A Large Addition to the Population of Brittish Columbia Last Year.
With regard to immigration and colon-ization in British Columbia in 1896 it may be noted that there was a very large influx of people, especially from the United States and Eastern Canada into West Kootenay, but there have also been large accessions to the population in Xale, Cartiboo and the Coast districts as far north as Bentinck Arm. This was due more especially to the interest which attaches to mining development, but this will result undoubtedly, as has been the case in the mining countries of the United States.
