

Uric acid, contd.

- - - exogenous and endogenous sources of ..	817
- - - in fevers ..	817
- - - gravel from ..	816
- - - in heart disease ..	817
- - - leukemia ..	817
- - - by no means indicative of gout ..	816
- - - in pernicious anemia ..	817
- - - physiology of precipitation ..	816
- - - reduction of Fehling's solution by ..	290, 818
- - - in urine ..	290
- - - care required in interpretation of ..	817
- - - crystals (<i>Fig. 212</i>) ..	816
- - - brown colour of, due to urochrome ..	816
- - - glycosuria with ..	817
- - - importance in frequent micturition ..	817
- - - in urethritis ..	817
- - - mucus with ..	816
- - - oxalate of lime with ..	816
- - - in relation to renal calculus ..	817, 818
URIC ACID DEPOSIT IN URINE ..	
- - - in cholera ..	715
- - - in uremia ..	715
- - - Urinary fistula (see <i>Fistula, Urinary</i>) ..	
- - - meatus, small, enuresis with ..	218
URINE, ABNORMAL COLOUR OF ..	
- - - black, from alkaptonuria ..	820, 822
- - - carboloria ..	820, 822
- - - after certain drugs ..	820
- - - from choluria ..	819
- - - gallic acid ..	820
- - - hematoporphyrin ..	819, 820, 821
- - - hematuria ..	820
- - - hemoglobinuria ..	314, 820, 821
- - - indicanuria ..	820, 821
- - - jaundice ..	820, 821
- - - melanuria ..	820, 821
- - - methemoglobin ..	821
- - - resorcin ..	820
- - - salicylates ..	820, 823
- - - after salol ..	820
- - - ura ursi ..	820
- - - blue, from indigo blue ..	823
- - - indoxyl glycuronic acid ..	823
- - - methylene blue ..	823
- - - brown, from alkaptonuria ..	820, 822
- - - carboloria ..	820, 822
- - - certain drugs ..	820
- - - gallic acid ..	820
- - - hematoporphyrin ..	820
- - - hematuria ..	820
- - - hemoglobinuria ..	314, 820
- - - indican ..	820, 821
- - - jaundice ..	820, 821
- - - melanuria ..	820, 821
- - - resorcin ..	820
- - - salicylates ..	820
- - - salol ..	820
- - - ura ursi ..	820
- - - green ..	187
- - - from bile ..	819, 823
- - - carboloria ..	820
- - - methylene blue ..	823
- - - in hematuria ..	205, 820
- - - hemoglobinuria ..	304, 314, 819
- - - in jaundice ..	360
- - - method of precipitation ..	820
- - - orange-red from uroerythrin ..	818

Urine, abnormal colour of, contd.

- - - orange-yellow from urobilin ..	818
- - - pink, on addition of alkali after drugs ..	819
- - - from ehrysophanic acid ..	819, 820
- - - eosin ..	819, 820
- - - hematoporphyrin ..	819
- - - hematuria ..	819
- - - hemoglobinuria ..	819
- - - and red from rhubarb ..	820
- - - rosaniline ..	819, 820
- - - santonin ..	820
- - - uroerythrin ..	818
- - - port-wine coloured from hematoporphyrin ..	819
- - - red, from ehrysophanic acid ..	819, 820
- - - eosin ..	819
- - - hematoporphyrin ..	819, 820
- - - hematuria ..	819
- - - hemoglobinuria ..	314, 819
- - - rosaniline ..	819
- - - smoky tint from carboloria ..	822
- - - yellow, from ehrysophanic acid ..	819
- - - and orange-coloured, pigments producing ..	818
- - - rhubarb ..	819
- - - santonin ..	819, 820
- - - senna ..	819
- - - absence of bile pigment in tropical abscess of liver ..	369
- - - chlorides in pneumonia ..	186, 321
- - - abundant and pale after angina pectoris ..	481
- - - acetone in (see <i>Acetonuria</i>) ..	
- - - agglomeration of oxalate crystals indicative of oxalate calculus ..	471
- - - albumin in (see <i>Albuminuria</i>) ..	
- - - albumose in (see <i>Albumosuria</i>) ..	
- - - ammoniacal, source of error in Fehling's test ..	290
- - - amphoteric and neutral reactions of ..	572
- - - analysis in chronic plumbism ..	173
- - - B. coli in (see <i>Bacteriuria</i>) ..	
- - - bacteria in (see <i>Bacteriuria</i>) ..	
- - - Bence Jones bodies in (see <i>Albumosuria</i>) ..	
- - - bile-pigmented (see <i>Jaundice</i> ; and <i>Urine, Abnormal Colour of</i>) ..	
- - - billiarzia ova in (<i>Fig. 13, p. 93</i>) ..	514, 630
- - - black (see <i>Urine, Abnormal Colour of</i>) ..	
- - - bladder epithelium in, in bacilluria ..	615
- - - blood-stained (see <i>Hematuria</i>) ..	
- - - calcium oxalate crystals in (see <i>Oxaluria</i>) ..	
- - - Cammidge's pancreatic reaction in (see <i>Cammidge</i>) ..	
- - - casts in (see <i>Albuminuria</i> ; and <i>Casts</i>) ..	
- - - causes of turbidity ..	82
- - - cayenne-pepper deposit in ..	816
- - - cells in, similarity of those derived from different sources ..	621
- - - changes in acute cystitis ..	512
- - - associated with biliary colic ..	500
- - - in carcinoma of liver ..	413
- - - cirrhosis of liver ..	410
- - - cystic disease of kidneys ..	15
- - - cystinuria ..	187
- - - cysts ..	628
- - - gastritis ..	297
- - - hydatid cyst of kidney ..	396
- - - impacted ureteral calculus ..	511

