

ASK CANDIDATES TO BARE LIQUOR VIEWS

Continued From Page One

the women's efficiency has tremendously increased.

"The work we have had to do and the problems we have had to face have greatly increased our strength," she said.

Departmental superintendents for provincial work were named as follows: Evangelical, Mrs. Blanche R. Johnston, Toronto; Canadianization, Mrs. Ethel Crow, Fergus; press, Mrs. Lottie Moore, Teeswater; travelers' aid, Dr. Sara Detweiler, Kitchener; prison and police, Mrs. Jones, Toronto; exhibitions and fairs, Mrs. John Cottam, London; Canadian marine, Mrs. Wilson Taylor, Toronto; work among Indians, Mrs. B. C. Ashcroft (Howden Vale), Mrs. Shuttles (Brantford); flower mission, Mrs. Ryerson Young, Ingleton; work among colored people, Mrs. Straith, Owen Sound; citizenship, Mrs. H. M. Dettlor, North Bay; anti-narcotics, Dr. M. F. Langton, Toronto; law enforcement, Mrs. Haddock, Ottawa, and Mrs. Atkinson of Hamilton; missionary work, Mrs. S. K. McGill, Glenora; Little White Ribbons, Mrs. F. L. Thurston, Hamilton; medical contests, Miss Annie Fry, Hamilton; Miss Edna Farley, Belleville; parlor meetings, Mrs. W. W. Wylie, Ottawa; railroad work, Mrs. Dooley, Ottawa; scientific temperance instruction, Mrs. J. M. Denyes, Milton; systematic giving, Mrs. Edmund Cole, Ottawa; temperance in Sabbath schools, Mrs. Ritchie (Arner), Mrs. J. Jones (London); convener of county president, Mrs. S. G. E. McKee, North Bay; moral education, Dr. Ellen Burt Sherratt, Toronto; soldiers and militia, Mrs. Asa Gordon, Ottawa; methods of work, Mrs. Hattie Stevens, Toronto; eastern "Y," secretary, Mrs. W. J. Webster, Lansdowne; western "Y," secretary, Mrs. Wm. Klingan, Hamilton; northern "Y," secretary, Miss Marjorie A. Arden, Goderich; convener of resolutions, Mrs. C. Cameron, Toronto; convener of plans work, Mrs. U. V. Miller, Napanee.

During the morning, Miss Nettie Jones of London rendered a solo.

President Mrs. Will Pugsley gave notice of motion that at the next meeting she will move that the name of the Loyal Temperance League be changed to the Junior Citizens Temperance League.

At this morning's session, Dr. Charles Trumbull of Philadelphia conducted a consecration service.

Mrs. T. Dooley of Ottawa presented a report on "Railroad Work," and Mrs. John Cottam of London the report on "Exhibitions and Fairs."

The report of the resolutions committee which will be presented at Friday's session of the annual meeting of the Ontario Women's Christian Temperance Union promises to be the most interesting of the whole convention. It is expected that the members will be urged to see that in the coming election the candidates they support are pledged absolutely to the support of prohibition.

Elect New Officers.

At the afternoon session Thursday officers were elected, as follows: President, Mrs. Will Pugsley, Toronto; vice-president, Mrs. W. T. G. Brown, Ottawa; recording secretary, Mrs. George Edgcombe, Stratford; corresponding secretary, Miss Maud McKee, North Bay; "Y" secretary, Miss Luella Leary, Quebec; treasurer, Mrs. H. O. Britton, Galt; secretary, L. T. L. secretary, Mrs. L. L. L. secretary, Hamilton.

Report of Flower Mission.

A report of the work of the flower mission, in charge of Mrs. Egerton R. Young of Ingleton, was read by the secretary.

Mrs. E. Wiley of Ottawa reported on the good results that have followed parlor meetings. She recommended that every union that has not taken up the work do so.

A report of the work being done for the Canadian marine was presented by the secretary, Miss Maud McKee.

Mrs. Blanche R. Johnston of Toronto, in giving the evangelistic report, pointed out that great progress has been made during the year.

"To many conditions along the border," she said, "had become intolerable, but now, as a result of the referendum, the situation has changed. Though there are still breaches of the act there is no such prevailing note of dismay in the report as there was last year, but instead a deep thankfulness for victory achieved through prayer, and one step further taken in the bringing in of the Kingdom of God."

President Mrs. Will Pugsley read the report of the work done by the Loyal Temperance League.

Sabbath School Report.

Mrs. H. Gray of Toronto reported on temperance and Sabbath school work. Much educational work is still required, she said, and will be required until world-wide prohibition is secured.

Mrs. John Jones of London, who is

in charge of Sunday school studies, gave a report on the work of her department. Continued educational work is essential among the young people, and will be until Dominion prohibition is effective.

Dr. Margaret Patterson of Toronto, reporting on "Health and Heredity," told of excellent work being done. Her report in part was as follows:

"Well Baby" Clinics.

"In several places the unions have given very material help in promoting 'well baby' clinics. The interest in health is so general and manifests itself in such practical form that one feels that at last the health conscience is making itself felt, and both statesmen and people are realizing that health is the basis of all enduring nationhood."

