PROVINCE TO HAVE  
MODEL PRISON FARM

Structural Details of New Cen-  
tral Institution to be Erected  
at Burnaby in the Near Fu-  
ture

It is understood that the contract for  
the new prison farm building for the  
provincial government to be erected at  
Burnaby and serve in future as a central  
place of confinement, will be awarded  
during the current month, so that con-  
struction may proceed to completion  
before adverse weather conditions in-  
tervene. The new central prison is to  
be both structurally and in equipment  
thoroughly up-to-date, having been care-  
fully planned with a view to obtaining  
perfect light, ventilation and sanitation,  
in conjunction with absolute security.

The building is to be located on D. L.  
and has an excellent situation on a  
slope of a rather steep incline, the site  
commanding a fine view over Deer lake  
and facing north by north east, so  
that all cells will get the sunshine at  
some time of the day.  
The exterior design is plain and ap-  
propriate, the central building at the  
crossing of the wings having a pyra-  
midal slate roof with look-out platform  
from which a complete view of the  
surrounding country will be obtain-  
able, while the space in this roof is to  
be utilized for the storage tank in  
connection with the water supply. The  
plan is in the form of a cross, three hun-  
dred and forty-six feet by one hundred  
and ninety-five feet, and all prisoners  
will have individual cells of 9 ft. 6 in.  
by 5 ft. dimensions. The north or front  
wing is planned as the administration  
building, with accountant's and war-  
den's offices, waiting room, armory, libra-  
ry, male and female officers' mess rooms  
and male and female visitors' rooms on  
the ground floor. Above this are two  
floors of living rooms, with seven bed-  
rooms, and bath and toilet on each  
floor. The intersection of the wings  
is occupied by a large central hall,  
fifty feet square, on the ground floor,  
and a chapel of similar size with speak-  
ing platform and two clergyman's rooms  
on the first floor. Above the chapel is  
accommodation for a surgeon, photogra-  
pher, matron and hospital night guards,  
with large unassigned attic space.

**Accommodation for Prisoners.**  
The east wing is planned to contain  
one hundred and sixty cells for male  
prisoners, six punishment cells, thirteen  
shower bath cells, one tub bath cell,  
and temporary laundry where twenty  
future cells will be located. The west  
wing will have only the outer wall  
built at present, and this can be used  
as a work yard during inclement weath-  
er, but will eventually have the same  
accommodation as the east wing. The  
south wing will have cells for four  
female prisoners, three punishment  
cells, six bath cells, and temporary  
laundry, where nine future cells will  
be located. The top floor of this wing  
will be utilized for hospital patients,  
with six cells and a day room, and  
similar accommodation for female  
prisoners, each section having a bath-  
room attached and the two sections be-  
ing distinctly separated. The cell wings  
are connected to the central building  
with passages six feet wide. The base-  
ment of the central and administration  
buildings will be utilized for boiler  
room, kitchen, steward's room, bakery,  
and a vault, but are all almost entirely  
out of ground.

**Steel Frame Structure.**  
The central and administration build-  
ings are to be of steel frame construc-  
tion with brick walls and stone dress-  
ings, reinforced concrete floors with  
wood floors over, except in the corridors,  
and baths and toilets which will have  
terrazzo tile flooring. The cell wings  
are to be constructed of reinforced con-  
crete, four tiers and basement high, and  
are arranged back to back with inspec-  
tion ways and vent duct between and  
between the wings which are not to be  
connected with the side walls. The  
celleries are 3 ft. 6 in. wide and have  
1 1/2 inch barriers along the front and across  
the ends, so that they may be used for  
cell purposes. The outside walls of the  
cell wings are to be of solid brick-  
work with stone dressing and fitted  
throughout with steel sashes. The cells  
have concrete walls and partitions with  
iron front bars set about a foot back  
from the front of the concrete tiers,  
all arranged to ensure complete venti-  
lation, light and sanitation, while at the  
same time preventing improper inter-  
ference among the prisoners and con-  
serving the inmates.

