WHEN DAYS GET SHORT

You want a Portable Light of High Power to enable you to conduct your work satisfactorily.

The Holland Acetylene Light

is a very handy article for Contractors, Bridge Builders, Freight Yards, Wharves, etc. It gives a brilliant flame of 100 candle power which is unaffected by wind or rain.

The Buckeye Kerosene Light

is also unaffected by wind or rain, and is suitable for work where a very bright light is required in one place. It is supplied in capacities from 1,000 to 6,000 candle power.
