

"D.L." Standard METAL LOCKERS and Shelving

When considering the question of what kind of lockers to install, you should learn all about the "D.L." Standard Metal Lockers and Shelving. They are built on the unit principle, have solid steel backs and partitions, with doors of either perforated sheet steel or expanded metal. From the standpoint of sanitation, safety and economy of space, they have special advantages for use in factories, stores, schools, hotels and gymnasiums. We are the largest makers of Steel Lockers in Canada, and employ only workmen experienced in this line of work, in this department. "D. L." Standard Metal Lockers are a product of superior skill, made at a reasonable price.
