

An Up-to-Date Cautery Apparatus

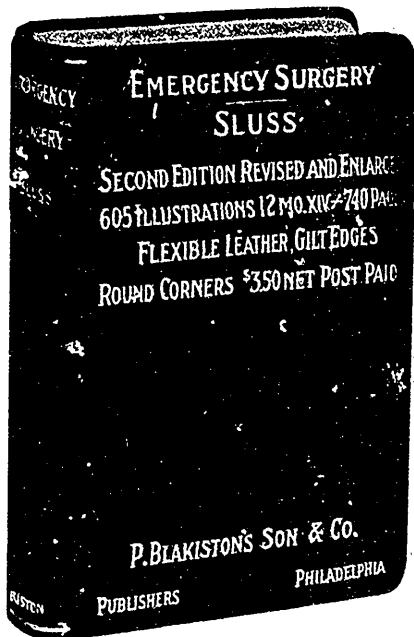

For Use
With
Alter-
nating
Current

The McIntosh Cautery Converter possesses many unique features not found in other instruments. It delivers a cautery current of large volume under perfect control, while a finely graduated rheostat provides absolute regulation of diagnostic lamps entirely independent of the cautery circuit. A special adjustment to suit the voltage of supply current and a convenient cut off switch are also among its numerous points of merit. It can be connected with any alternating current of 55, 110 or 220 volt pressure.

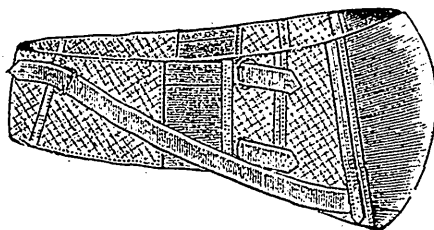

The quality and the price will appeal to you. We are headquarters for Everything Electro-Therapeutical.
