TO THE PUBLIC.

We wish to call special attention to our DOBSON'S PATENT WATERPROOF GRAIN, of which we are the sole manufacturers in Canada. This is an American invention, and has been thoroughly tested there for the past three or four years, and now we have at a large outlay become the sole manufacturers under the patent for this Dominion. Before purchasing we took every precaution and pains to thoroughly satisfy ourselves of its merits by actual wear, testing, etc., and now we fearlessly and confidently say it is superior in toughness and durability to any other grain leather in the market. It wears soft and pliable to the foot, keeps out the wet, and is certainly the most satisfactory wearing stock to be had. FARMERS can go into the dewy fields in the early morning, and have perfectly dry feet. TEAMSTERS can walk in the melting snow and slush, and have dry feet. For DITCHERS' and SAILORS' boots it is just the thing wanted; after standing in wet does not harden and never cracks. For SPORTSMEN in hunting, fishing, etc., it surpasses anything you can get. It turns the water without drawing the feet like rubber boots. For BOYS' boots it is exactly what is wanted; stands any amount of knocking about, never cracks or breaks, and wears twice as long as ordinary grain. We have during the last six months sold very considerable amounts to the wholesale trade in QUEBEC, MONTREAL and TORONTO, and also to numerous customers in towns and villages; and we herewith give you a few of the many testimonials we have received, which we earnestly recommend you to read, and don't fail to ask your boot-maker for a pair of this noted grain, and don't allow any other grain to be used instead, as it FAR EXCELS ANYTHING YOU CAN GET.—Yours respectfully, BICKELL & WICKETT.

DOMINION SHOW CASE MANUFACTURING COMPANY,

The New Firm invite all to see their grand display at the Toronto Exhibition.

the Main Entrance to the Main Building, to the right of the Main Entrance.
