" 15	Jan 12	Feb. 9	Mar. 9	April 7	May 4	June 1

Rules for the Use of the Table.

1. Note the height of the uterus in the patient's abdomen and the day of the month. Look down the column belonging to that particular height until you reach the corresponding date. Then read horizontally across the Table, and the date of delivery will be found in the last column. Thus:—The uterus reaches to the umbilicus on June 10th. Read down Column C until you come to June 10th, and then reading horizontally across the Table you find in the last column September 30th as the approximate day of delivery.

2. If the day of the month does not correspond with any date in the proper column, proceed as follows:—Ascertain the day of delivery counting from the nearest earlier date in the proper column and add to this
