

AMERICAN ATHLETES TAKE LION'S SHARE IN STOCKHOLM EVENTS

Win Three Races of Opening
Day's Programme in Scan-
danavian Athletic Meet.

Stockholm, Oct. 14, via London, Oct. 15.—American athletes carried off the lion's share of the honors on the opening day of track events at the stadium here. Competing against athletes of the Scandinavian countries, the Americans today captured three races—the 100 and 400 metres run and the 800 metre relay race.

In the 400 metre run Ted Meredith, the former quarter-mile American national champion, defeated J. Bölin, the holder of the 800 metre Swedish record, the winner's time being 49.7-10 seconds. Americans took first, second and third places in the 100 metres event, the winner being Joe Loomis of Chicago. The high jump was won by the Swede, Kullerstrand, Loomis being second and Fred Murray of Chicago third.

COFFEY AN ITALIAN.

Jimmy Coffey, the box fighter, widely known as the "Mohawk Indian," has issued a communique informing a palpatizing world that he is not an Italian at all, but an Italian. Jimmy says that some of the sons of Sunny Italy have accused him of being ashamed of his origin, which he wishes to brand as a baseless figment of the imagination or words to that effect.

THE OLD AND THE NEW.

Old Dan Brouters, the slugging hero of the good old days of baseball, has of late been employed as night watchman at the Polo grounds. Most of the old timers got far less money than the present stars, but they spent more. Nowadays a topnotcher in the big leagues considers something of a disgrace to retire with less than a hundred thousand dollars.

MARITIME BAPTISTS OPEN THEIR ANNUAL CONVENTION

(Continued from page 5)
by the way and been forgotten, but despite the mistakes, and they had been many and grievous, the church was still marching on to the ultimate victory which should one day come.

The Task.

What is the task which Jesus set His church? While here He had prayed Thy Kingdom come, and that was what He came to earth for, to establish here the Kingdom of God. How was this to be done? Every great leader in the world has had some definite aim and some method of attaining that aim. The great reformers had a clear task to rid the world of an ecclesiasticism which was leading them astray, and to this end they taught that every man had a right to think for himself, and they put the Bible into the hands of the common people.

The Allies of today have gone to war to preserve the rights of the smaller nations, and their way of accomplishing that task was to kill out Prussian militarism. When Christ prayed Thy Kingdom come, He meant just what He said, and the Kingdom was to come here on this earth; and it was the business of the church to so live and teach that men would live as God would have them and regulate their lives and business activities by the golden rule and law of love. Men should carry their religion into their social, political and business lives. When God was left out immediately chaos was ushered in.

The Equipment.

Three things were necessary for the proper and successful carrying on of this task. The first was an unshakable confidence in Jesus Christ as the church's all conquering leader. The history of the centuries has taught that just in proportion as the church held to this confidence and she went forth and conquered. In the first century she had been bitterly persecuted by the Jews, yet at the end of that century the church had grown from the original twelve to half a million. The Romans had persecuted the church yet failed to stop its growth, and in the time of Constantine she had a representative on the throne of the Caesars.

The church had gone on conquering because there had always been the 7,000 who refused to bow the knee to anything but Christ, and had confidence that He would bring His purpose to pass.

The second thing needed was unswerving allegiance to the methods of Jesus. Jesus lived in a day of force, yet He had passed by the army. He passed by the wealthy, He even passed by the scholar and the hierarchy and adopted as His Method of bringing to pass the Kingdom of God on earth the removal of sin from the individual heart. Then society was to be transformed by the individual living the new life. There was a danger that the church might become the mere agent for pushing social service work. While social service work had a place in the church she must not forget that her chief mission in the world was to make man understand the absolute need of a new birth. This was the fundamental thing. When men had gotten rid of the sin in the heart, and the selfishness then would vice, graft and the overburdening of the working classes cease, men would conduct their business honestly, the politician would use his power for the good of society, and the employer would give faithful service. This was Jesus' method for removing hate, strife and war from the world and He had never doubted the success of His programme.

The third thing needed was a whole hearted reliance on the divine dynamism of the Holy Spirit. Machinery could do very little without power, and no matter how well the church might be organized unless she had the Spirit her work would amount to very little. Today great stress was being laid on scholarship for the candidates for the ministry and rightly so, but mere scholarship would never win souls for the Master and would do very little to bring in the Kingdom.

The Holy Spirit was the steam which turned the wheels and kept the machinery in motion and it was absolutely necessary to be equipped with this dynamism if the church was to fulfill her mission, which was to

convert the individual man and through the individual reform society.

The Afternoon Session.

At the afternoon session the speakers were Rev. I. W. Williamson and Rev. Dr. Whidden of Brandon. J. N. Barrs, president of the Vermont Baptist Convention, was invited to a seat in the convention.

