A City of 40,000 People!

If all our telephone buildings were brought together in one place, and to them were added the homes of all our employees, the result would be a city of 40,000 or 50,000 people.

As a matter of fact, the employees of the Company, with their families and dependents, number considerably over 40,000.

This large body of workers can reasonably claim to be among the more active, progressive and necessary elements in the life of the community. If, every time you used the telephone, you could see all those who make it possible for you to talk over the wire, you would realize how earnest and painstaking telephone workers are.

They have keen personal interest in keeping the quality of the telephone service up to the highest possible standard.

You, as a telephone subscriber, rarely come directly into contact with the telephone employees. They serve you in an intimate though unseen way, and the product of their labor is very necessary to your welfare.

Through the medium of this advertisement, they ask you to co-operate with them in their efforts to keep the service up to the standard they are always striving to maintain.
