How are we going to light our main street this winter? This is a question that interests all, for no one wants to travel a street dark nights, with out some means of guiding them at night. Why not use the lamps now in position and owned by the town? A few more might be added from time to time.

We are pleased to see an agitation in progress for a county exhibition. This is as it should be. We have had some good exhibitions at Annapolis and Paradise in years gone by, and proved to be a good source of information and education for our farmers. Although the county is already putting in their claims for the contemplated fair, we believe that Lawrence town is in a better situation of any, because we are nearest the centre of the county and have a large agricultural district surrounding us. Moreover, we have the largest warehouse and one of the largest halls in the county to hold affairs of this nature in, and the people of this town are ready to do all in their power to make it a success. Now farmers and all interested make a good strong pull for this exhibition. We have always made successes of all our days in this town and can go one better and do it again. Let us have the County Exhibition at Lawrence town.

The outside has been painted a French grey, the trimmings a darker shade of the same color scheme, the ceiling having a delicate shade of French grey, with the side walls of a deeper shade, as is also the standing desks and the wainscoting. A twenty-inch frieze of a brownish green on a background of buff extends around the top of the wall, while a smaller one separates the side walls at the wainscoting. The borders are Romanesque and were designed by Allan Bishop, who had the contract for the decorating and painting. The pews are graded to represent quarters of oak, the trimmings being stained mahogany. The whole work reflects great credit on Mr. Bishop and his help.

The church has also been supplied with a new furnace, which adds to the comfort of the congregation. This was put in by R. T. Harris, and is a good sample of the work turned out by him.

## THE ENDING OF THE COAL STRIKE.

The coal strike is now practically over and while there will be some delay in settling the preliminaries of the arbitration, work is being generally resumed. Immediately following the conference between President Roosevelt and Mr. J. P. Morgan the announcement was made that the present would have a commission of six to make terms of settlement. The members of this commission are: Brigadier-General John M. Wilson, E. W. Parker of Washington, connected with the geological survey; Judge Thomas Gray of Delaware; E. E. Clarke, of Cedar Rapids, Iowa; Thomas H. Watkins, of Scranton, Pa.; Bishop John L. Spaulding, of Peoria, and Carrol D. Wright.

When it was suggested to Mitchell that the miners' convention on Monday night might reject the proposition of President Roosevelt—as the mine leaders style the arbitration plan—he shrugged his shoulders, smiled, but did not make any reply. Asked if there was not a row at the meeting of the district board, he said: "Oh, I guess not. There was a free exchange of opinion and different views were presented, but the call for the convention was issued. That is sufficient answer to your questions."

Mitchell, in talking to a friend, expressed the opinion that the strike would be called off and work resumed before Thursday night.

When the mine operators were disappointed because the convention was not called for Saturday night, they resumed on Monday. They had sent orders to hurry all coal carrying cars now scattered all over the country to shipping points—Wilkesbarre, Scranton, Hazleton, Shamokin, Tamaqua and other important centres of the transportation.

An official of the Delaware & Hudson estimated to-night that there are now on siding in the anthracite region more than 3,000 cars ready to bear coal to New York and other distributing points. A general order is already in effect giving the preference to coal over all other freight.

It is estimated that the first 24 hours operations will yield ready for shipment from 40,000 to 60,000 tons of coal. It is the purpose of the railway officials to send the first train load direct to New York, the second to Philadelphia, and continue to send the distributing agencies as rapidly as they can be loaded.

Wilkesbarre, Pa., Oct. 27.—In accordance with the call yesterday by order of the executive boards of the anthracite districts of the miners' union, all "locals" throughout the coal fields began electing delegates to-day to the convention which will be held here next Monday to consider the acceptance or rejection of the arbitration plan submitted by President Roosevelt.

Most of the local unions held their meetings to-night. They all will have been held by to-morrow night.

It is practically certain that a majority of the delegates will come to the convention instructed to vote in favor of the arbitration scheme. The prominent officials of the union say there is no fear that the opposition will be strong enough to defeat the efforts of those who favor ending the strike by arbitrating their differences with the operators. President Mitchell does not care to anticipate the action of the convention, but from his manner it is taken that he has not the slightest doubt as to the result. He will go in to the convention and accept the arbitration scheme.

The indications are that the convention will last two days and that there will be much debate on various features of the arbitration plan. The principal question to be discussed before the plan is accepted by the miners will be that of taking care of all the men.

The conditions of the miners are such that all workmen cannot be given work immediately, and some will have to wait for weeks before the companies can take care of them. The operators will not dismiss the non-union men in order to give employment to a returning strike. It is understood the union will take care of all such men who fail to find immediate employment. This will be done by drawing funds from the relief fund, which is said to be still growing.

The coal companies will do all in their power to meet the public demand for coal. Preparations are being made as soon as the miners call the strike off are going on apace.

## A LATE COUNTY EXHIBITION

To the Editor:—

Your issue of last week contained an admirable suggestion from Dr. M. E. Armstrong, viz., the holding of a County Exhibition alternately with Kings county.

This is a matter that should interest every farmer within our county, and should have the hearty support of our Town Council and Board of Trade. The Middleton and Victoria Beach railway have destroyed the usefulness of our trotting park for trotting purposes, let it be changed into a fair ground, and I have no doubt grants could be obtained from the local government, municipal and town councils to assist in the necessary expenditure. I shall not dwell upon the advantages of county exhibitions, for the recent exhibition held in the county of Kings and other parts of the province demonstrated that fact. Let our Council and Board of Trade be alive to this question, and we will ensure to us an exhibition next fall.