"Many years ago Dr. Parrell said the health of the people is the first duty of any statesman. Concern for public health is true patriotism; for it matters not how wealthy a nation may become, how great her cities, how vast the health of her people will rapidly perish and decay. Therefore, measures directed toward the preservation of human health must take precedence over all."

"These splendid sentiments are at last being put into practice. The number found to be physically unfit for military service because of their health is being remedied in childhood but had not been recognized, the many who were not properly developed because of malnutrition during the growing years, have led to the establishment of research laboratories to make a study of foods and their relation to growth. It has also led to the provision of inspection and health instruction in the schools, rural, as well as urban."

Governments See Need.

"Not only have governments recognized that the health of the people is a national asset, but they have become more active in their attempts to conserve health. Valuable work is being done by voluntary organizations, such as our own; indeed, it may be said that we have gone before and blazed the trail by educating public opinion so that it was easy for governments to follow."

"It is an accepted saying today that 'It is the right of every child to be just as healthy as knowledge can make it.' This knowledge must be spread so widely that it will reach every home and every parent or guardian of children."

"Who is in a better position than our members to scatter this knowledge and to demand that more adequate education on the care and function of the great human machine should be given in our schools? By our broad policy of co-operation with other voluntary organizations and with the governments we are doing very effective work in spreading the gospel of health and efficiency. As a health committee we must work with and stand by those teaching food values for proper nourishment is the basis of health and in these days of the world's best scholars are giving more attention to the problem of proper nourishment."

Herbert Hoover's View.

"Herbert Hoover expressed the sentiments of the most up-to-date reformer. 'The basis of all real child welfare work is health and physical development. The health of a child depends upon its receiving proper nourishment. Nothing else will properly nourish a child except milk and dairy products.'"

"From my observation of conditions, especially in rural communities, I feel that there are a great many children who are undernourished. They are not taking milk because no one knows its value or the life-long handicap under which they will suffer if they do not get this invaluable building material during the years when they are building up their bodies and constitutions. As women and home makers we are the guardians of the health of the people. 'Sisters of the world's best scholars have devoted themselves to a study of the best means of preserving health and attaining the most perfect development, both physically and mentally. It behooves us to give some time and attention to that they have found out for us in the scientific laboratory. As the light of research is turned on the problem of health and the interdependence of food and health, we realize the necessity of keeping abreast of these discoveries if we are to be true to the trust reposed in us of safeguarding the health of the people. Food is the basis of health, of life itself, and when we consider that one-third of all the money earned in the world is spent on food, surely it is a matter of national importance whether this money is spent wisely or now, in short whether it is spent for foods that feed or merely fill."

Milk a Necessary Food.

"Professor McCollum of Johns Hopkins University says: 'The people who have achieved, who have become large, strong and vigorous, who have reduced their infant mortality, who have the finest trades in the world, who have an appreciation of art, literature and music, who are leaders in science and every development of the human intellect, are the people who have used milk and its products liberally.'"

"As a people we are not using sufficient milk and dairy products for our own good. Another authority tells us that the most important factor in the gradual inauguration of a new regime over a period of fifteen years."

The long-awaited boundary line, according to an official communiqué, will follow the Oder River to Niechobitz, assigning 22 communes in this southern section to Germany, and 19 to Poland. The line is further traced in detail by the names of villages, the commune status in this more northern section Germany obtains 20 communes and Poland 21. North of Lissau the frontier will follow the old boundary line to the point where it joins that already fixed between Germany and Poland."

In order to insure the continuity of peaceful economic life in Upper Silesia after the partition, the council of ambassadors is urged to take measures looking toward German and Polish co-operation under the form of a general agreement.

SUFFERING FROM a fractured hip. Miss Martha Rogers, 87 years old, was admitted to Victoria Hospital at 3 o'clock Thursday night. Miss Rogers sustained her injuries when she fell down the cellar stairs at her home, 463 Central avenue.

conservation of health and child life, and this can only be done by education in regard to diet and health habits. Let us reach the parents and grown-ups as far as possible, but we can never reach them all. We can, however, through the schools reach all the children. Let us untidily insist, on proper graded instruction on health and food being taught in every public school, so that the children may be enabled to reach the highest state of development during the years when they are preparing for their life work, and by understanding the needs of the body, may be able to supply them, and thus retain their efficiency and usefulness over a longer period of life."

"A noted scientist has told us that as a people we could retain the characteristics of youth for at least fifteen years longer if we used more leafy vegetables and more milk. Now that we have banished the whiskey bottle let us introduce the milk bottle, and help to make of Canada the finest nation in the whole British Empire."

Urges Health Education.

"Let us create a desire for education in regard to health and the things necessary to maintain health. Awaken public opinion, so that the Government will be obliged to make provision for practical health teaching and follow up work throughout the country. Let us work with and through every organization that is doing health work, and above all let us be helped by distributing all the health publications gotten out by the Government, and uphold in every way we can the hands of those who are trying to conserve health."

