At four of these points the bank took over the business of private bankers, and at all of them the outlook is satisfactory.

The crops in Ontario were below the average last year and the past winter was one of the hardest for many years, but in spite of these circumstances every department of the bank's business has made good progress, and the outlook at the present time is distinctly favorable. The increase of \$2,624,751 50 in deposit and \$106,325 in note circulation cannot fail to be gratifying to the shareholders, as it affords convincing evidence of a growth of public confidence in the bank of which any Canadian institution might be proud.

The assets show an increase of \$3,065,831 49 over last year, and amount to \$11,669,905 58. Of this there is in actual cash or at credit with our bankers \$1,569,682 57 or more than the entire capital of the bank. The increase in the "Bank Premises" account is chiefly due to the purchase of a valuable site on the principal financial thoroughfare in Montreal and the erection of a first-class ten-story building, the ground floor of officer in the army that he fought against. I would warn you, sir, that out the war and was never a scout or which will be occupied by the Montreal branch and the first floor by the general manager and his staff.

Mr. H. S. Holt, president, and Mr. James Carruthers, director retired from the board during the year, and the vacancies thereby created were filled by the election of Mr. W. K. McNaught, one of the original shareholders of the bank, and Mr. D. M. Stewart, the general manager. The presi-The old man spoke very earnestly.

### PRESIDENT'S ADDRESS.

In moving the adoption of the Directors' Report, the President spoke as

"Hamilton had warning of the discovery of the plot—there was a Copperhead behind every loyal man here in those days—and got away safely. But you can see that, having vouched for him and harbored him, I was put in a nice position with the authorities. In moving the adoption of the Directors Report, the Field follows:

### GENERAL MANAGER'S ADDRESS

The General Manager hoped that the statements submitted would be found satisfactory, and that the further information now given would enable the shareholders to form an accurate estimate of the actual position of the Bank. The surplus over all public liabilities was \$1,700,000, and over 40

cent of the assets immediately available; the proportion of the latter being 57 per cent of the total deposits, which was a highly satisfactory showing. The overdue debts were good, and only temporarily past due, the Bank having written off or previded for all bad and doubtful debts out of the The Bank had 26,725 depositors and 6,185 discount customers, making a

total of 32,910, which he considered a splendid clientele to have acquired in three years. The deposits average but \$311 per customer, and the loans show an average of \$1,400 per borrower, which ought to satisfy the most exacting shareholder. The General Manager stated that he had intended from the Bank's inception that it should not be purely local, but that, if possible, it should

become an international institution, with business connections all over the world. This had been largely accomplished already, and the Bank's American and foreign business had attained very important dimensions. Within a week after the shareholders had been notified of the allotment of stock, applications had been received for more than the total issue and, although the first installment is not due until the 15th June, \$125,000 had been actually received to date making the paid-up capital \$1,-400,000, and the Reserve Fund \$425,000. Excluding directors' applications, the Bank had received subscriptions for nearly 5,000 shares, while the total issue was only 3,250. There were only 272 shares left after allotment, and these have been oversubscribed for nearly ten times. Referring to these facts, Mr. Stewart stated that this was the greatest compliment the management of the Sovereign Bank could have received, and it should be a powerful influence in further establishing the confidence of the public in the in-