Each cell except those for punishment  
purposes will have a basin for cold  
water supply, a closet, a bed hinged to  
the wall, so as to hold up against the  
cell, and an electric light drop. All  
cells will be connected by two outlets  
with the ventilating system and will  
also have inspection ways from the  
warden's office at the rear. The cell doors are so  
arranged that by the use of a lever  
operated at one end of the tier any indi-  
vidual cell or the whole twenty can be  
opened at the one operation.

**Ventilating System.**  
The administration building is to  
be heated by direct-indirect radi-  
ators, while the cell wings are heated  
by the direct-indirect system, the fresh  
air being admitted through the walls  
behind wall sections and drawn through  
duct connected to an outlet fitted with  
an electric fan. The ventilating system  
is arranged that the foul air is drawn  
down the floor, and all will be set so  
that the same amount of fresh air passes  
through each cell.

Although the building will be thor-  
oughly fireproof, as the term is under-  
stood, four rising water mains with  
stand pipes and hose reel at each floor  
level, will be installed, while the various

HIGH GRADE COAL  
FOUND AT ALBERNI

Discovery Has Occasioned  
Much Excitement at West  
Coast Port—Development  
will be Rushed

A seam of coal, of excellent quality,  
located almost in the middle of Port  
Alberni, has occasioned a considerable  
excitement in that locality. A gang of men  
has already been started at work upon  
the outcrop by the Alberni Land Com-  
pany, on the property of which the find  
was made. Archibald Dick is in charge  
of operations, and will, in a few days,  
put to work a larger gang. Work on  
the development of the measure will be  
rushed.  
The news of the find was brought to  
Victoria last evening by Mr. Leonard  
Frank who, in company with his brother,  
Mr. Bernard Frank, of the staff of the  
British Columbia, Howe Sound, came to  
Victoria from the west coast. Mr.  
Frank stated that the seam was located  
some time ago when the E. & N. grad-  
ing operations were under way. The  
value of the find was not immediately  
recognized, but the analysis of the coal  
has demonstrated it to be of a very  
superior quality.  
Work is now progressing in the im-  
mediate vicinity of the old Waterhouse  
wharf. What adds to the value of the  
coal is its close proximity to deep water.

TAXES IN SPAIN

Repeal of Octroi Duties Supplies In-  
come Problem For Government—  
Substitute is Unpopular

MADRID, June 24.—The Chamber  
recently passed a bill suppressing the  
octroi (grain) duties and the Senate  
also passed this measure by 178 votes  
to 63, the majority consisting of Lib-  
erals and the minority of Conserva-  
tives. The bill involves a consider-  
able loss to the treasury and the munic-  
ipalities. The loss to the treasury is  
not compensated for, but that to the  
municipalities, whose chief and per-  
haps only revenue is the octroi, is  
made good by the recently proposed  
new taxes, which include a tax on  
house rents. Rents in Madrid and  
Seville are higher than in any Euro-  
pean capital, so that the introduction  
of the tax has been most unpopular,  
chiefly among the middle classes, who  
besides being already considerably  
overtaxed in proportion to the small  
incomes of the new taxes without ob-  
taining any amelioration of the con-  
ditions under which they live.  
The Premier made the passage of the  
bill a Cabinet question, and therefore  
its acceptance by the Senate may be  
said to constitute a political triumph.  
It is possible, however, that the bill,  
besides throwing several thousand  
employees into unemployment, may be  
a financial failure.

IDENTIFIES PHOTO  
OF DEAD HUSBAND

Wife of Man Whose Body was  
Found on Beach at Beacon  
Hill Solves Mystery of Un-  
known

Arriving just one day too late to see  
her husband alive, Mrs. Catherine Bar-  
low learned for the first time last night  
that the unknown, whose dead body was  
picked up on the beach of Beacon Hill  
park last Sunday morning with a bullet  
wound through the right temple, was  
her husband. Last night she called at  
a police station to make inquiries as  
to what had happened to the missing man,  
and identified a photograph of the dead  
man as that of her husband. The shock  
was great, but for the past few days, as  
she had been unable to locate him, she  
had come to the conclusion that some-  
thing had happened.