Rev. Mr. Williamson gave a short talk to the young members of the Sunday school. Dr. Whidden, president of the Brandon Baptist College, gave an address on education in the west in which he suggested that the Baptists in Canada adopt a uniform programme having in mind the fact that the whole boy went to school. He also advocated religious education in the public schools, not sectarian but general religious teaching. He also claimed that no teacher should be employed in the public schools who was not of moral worth.

Most of the educators in the west were not in favor of the small college but he believed that it had a place to fill in the educational world. After the regular preaching service in the evening at the German street church, Rev. I. W. Williamson addressed a large congregation on the need of trained Sunday school workers.

Today there will be three sessions, morning, afternoon and evening.

CONVENTION VISITORS IN THE CITY PULPITS.

RICH DEPOSITS NEAR AMOS P. Q.

Fine Specimens Taken Out
Indicate Great Possibilities
and Prominent Mining Ex-
perts are Enthusiastic.

Special to The Standard.

Amos, Que., Oct. 14.—Great activity has sprung up in the mining line during the last few months in this region. Several mining capitalists and big mining companies have turned their attention to this hitherto neglected region.

The geological formation is identical with that of Northern Ontario, and some astonishingly rich specimens have already been taken out of the gold properties.

Gold is not the only mineral that has been located, but there are workable deposits of nickel, copper, molybdenite, iron, etc. But it requires hard work and the prospectors are few and far between. Capital from the province of Quebec has largely been invested in North Ontario mines and neglected this wonderful opportunity at home. The geological formation shows that the identical formation from Porcupine and Kirkland Lake and other important gold mining centres in North Ontario continues uninterrupted into Quebec and is as rich.

Several prominent mining engineers who have earned their spurs in Cobalt and Porcupine have been very enthusiastic over the outlook in Quebec.

The excitement centres round the Huronian River, which is navigable for about seventy-five miles south of the town of Amos, on the G. T. P., but few, or relatively few, claims have been staked and worked in this region.

NEW YORK MARKET

(McDOUGALL & COWANS.)

New York, Oct. 14.—Today's trading was another case of opening the market at slightly higher prices and then liquidating all the stocks that the market would absorb without causing much change in price levels. This is the process that seems to be favored at the present time by large banking interests and the severe upset that the market suffered on Monday was a good indication that some readjustment of market conditions was necessary to bring trading to a position where it could better withstand decidedly unfavorable market developments.

Business conditions, however, continue to show steady improvement in practically all lines and if there's no untoward development within a reasonable length of time we are very likely to see a return of public confidence that will again be reflected in the market. Meanwhile a cautious attitude seems likely to be followed by the public as well as by the large operators, and with the present

identical election so near at hand and there being somewhat more doubt regarding its outcome no immediate change is likely to occur.

NEWS SUMMARY.

(McDOUGALL & COWANS.)

Montreal, Q., Oct. 14.—Trading today was very dull and price fluctuations erratic. At the close only fractional changes were shown from last night. Dominion Iron and Steel of Canada were off half a point, whereas Scotia, Smelters and Cement were up fractionally. The new war loan was in good demand, some large blocks were wanted at 95½. The same price was also bid for the old loan.

N. H. S. TALKS ON NATURE.

Under the auspices of the junior members of the Natural History Society

of a series of talks will be given each Monday afternoon, until further notice, in the Natural History Museum, beginning at 4.10 o'clock sharp. On these occasions Mr. McIntosh will speak in an elementary, informal and helpful way on nature study and the subjects talked of will be illustrated by actual specimens and lantern slides. Any teachers who care to attend will be very welcome.

CHARLEY RADBOURNE'S RECORD.

Although the Giants have beaten the Providence record of consecutive victories, it is safe to say that no twirler will ever lower the colors of Charley Radbourne, who pitched eighteen of the twenty victories comprising the winning streak of the Giants in 1884.

The Police Court.

In the police court Saturday Harold Lockhart and Alfred Dage were each \$20 each for fighting on Main street. One drunk was remanded.

YOU can save Belgian lives!

Though you cannot fight and kill Germans, you can give and save some of their helpless Belgian victims, three million of whom must be fed or starve.

So little is needed to feed a Belgian family, and so economically are contributions handled by the Belgian Relief Commission, that there are very few of us who could not provide for at least one family through this winter, or till the end of the war.

\$2.50 a month—less than 10c. a day—will do it! How easily you could save that much from your little indulgences—and how much it would mean to some Belgian mother and her hungry little ones!

Wouldn't a little self-denial now be richly repaid by knowing, when the war is over, that you had done your part, and had saved precious lives for our unfortunate Allies?