Urine, changes, contd.

- - - myxedema ..	43
- - - phosphorus poisoning ..	373
- - - pyelitis ..	500, 625, 628
- - - pyuria ..	624
- - - renal colic ..	500
- - - tuberculosis ..	626
- - - tumour ..	391
- - - in the stream ..	438
- - - due to vesical calculus ..	512
- - - crystals in, in vesical calculus ..	629
- - - cystine in (see <i>Cystinuria</i>) ..	
- - - deposit in, in bacilluria ..	615
- - - of pus in, in cystitis ..	628
- - - diacetic acid in ..	4, 292
- - - in cyclical vomiting of infants ..	426
- - - diminution of chlorides in phosphorus poisoning ..	373
- - - in pneumonia ..	372
- - - total solids in, in nephritis ..	625
- - - in pyelitis ..	625
- - - urea and uric acid in acute yellow atrophy ..	370
- - - dribbling of, after cessation of stream in urethral stricture ..	511
- - - dumb-bell crystals in (see <i>Oxaluria</i>) (<i>Fig. 130</i>) ..	470
- - - envelope crystals in (see <i>Oxaluria</i>) (<i>Fig. 130</i>) ..	470
- - - examination in Bright's disease ..	12 et seq.
- - - epistaxis ..	251
- - - oxaluria ..	470
- - - shortness of breath ..	101
- - - excessive (see <i>Polyuria</i>) ..	
- - - extravasation of, in injuries of the urethra ..	511
- - - pain in perineum in ..	516
- - - in ruptured urethra ..	308
- - - scrotal fistula due to ..	679
- - - faeces in (see <i>Faeces passed per Urethram</i>) ..	
- - - fat in (see <i>Chyluria</i>) ..	
- - - filaments in, from chronic gonorrhoea ..	207
- - - fluorescence in, due to eosin ..	820
- - - fragments of new growth in ..	305
- - - in papilloma of bladder ..	630
- - - gas passed with (see <i>Pneumaturia</i>) ..	
- - - glycuronic acid in ..	290
- - - gravel in, in renal colic ..	500
- - - hemoglobin in (see <i>Hemoglobinuria</i>) ..	
- - - heat loss due to evacuation of ..	619
- - - hippuric acid in ..	290
- - - hyperacidity of, frequency of micturition from ..	438
- - - incontinence of (see <i>Incontinence of Urine</i> ; and <i>Micturition, Abnormalities of</i>) ..	
- - - increase in quantity in pyelitis ..	625
- - - of solids in, in diabetes ..	584
- - - indican in (see <i>Indicanuria</i>) ..	290
- - - iodides in ..	87
- - - lactose in ..	290
- - - laevulose in ..	291
- - - lead in ..	38, 87, 136
- - - leucin and tyrosin in acute yellow atrophy of liver ..	370
- - - lithates in (see <i>Urates</i>) ..	
- - - microscopic characters of pus cells in ..	623
- - - milky (see <i>Chyluria</i>) ..	
- - - physiological causes of ..	573
- - - mucus in (see <i>Mucus in Urine</i>) ..	
- - - normal amount passed ..	437, 581
- - - in early tuberculosis of kidney ..	309
