

THE BT STANCHION

Is worth writing about for you can unlie your stock QUICKER with it and WITH GREATER EASE than with any other stanchion. It is the only stanchion that can be opened no matter what pressure the animal may be putting against it.

Let us tell you more about it and what that chain is for in fig. 02.

We also build Steel Stalls, Litter Carriers, Feed Carriers, Hay Carriers, Forks, Slings, etc.

MINERAL SURFACE - NEEDS NO PAINTING

AMATITE roofs need no painting. The owner need never look at them; they take care of themselves. They are "no-trouble" roofs. They present to the weather a real mineral surface against which storm and wind and snow are absolutely powerless. This surface does not require constant painting like the smooth surfaced or so-called "rubber" roofings. The mineral surface is far better than paint.

Of course before Amatite came, the "smooth surfaced" roofings were the best kind to buy. Now that Amatite has been invented and thoroughly tested by years of use, painting a roof is wasteful and unnecessary. The cost of painting a "rubber" roofing from year to year will soon cost more than the roof itself. That is why everybody who knows about roofing is buying Amatite nowadays. It needs no painting.

Amatite is easy to lay. Anyone can do the work. Large headed nails and liquid cement come free with every roll.

We shall take pleasure in sending you a sample of Amatite with our compliments upon request.

Don't Farm More Acres—Make Your Land More Productive

It is not the man with the largest farm that makes the most money. Your neighbor may be "land poor" and still make less money than you will from your 80 or 160 acres.

The secret lies in keeping up the fertility of your soil. Make every acre yield the highest possible returns by spreading the barnyard manure with one of the

I. H. C. Manure Spreaders

The Corn King Return Apron Spreader The Cloverleaf Endless Apron Spreader

Either one of these machines will double the value of the manure by making it go farther and by placing it on the land in such a condition that none of it will be wasted.

And because the machine doubles the value of the manure, it will shortly double the producing power of your land. Remember that farming more acres to produce larger crops means more fencing, more seed, more labor, more wages and more wear on machinery. Take the short cut to larger crops by investing in the machine that will double the yield of the land you are now farming.

Can you buy a farm machine that would be a better investment?

Call and discuss the matter with the local agent handling one of the I. H. C. lines of spreaders. He will supply you with catalogs and full particulars. Or write to the nearest branch house for any further information desired.

MAKE MORE MONEY

Out of the Hog Business

This volume is handsomely printed on fine paper from large, clear type, and is profusely illustrated, containing a large number of magnificent half-tone illustrations and drawings, many of them full page plates which are printed on a special plate paper. Another marked feature is the frontispiece, this being an anatomical and physiological model of the hog, which appears in a book of this character for the first time. It is entirely new and original, and should prove of the greatest value to everyone—teacher, student, stockman, farmer, or general reader.

The work contains 704 pages (6 by 9 inches) bound in fine silk cloth, making a very handsome and attractive book. No one can claim to be up to date in swine matters unless he possesses a copy.

Price, prepaid to your address, \$2.50
