, which has so graphically described the wild, fresh life of the Rhodessa Veldt.

THE KING OVER THE WATER.—J. H. MCCARTHY. A story that is full of stirring episodes; is also essentially a love story, the hero, a gallant Irish soldier, and heroine a wandering Princess.

MRS. THOMPSON.—W. B. MAXWELL. This is a purely realistic novel, in which the author traces step by step the life of a woman of strong character, temperament and emotions.

SOME HAPPENINGS OF GLEN-DALYNE.—D. CONYERS. The novel contains the fascinating mystery of a lost heir, who is found by the heroine, and her love story gives the book an additional interest.

MOLL O' THE TOLL BARD.—T. WILSON WILSON. A stirring tale of romance and ad-

venture in Cumberland during the rough starvation days of the Napoleonic Wars, when law and order in country districts was as the people made it.

ALL THE WORLD WANDERED.—L. MERRICK. For those whose interest in theatrical life goes deeper than its "make up" the value of his new book is not limited to the fact that it tells a bright and highly unconventional tale.

BURNING DAYLIGHT.—J. LONDON. Mr. London's work is always excellent, the characters one and all, have the breath of life. No reader who loves a good story will be disappointed.

JANE OGLANDER.—MRS. B. LOUGHER. This is a story of exceptional power and exceptional charm. It deals in rich emotional material with a fine, artistic restraint.

THE VOW.—PAUL TRENT. Is the thrilling story of a man who made as rash a vow as "Jephthah" and kept it, although it meant his exposure as a financier.
