THREE PROVIDENCE MEN DROWNED WHILE YACHTING

Their Boat Was Upset in a Squall—Bodies Found on the Beach.

FALL RIVER, Mass., Sept. 4.—Three bodies found near an overturned boat found on Horse Neck Beach, in Westport, 15 miles from this city today, were identified as those of Wm. Cur-

roll, aged 44 years, Edward Collins, aged 50 and Walter Lacy, aged 27, all of Providence. The men left Providence last Saturday for a yachting trip to Vineyard Haven. It is supposed that in a squall their boat was disabled and that the men in attempting to reach shore in a skiff were capsized. The skiff and boat, both filled with water and badly damaged, were found near the bodies on the beach.

NEW YORK, Sept. 5.—A Havana special to the Herald says that a movement, peaceful but ominous, was begun in Cuba yesterday which may soon render the suits of victory of little value to the government force in the field. Laborers are leaving the country. Without them the industries of the island and its agriculture must perish. One of the chief efforts of the Cuban congress was to attract immigration, the expenses of those wishing to settle here being paid by the public treasury.

In the meantime Dr. Inch will endeavor to have a consultation with the Premier.

BIGGEST CROWD THAT EVER ATTENDED NORMAL SCHOOL

Almost Three Hundred Were Enrolled Today—Another Teacher Needed, and Additional Accommodation. FREDERICTON, N. B., Sept. 5.—The Provincial Normal School opened this morning with the largest attendance of pupils in the history of the institution. There were at noon 282 registered but there is no doubt that the number will exceed the three hundred mark when all have entered. The morning was taken up solely with organization, but it will take a day or two before the classification can be made. It is quite certain, however, that at least fifty will be placed in the first class. The great number gave Principal Bridges and his assistants lots of work this morning in arranging details. The large gathering hall was completely filled even the settees being called into service. The necessity of appointing another teacher will have to be once more considered as it is hardly possible that the present staff can meet the requirements. The building is also overcrowded and the lack of room forms no little difficulty. As usual the great majority of the pupils are females. Besides being the greatest number that has ever entered the school the scholars are an exceptionally intelligent and fine looking body of students. Principal Bridges' inception into the work has been an unqualified success.