She told the detectives that her hus-  
band's name was Clarence Caygell Bar-  
low, and he left London on April 29 of  
last year to come to British Columbia.  
They had been residing at Belvedere,  
Kent, England. They came to Lumby,  
near Vernon, and two weeks ago Bar-  
low came on to Victoria seeking employ-  
ment. He secured a temporary work at  
the Victoria Machinery Depot and wrote  
to her to come to this city. She arriv-  
ed last Monday, but no husband was on  
hand to receive her. She has since been  
staying at 2654 Graham street.

Barlow after his arrival here stopped  
at the Strangers Rest, 1418 Government  
street, but left there on the 17th inst.,  
the day before his dead body was found  
floating on the beach. So far as Mrs.  
Barlow is aware her husband had abso-  
lutely no reason for taking his own life.  
In one of the pockets of the coat on  
the body was found a card, on one side  
of which was lithographed the name  
"Mr. Kenneth Smith, Kimberley club,  
South Africa," and on the other the in-  
scription "Care of George Mitchell, 639  
Victoria street, Westminster." This lat-  
ter name was stated by Mrs. Barlow as  
having been that of a gentleman whom  
her husband had met in England.

The post mortem examination of the  
body disclosed the presence in the brain  
of a 38-cal. bullet similar to some thirty  
cartridges which were found in the  
coat pocket of the deceased. The inquest  
last Tuesday resulted in a verdict of  
"found drowned," but the jury be-  
lieved that from the circumstances of  
the case the deceased had shot himself.

**Cable Rate Reduction**  
PARIS, June 24.—As a result of its  
deliberations the International Tele-  
graphic Commission, which has been  
holding meetings here, has expressed  
the opinion that a reduction of 50 per  
cent should be made in the charges  
for long-distance telegrams transmitted  
by submarine cables, so long as they  
are written "in clear" and not according  
to a telegraphic code. The decisions of  
the commission will be communicated  
to the governments which were not rep-  
resented, and they will be invited to  
give their adhesion to the proposed re-  
forms.

**Harem Skirt Tragedy**  
BUCHAREST, June 24.—A trouser  
skirt has caused a terrible tragedy here.  
A pretty young girl named Vassilik  
Monrol appeared in the streets wearing  
the much-decried garment. It was her  
first venture, and she did it in a spirit  
of defiance after a heated discussion on  
the subject with Ignal Jovanescu, her  
flame. Unfortunately for the girl, she  
met the young man and when he be-  
held her he was so overcome with rage  
and indignation that he shot her through  
the head. The murderer, who was ar-  
rested, declared that he did not regret  
his deed, as he could never have mar-  
ried a woman who deliberately opposed  
him, while, on the other hand, to live  
without his sweetheart was impossible.  
He hopes to be sentenced to death.

ROYAL CARPET

Costly Axminster Product to be Laid  
in Westminster Abbey for Cor-  
onation Ceremony

LONDON, June 24.—The mammoth  
carpet which is to be laid in Westmin-  
ster Abbey for the coronation ceremony  
has been completed.  
Having a total area of over 900  
square yards, the carpet, which is a  
fine Axminster pile, royal blue in color,  
will cover practically the whole floor  
of the Abbey. It took six months to  
make, has 288 stitches to the square  
inch, and cost about \$18 per square  
yard, while each square foot weighs  
three-quarters of a pound.  
The two principal lengths of the car-  
pet, upon which the King and Queen  
will walk in their progress through  
the nave, measure respectively 153 feet  
by 9 feet and 70 feet by 9 feet. On  
the deep royal blue background of those  
sections is worked in pale garter blue  
a diaper pattern of interlacing bands  
to the whereabouts of the missing man,  
and identified a photograph of the dead  
man as that of her husband. The shock  
was great, but for the past few days, as  
she had been unable to locate him, she  
had come to the conclusion that some-  
thing had happened.

