

- Tuberculosis of cervical glands, 325
 effects of, upon offspring, 197
 giant cell in, 444
 mesenteric glands in, 325
 of placenta, 223
 predisposition toward, inheritance of, 179
 pretuberculous stage of, 458
 racial susceptibility to, 162
 ulcerative, 442
 vaccination and opsonins in, 555
- Tabularia*, geotropism in, 602
- Tulip*, mutation in, 180
- Tumors, action of *x*-rays upon, 294
 benign, 669
 cells, latency of, 686
 connective tissue, 710
 due to mutation, 182
 glycogen in, 922
 malignant, 670
 autolysis in, 373
 mixed, 667
 forms of, 808 (note)
 multiple, 796
 primary, 694
 ordinary. *See* Blastoma.
 stroma of, origin of, 787, 790
 in tumore, 657, 837
- Turpentine, aseptic suppuration by, 431
- Twins, 228
- Typhoid fever, course of, 455
 rose spots in, 312
- Tylosis, 224
- Tyrosin, 59, 379
 produced in autolysis, 371, 372
- Tyrotroxeon, 385
- U**
- ULCERATION, exogenous, 433
 inflammatory, 432
 tuberculous, 442
- Ultramicroscopic organisms, 995
- Ultraviolet light, treatment of malignant growths by, 693
 rays, 292
- Umbilical cord, disturbances of, 224, 225
 effects of compression by, 217
- Uncinaria*. *See* Ankylostoma.
- Uniceptor, 572
- Urachal cysts, 852
- Uracil, 64
- Uracyl, 376
- Uremia, 388
- Uranoschisis, 271
- Urates, amorphous, 954
 in gout, 375
- Uratic deposits in tissues, 953
 inspissation of infancy, 941
- Urea from alloxuric bases, 377
 non-toxic properties of, 390
- Ureters, ligature of, effects of, 387
- Urethra, development of, 275
- Uric acid, 64, 376
 calculi, 941
- Uric acid, causes leading to increased production of, 377
 infarcts, 941
- Urinary calculi, 938
- Urine, bactericidal action of, 318
 in fever, 474
 resorption of, 388
- Urobilin pigmentation, 967
- Urobilinuria, 958
- Urogenital ducts, tumors of, 806
- Uroleucic acid, 379
- Urostealth, 945
- Urtica*, hybrids of, 169
- Urticaria, 312
- Use acquirements, non-inheritance of, 194
- Uterus, arteries of, degeneration of, clastoid, 896
 carcinoma of, metastases in, 682
 cervix of, tumors of, mixed, 662
 duplex, 278
 mucosa of, regeneration of, 20
 muscle of, involution of, 868, 909
 pregnant, hypertrophy of, 593
- V**
- VACCINATION, Jennerian, 493
 Pasteurian, 494
 Wright's, against various pathogenic organisms, 554
- Vaccinia, Guarineri's bodies and, 340
 ultramicroscopic organisms of, 995
- Vacuolar degeneration, 904
- Vacuoles in nuclei of fat cells, 51
- Vagina, tumors of, mixed, 662
- Variability, disease and, 17
 law of chance and, 18
- Variation, adaptation and, 116, 122
 biophores and, 157
 correlated, 182
 as distinct from modification, 159
 due to interaction of parental biophores, 188
 spontaneous, 180
- Varieties, distinction from species, 172
- Variola. *See* Smallpox.
- Varix, 815, 850
- Vegetations, 438
- Venoms, animal, 550
- Ventricle, fourth, hydrocele of, 861
- Veratrine, 304, 306
- Veronica*, hybrids of, 171
 mutation in, 183
- Vertebrae, accessory, 257
 supernumerary, due to mutation, 182
- Vesication from burns, 290
- Vessels, blood, regeneration of, 614
 of invertebrates, inflammation and, 418
 part played by, in inflammation, 415
 poisons acting on, 308
 secondary role of, in inflammation, 444
 transplantation of, 637
