(To be Continued.)

Winter is Coming.

Already the chilly days of Autumn are here, and you should not risk the chance of catching cold in a house where the fires die out, or where a great delay of time is necessary to start them on a frosty morning. A little Gas Heater, Gas Grate, or steam radiator will furnish you with just as much heat as you require, and just as little, by simply turning a tap.

We have Radiant Fires, Chili-Chasers, Set-In-Grates, Steam Radiators, and appliances to suit all requirements of the Home.

Salvaging Gold From Laurentic.

Portlaoine, Ireland.—(Correspondence of the Associated Press.)—Salvaging \$25,000,000 worth of gold ingots and bullion the White Star liner Laurentic is reported to have carried when she was sunk the night of January 25, 1917, off Paad Light, one of the northernmost headlands of Ireland at the entrance to Lough Swilly, is being conducted by the salvage ship Racer.

The princely cargo lay at a depth of twenty-two fathoms. The gold and bullion were contained in the strong chamber amidships rendered almost impregnable by its thick steel walls and heavily bolted doors. At first portions of the Laurentic's decks were blasted away and a passage was made clear for the divers. On June 20, the retrieving of the treasure began.

The first bucket sent up contained only copper pennies and a few silver coins. Then for several days, bucket after bucket containing three or more gold bars, each worth more than \$5,000, were hoisted to the surface and dumped on the deck of the Racer. The first of these bars brought lusty cheers from the crew of the salvage ship, but tossing fortunes about soon came to be merely another form of manual labor to these sailors.

Most of the gold bars were nine inches long, two inches thick and four inches wide and weighed about twenty-eight pounds. For days not one was found as many of them were hurled clear of the wreck by the blasting necessary to make the strong chamber accessible. Several feet of sand have now been washed over these scattered bars and each frequently requires hours of patient labor to pry them loose. The record day's haul so far had been forty-seven bars—worth approximately \$350,000. Thus far several million dollars worth of treasure has been salvaged.

The Racer carries eight divers. Their "tricks" are so arranged that one diver is at work throughout the day. Each works half an hour and then must spend thirty minutes in coming to the surface as otherwise the sudden relief from the tremendous deep-water pressure might cause partial or complete paralysis. They are brought up in ten-fathom "hauls," with ten minute "rest" intervals.

When the day's work is over, the day's "catch," if considerable, is despatched to London with an armed convoy.

When first built the Racer was a square-rigged man-o-war—one of the "wooden walls of England" as the ships of the British Navy at that time were known—a century ago.

THERE IS ONLY ONE GENUINE ASPIRIN

Only Tablets with "Bayer Cross" are Aspirin—No others!

If you don't see the "Bayer Cross" on the tablets, refuse them—they are not Aspirin at all. Your druggist gladly will give you the genuine "Bayer Tablets of Aspirin" because genuine Aspirin now is made by Americans and owned by an American Company.

There is not a cent's worth of German interest in Aspirin, all rights being purchased from the U. S. Government. During the war, acid imitations were sold as Aspirin in pill boxes and various other containers. But now you can get genuine Aspirin, plainly stamped with the safety "Bayer Cross." Aspirin proved safe by millions for Headache, Toothache, Earache, Rheumatism, Lumbago, Colds, Neuritis, and Pain generally. Handy tin boxes of 12 tablets—also larger "Bayer" packages.

Aspirin is the trade mark (Newfoundland Registration No. 781), of Bayer Manufacture of Monocacetic-acid of Salicylic acid.

The Bayer Co., Inc., U.S.A.

Our Book Column

(DICKS & CO.)

"America's Tomorrow."—(By Snell Smith). This book as the title shows is for Americans, by an American, about America. The authors ideas are very original and also very inaccurate. His knowledge of English history equals only his hatred of England. He states that the U.S.A. entered the Great War to help keep certain European kings and princes on their thrones a little while longer. In another part of this very interesting volume he speaks of the empty gaudiness of the Coronation of George V. "One can see through the gaudiness of the Coronation of George of England, with men in red plush knee breeches and the ladies-in-waiting resplendent with diamonds and precious jewels, the empty nothingness of such nations."

America has built up a powerful nation (out of all nationalities) abolished slavery (abolished first in England) subdued a savage race (the least said regards America's treatment of the Indians the better).

Mr. Smith's style is excellent, but his facts—

Grade Foundations Based on Producing Industries. This book is simply a pre-vocational textbook written by pre-vocational and vocation directors of various universities and colleges.

The book is dedicated to 'the boy on the fence' who is merely the boy about to leave school but who is unable to decide as to what career he shall take up. To him this book is most useful as it deals with work and tools and the average rate of pay of all trades. Of course to the boy who wants to take up a profession the book is useless as it merely treats of trades and not of professions.

We can safely recommend this book to the 'boy on the fence.'

B-H "English" PAINT

Think for a moment how much of the beauty of HOME consists of the cleanliness. Furniture, walls, floors, charm of a house among the trees—largely because of color and freshness. B-H "English" paints give permanent invulnerable protection against decay. Home is your haven and, in a sense, yourself. Protect it. Beautify it. "Better to Paint than Repair."