ROBESPIERRE'S HEAD

Authenticity of Death Mask in Tus-  
saud's Waxworks is Somewhat  
Doubtful

PARIS, June 24.—Considerable scep-  
ticism is felt as to the authenticity of  
the death mask of Robespierre's head,  
which is shown at Madame Tussaud's,  
and a copy of which has been offered  
to the French nation by the directors  
of the waxworks.  
The story goes that after the great  
revolutionary's head had fallen by a  
guillotine the original Madame Tus-  
saud was commissioned to take a cast  
of the mutilated head, Lord Redefield,  
and M. Cambon, the French ambassador,  
having acted as intermediaries, an ex-  
act copy of this head is to be sent to  
the Carnavalet museum in Paris.  
A few months ago, for a few days,  
another death cast purporting to be  
that of Robespierre's head was exhib-  
ited at the Carnavalet, this having been  
presented to the founder of the well-  
known museum by a descendant of  
Jules Simon. A careful inquiry was  
made into the antecedents of this cast,  
with the result that its authenticity was  
not established, and it was withdrawn.  
M. Georges Cain, director of the Car-  
naavalet, an historical expert, confesses  
to a large degree of doubt as to the  
genuineness of the Tussaud cast; taking  
into account the feverish excitement  
which governed the actions of the con-  
vention and all Paris at this sanguinary  
stage of the revolution. He thinks this  
mask may be one of the numerous al-  
terations of this sort which were as  
common a form of entertainment to  
the Parisians of that day as are the  
cinematograph shows of today.  
M. Cain reserves judgment, however,  
pending a minute inquiry with the aid  
of the best authorities.

Smartest of  
New  
Wash Skirts

Without the slightest  
doubt the Washable Skirt is  
the most popular of all Sum-  
mer Outer garments, and  
when the following prices  
are offered you cannot pos-  
sibly afford to be "out of  
style."

**White Skirts, of embroidered  
White Repp, at  
\$3.90, \$3.75,  
\$3.25 and..... \$2.50**

**Plain White Linen and  
Repp Skirts,  
up from..... \$1.75**

**Special Line of White Repp  
Skirts, the new style, but-  
ton down front,  
at..... \$2.90**

**Linen and Repp Skirts, Hol-  
land color, up  
from..... \$2.25**

**Heavy Blue Linen Skirts, in  
navy or butcher  
blue, at..... \$2.75**

NURSES APRONS

Heavy White Linen  
Nurses' Aprons.  
New lot just in.  
Each, 75c and .50c

NURSES APRONS

Heavy White Linen  
Nurses' Aprons.  
New lot just in.  
Each, 75c and .50c

**Campbell's**  
For the First of July "Tub"  
Suits, Skirts and  
Dresses

"Kiddies"  
Section  
Unusually Well  
Stocked

Our Children's Department shows  
the daintiest little Gingham and  
Zephyr Dresses and a beautiful line  
of Muslin Dresses for all ages.  
Then the Children's Millinery  
Section displays Muslin Hats and  
Bonnets in the sweetest little styles,  
and so reasonably priced—75c, 50c  
and 25c.

With the first of July comes the real  
warm weather, a time when Women's  
Washable Outer Apparel is in great de-  
mand, and a time when "Campbell's"  
again show their ability of being "a little  
ahead."

We trust that all ladies who possibly  
can will shop early in the week in order  
that we may give our customary exact  
attention to alterations.  
The convenience of a "tub" suit, skirt  
or dress is indeed great—the first outing  
may get it soiled, yet all you have to do  
is to wash it after which you practically  
have a new garment for the next outing.

New Arrival  
Exquisite  
Marabout  
Stoles

Only yesterday we unpacked a  
lovely lot of Marabout Stoles, in  
black, white, grey and sky. One of  
these is really essential to make the  
summer wardrobe complete and en-  
joy the cool temperature of the  
evenings.

Smartest of  
New  
Wash Skirts

Without the slightest  
doubt the Washable Skirt is  
the most popular of all Sum-  
mer Outer garments, and

Cloth Suits and Coats

While, of course, the warmer weather calls principally for  
the Washable Suits, Coats and Dresses, it is well to remember  
that we have hosts of stunning modes in light cloth Suits and  
Coats that are Impossible of Duplication.
