

Begin to read—there is no fear but that you will finish the volume.

Maid Margaret of Galloway (The Copp, Clark Company, Toronto, 417 pages, \$1.50) is the latest of S. R. Crockett's tales, and has all the characteristics of that popular writer—color, movement, and love-making. It is a vivid picture of the troublous times when the king reigned in Scotland only by holding a strong hand upon the great families, and when the Douglas, black or red, or one might perhaps say black and red, was a power to be reckoned with. It is a sweet story, the story of the orphaned maid of Galloway and the wooing of her cousins, the Douglasses, albeit full of tragedy, as befits those stormy times. There is sufficient variety of place and incident,—within convent walls, in the baronial castle, in sunny France, among the mists of the Dee, in the loneliness of the moated keep, and in the stir of the battle field. The hatred of Stewart and Douglas gives it the tang of excitement, and the forging of "Mons Meg" is extremely well told. Altogether, Crockett's new book is enticing. One reads it through, and aside from the story, receives a vivid impression of what rough and ready, albeit gallant and lovable, sort of folk were our ancestors of four centuries ago.

Spiritual power, its nature, source, achievements, condition—what theme could be more attractive to the preacher, or of greater interest to the Christian striving after more complete self-conquest and greater usefulness. This is the theme of a number of sermons preached by Dr. F. W. Gunsaulus, in Central Church,

Chicago, and now published under the title, **Paths to Power** (Fleming H. Revell Company, New York and Toronto, 362 pages, \$1.25 net). It is said that Dr. Gunsaulus addresses weekly the largest congregation of devout people in the world. Through this book the influence of the author's striking and forceful personality will be extended over a wider area.

Two dainty little books in red covers come to us from Morang and Company, Toronto (**The MacMillan Company, New York and London**): **Longfellow's Hiawatha** (252 pages) and Hans Christian Andersen's **Danish Fairy Legends and Tales**. In each volume the text is preceded by a biographical notice of the author, and followed by full and satisfying explanatory notes. Besides, in the Longfellow there is a pronouncing vocabulary of proper names. The paper is good and the type exquisitely clear. Altogether the books are beautiful and handy editions of works whose charm never fails. They will slide easily into the pocket, and the price of each is 25c. net.

The title of Margaret E. Sangster's, **What Shall a Young Girl Read?** (**The Sunday School Times Company, Philadelphia**, 58 pages, 50c. net) is an arresting and important question. Few persons are better qualified to answer it than Mrs. Sangster. After an introductory chapter of a general character, there are in this little volume a series of friendly and interesting talks about books a young girl will like and profit from. Books of devotion, books on practical religion, biography, history, and fiction, hymns and poetry—the view is a broad and generous one

University of Toronto

FACULTY OF MEDICINE

THE regular course of instruction consists of Four Sessions, of eight months each, commencing October 2nd. There is a distinct and separate course for each of the four years.

The degrees conferred by the University of Toronto in Medicine are Bachelor of Medicine (M.B.), and Doctor of Medicine (M.D.). Students may take a combined course in Arts and Medicine if they wish to do so. Arts students who are taking the Honor course in Natural Science are able to fulfil the requirements of the primary work in medicine during their final years in Arts, and thus it is possible to obtain the degrees of B.A. and M.B. upon six years' University training.

Attention is directed to the efficient equipment of the University laboratories for instruction in the practical subjects of the Medical curriculum. The new building of the Medical Faculty has been completed at a cost of \$175,000.00, in the Queen's Park, and affords extensive laboratory accommodation for Pathology and Physiology which is unsurpassed. The lectures in the final subjects are also delivered in the new lecture theatres. Instruction in the other subjects of the medical course are taught in the various science laboratories and lecture rooms of the University.

To meet the requirements of the Ontario Medical Council, a course of instruction is conducted during a Fifth year. This is entirely optional as far as the University of Toronto is concerned.

Clinical teaching is given in the Toronto General Hospital, Burnside Lying-in Hospital, St. Michael's Hospital, Hospital for Sick Children, and other medical charities of Toronto.

There are special research scholarships offered to graduates in Medicine, and every opportunity is now offered for scientific research work in any of the various laboratories of the University, under the direct supervision of the Professor in charge.

The Faculty provide four medals for the graduating class (one gold and three silver). There are also scholarships available for undergraduates in the First and Second years; these are awarded to the candidates on the results of the annual examinations.

Further information regarding scholarships, medals, etc., may be obtained from the Calendar, or on application to the Secretary.

R. A. REEVE, B.A., M.D.,
Dean.

A. PRITROSE, M.B., C.M.
