

Cannot Uncouple and Cause Endless Trouble—
Do Their Work Well — Save Money — Last.

Security Conduit or Sewer Rods.

Easily and quickly jointed and unjointed, but always stay coupled in the duct. No slack between joints, no binding nor buckling against conduit walls. Bellied centers of the stout hickory rods make them stiff, they slide easily; iron couplings, made for severe use and abuse. So light one man can readily handle long runs.

Three and four feet lengths.
3 feet, weight 14 oz., \$0.55
4 feet, weight 1 lb. 3 oz. .65
Special lengths to order.