"Let us work for the establishment of health centres, of well baby clinics, where mothers can have expert supervision and advice. Let us make it our slogan 'a baby book in every home and everyone interested in learning how to keep the human machine efficient.' Let us act on the splendid advice of Cardinal Gibbons: 'Expect great things of ourselves, our fellow women, our country and our God.'"

An appeal for support for the work being done among the lumbermen and shantymen was made by Thomas Joplin.

Mrs. Wright Speaks.

Mrs. Gordon Wright, the Dominion president, gave a brief address emphasizing the need of work among the foreigners. In Toronto one out of every ten of the population is a foreigner, she pointed out. The same percentage obtains in Montreal, and in Winnipeg it is higher, being one in three.

At luncheon on Thursday the delegates were given an official welcome on behalf of the chamber of commerce by Lieut.-Col. W. J. Brown of the Western University. During the afternoon they were taken for a motor ride about the city.

Worry is Black Sin.

Thursday night in St. Andrew's Church, Dr. Charles G. Trumbull of Philadelphia, editor of the School Times, gave an address on "The Victorious Life," emphasizing the idea that the Christian life is the victorious life, and makes for peace, joy and happiness. Worry, he declared, is a black sin, and a sin which makes God a liar if given way to, as all have His promise that He will take care of them. The gospel, he said, takes the worry out of life.

British War Hero Arrives in New York On Aquitania.

New York, Oct. 21.—Escorted by a squadron of United States destroyers which picked the liner Aquitania up before dawn off Ambrose lightship, Admiral Beatty of the British navy arrived here today as the guest of the American Legion.

The batteries of forts Hamilton and Wadsworth thundered a salute of 19 guns as the liner bearing the commander of the Grand Fleet during the war slipped past on her way to Quarantine. Admiral and Lady Beatty were greeted at Quarantine by United States naval and army officials and representatives of the American Legion and the state and municipal governments, and taken off on the navy cutter Vigilant.

The Vigilant was scheduled to land at the Battery shortly before noon when the visitors were to be escorted to City Hall to receive formal greetings from Governor Miller and Mayor Hylan.

During their stay in New York Admiral and Lady Beatty will be the guests of Mr. and Mrs. Marshall Field, hosts of the world's best scholars at the formal welcome, Admiral Beatty planned to remain incognito and will not attend any formal functions, until he starts for Washington on Sunday to pay his respects to President Harding and cabinet members.

From Washington Admiral and Lady Beatty will return to New York on Oct. 26. They will start for Chicago Oct. 28, going thence to Kansas City, where the American Legion convention, which the admiral is to address. After the convention Admiral Beatty will go to Washington, where he is to serve in an advisory capacity to the British delegation at the important conference.

Rear-Admiral Hugh Redman, who commanded the United States squadron as a unit of Admiral Beatty's Grand Fleet during the war, will act as official aide to the British sea hero during his stay here.

POLES AND GERMANS GET EQUAL SHARES OF SILESIA

Plebiscite Area Is Divided by League Council.

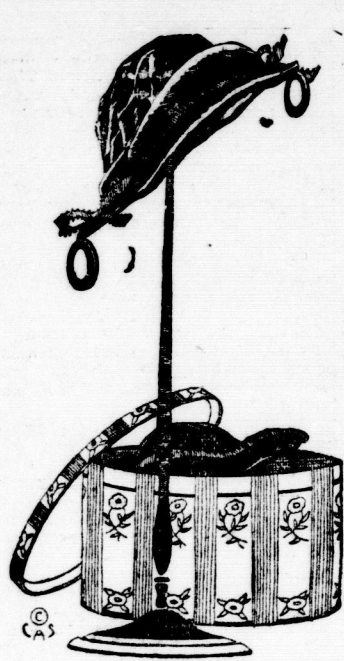

Paris, Oct. 20.—The decision of the council of the League of Nations on the Upper Silesian question was made public here today, and divides the plebiscite area into almost two equal parts between Poland and Germany, as to the number of communes, and provides administrative machinery for the gradual inauguration of a new regime over a period of fifteen years.

The long-awaited boundary line, according to an official communiqué, will follow the Oder River to Niechobitz, assigning 22 communes in this southern section to Germany, and 19 to Poland. The line is further traced in detail by the names of villages, the commune status in this more northern section Germany obtains 20 communes and Poland 21. North of Lissau the frontier will follow the old boundary line to the point where it joins that already fixed between Germany and Poland."

In order to insure the continuity of peaceful economic life in Upper Silesia after the partition, the council of ambassadors is urged to take measures looking toward German and Polish co-operation under the form of a general agreement.

SUFFERING FROM a fractured hip. Miss Martha Rogers, 87 years old, was admitted to Victoria Hospital at 3 o'clock Thursday night. Miss Rogers sustained her injuries when she fell down the cellar stairs at her home, 463 Central avenue.

This is the start of a better day

There's satisfying comfort and cheer in a breakfast cup of Postum, and there's no disturbing element to irritate nerves or digestion and leave mental energy lagging before the day is done.

Thousands of former tea and coffee users have found that Postum meets every demand for a delicious table beverage, and brings steadier nerves, clearer mind—better health.

As many cups as you like with any meal—no after-regrets.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes.

"There's a Reason" for Postum
